## **1.0 INTRODUCTION**

The primary purpose of the re-examination is to confirm that the Dominion AccuVote TSX version 4.6.4 and Assure version 1.2 voting system meets the requirements of Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 – 3031.22. This re-examination is being performed per the direction of the Secretary of the Commonwealth, acting through the Pennsylvania Department of State, Bureau of Commissions, Elections and Legislation. This re-examination will commence on Thursday, March 8, 2012 at the following location:

Commonwealth Keystone Building  
Hearing Room 1  
400 North Street  
Harrisburg, Pennsylvania

The daily duration of this re-examination will be from 9:00 A.M. until 5:00 P.M. Eastern Standard Time unless a representative of the Secretary of the Commonwealth requests an extension, suspension, or a halt in testing.

## **1.1 References**

The documents listed below were used in the development of the Test Protocol.

- Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 – 3031.22
- Federal Election Commission 2002 Voting Systems Standards
- Help America Vote Act (HAVA) of 2002, Public Law 107-252, 42 U.S.C. § 15301 *et seq.*

## **1.2 Terms and Abbreviation**

*This subsection lists terms and abbreviations relevant to this re-examination*

“ADA” – Americans with Disabilities Act

“ASSURE” – Dominion software used for defining and managing security services for the ASSURE voting system

“COTS” – Commercial Off-The-Shelf

“Department” – Pennsylvania Department of State

“DRE” – Direct Recording Electronic

“EAC” – Election Assistance Commission

“EMS” – Election Management System

“Examiner” – The examiner appointed by the Secretary of the Commonwealth to conduct the re-examination

“ExpressPOLL” – Dominion software tool used to encode Voter Access Cards

“FEC” – Federal Election Commission

“GEMS” – Dominion election management system

“ITA” – Independent Testing Authority

“PA” – The Commonwealth of Pennsylvania

“Pennsylvania Election Code” - Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 – 3031.22

“Secretary” – The Secretary of the Commonwealth

“TDP” – Technical Data Package

“VSS” – Federal Election Commission 2002 Voting System Standards

“VVSG” – Election Assistance Commission 2005 Voluntary Voting System Guidelines

### 1.3 Background

The AccuVote TSX version 4.6.4 and Assure version 1.2 were certified for use in the Commonwealth of Pennsylvania on March 9, 2011, after an examination conducted pursuant to the Pennsylvania Election Code. The AccuVote TSX version 4.6.4 and Assure version 1.2 have been in use by Pennsylvania counties since its initial certification. Pursuant to section 1105-A of the Pennsylvania Election Code, 25 P.S. § 3031.5, a group of Pennsylvania voters formally requested that the Secretary conduct a re-examination of the Dominion AccuVote TSX. The Secretary granted the request.

The Test Protocol was developed to ascertain whether the certified electronic voting system complies with the requirements set forth in the Pennsylvania Election Code.

### 2.0 TEST ITEMS

*This section contains detailed descriptions of the items tested during the re-examination, including all software, hardware, and peripherals, both proprietary and COTS, and any test support equipment or materials necessary for test performance.*

#### 2.1 Software/Firmware

*This subsection contains a listing of the software and firmware being evaluated.*

**Table 2.1 Software**

| Component Name              | Version      | Unique Identifier<br>(digital signature or hash value) |
|-----------------------------|--------------|--------------------------------------------------------|
| AccuVote TSx Ballot Station | 4.7.8        | TBD                                                    |
| CE                          | WCE 410.3.10 | TBD                                                    |

| Component Name          | Version | Unique Identifier<br>(digital signature or hash value) |
|-------------------------|---------|--------------------------------------------------------|
| BootLoader              | 1.3.11  | TBD                                                    |
| ABasic Report Files     | 2.2.4   | TBD                                                    |
| AVPM Model A            | 3.03    | TBD                                                    |
| GEMS                    | 1.2.1.5 | TBD                                                    |
| ASSURE Security Manager | 1.2.5   | TBD                                                    |
| Key Card Tool           | 4.7.8   | TBD                                                    |
| VC Programmer           | 4.7.8   | TBD                                                    |
| Voter Card Encoder      | 1.3.3   | TBD                                                    |
| ExpressPoll Card Writer | 1.1.6   | TBD                                                    |

## 2.2 Hardware

*This subsection contains a listing of the hardware being evaluated.*

**Table 2.2 Hardware**

| Component Name | Model Number | Revision Number | Description |
|----------------|--------------|-----------------|-------------|
| AccuVote TSX   |              |                 | DRE         |
| ExpressPoll    |              |                 |             |

## 2.3 Peripherals

*This subsection contains detailed descriptions of optional equipment used by the system being evaluated.*

**Table 2.3 Peripherals**

| Part Name                      | Model Number | Revision Number | Description                            |
|--------------------------------|--------------|-----------------|----------------------------------------|
| PCMCIA                         |              | N/A             | Transport media                        |
| AccuView Printer Module (AVPM) |              |                 | VVPAT printer                          |
| Voter Card Encoder             |              |                 | Device to create voter access cards    |
| RICOH LP440C Printer           |              |                 | COTS printer used to print EMS reports |

## 2.4 Test Support Equipment/Materials

*This subsection contains detailed descriptions of the test support equipment and materials needed to perform the required testing.*

The Examiner will provide a tape measure (to be used in Test Case 1), Test Execution Logs, and a digital camera for test documentation. The re-examination will be video recorded by the Department.

The voting system manufacturer must provide an EMS system currently certified for use in Pennsylvania loaded with the closed primary and general-election definitions (Appendix A). These election definitions

are the ballot configurations that will be used throughout the re-examination. The manufacturer is responsible for providing the Department and the Examiner with technical staff to support the re-examination. The manufacturer must provide three precinct-tabulation devices for each voting system being examined. The manufacturer must be prepared to load the firmware for each precinct tabulation device. The Department will also require manufacturer to configure the precinct tabulation devices as they would be in the precinct on Election Day, including seals and locks. The manufacturer must be prepared to print pre-election reports, precinct results reports, audit logs, and post-election reports.

### 3.0 TEST MATERIALS

*This section contains a detailed description of all materials made available to Examiner for the re-examination.*

#### 3.1 Technical Data Package

*This subsection lists all manufacturer provided documentation that is relevant to the system being tested.*

**Table 3.1 Documentation**

| Document Name                                                                                                         | Revision   | Issue Date |

#### **4.0 TEST SPECIFICATIONS**

*This section contains a detailed description of the procedures to be followed during test setup and preparation.*

The re-examination of the voting system will occur in an environmentally controlled room. The room will be configured such that the Department, the Examiner, and the voting system manufacturer have their own independent work areas. The public will be allowed to observe the examination, but may not comment or interact with either the employees of the Department, the Examiner, or the voting system manufacturer, at any time. The manufacturer will be allotted time and space to stage the voting system prior to the re-examination. This time and space will be determined between the Department and the manufacturer in advance of the examination date. Once the manufacturer informs the Department that the voting system is properly set up, the Examiner will provide the manufacturer with the firmware/software for the precinct tabulation device, submitted to the Department from the trusted source. The manufacturer will load the firmware/software on to the required media for installation onto the precinct tabulation device and install the firmware/software onto the precinct tabulation device before commencement of the re-examination. Once each precinct tabulation device is loaded with the firmware/software, the manufacturer will not be allowed access to the internal components of the devices without the consent of the Department or the Examiner. If the re-examination is suspended, the precinct tabulation devices will be secured in a manner to ensure control of the test environment. If, at any point, the Department or the Examiner determines that the control of the test environment has been compromised, all firmware/software will be reloaded on the precinct tabulation devices.

The voting system manufacturer shall set up the precinct tabulation devices as they would be in the precinct on Election Day, minus the locks and seals. The locks and seals will be installed and evaluated at a later time in the re-examination.

The Examiner will maintain photographic and written documentation of the re-examination. This will include, but is not limited to, photographs of the firmware/software installation, test execution notes and observations, photographs of the test setup, and collection of test data. The Department will video record the re-examination.

## 5.0 TEST PROCEDURES

*This section contains a detailed description of the test sequence, test procedures and expected results.*

The test cases for this re-examination are contained in Appendix B of this Test Protocol. All steps of the tests cases contain an expected result to provide objective pass/fail criteria. There are no dependencies for execution of the test cases. The test cases have been divided into four main areas for execution: (1) Review; (2) Targeted Functionality; (3) System Integration; and (4) Penetration Analysis. -The Review area of this re-examination will not be performed on-site during the set dates of the re-examination. The Review area of testing includes documentation review of third-party reports and review of the manufacturer's TDP. All other areas of testing will be performed on-site during the re-examination. The test sequence for this re-examination will be as follows:

### **Review:**

- 1107-A(11), 25 P.S. § 3031.7(11) Suitably Designed, Constructed in Workmanlike Manner of Durable Material, Safely and Efficiently Useable, Capable of Absolute Accuracy
- 1107-A(13), 25 P.S. § 3031.7(13) Record Correctly, Computes and Tabulates Accurately
- 1107-A(14), 25 P.S. § 3031.7(14) Safely Transportable
- 1107-A(15), 25 P.S. § 3031.7(15) Voter May Readily Learn to Operate

### **Targeted Functionality Test Cases:**

- Test Case Identifier: 01 – 1107-A(1), 25 P.S. § 3031.7(1) Voter Secrecy (Regular Voter)
- Test Case Identifier: 01 – 1107-A(1), 25 P.S. § 3031.7(1) Voter Secrecy (ADA Voter)
- Test Case Identifier: 02 – 1107-A(2), 25 P.S. § 3031.7(2) Selection of Candidates and Questions by Voter (Regular/ADA)
- Test Case Identifier: 03 – 1107-A(3), 25 P.S. § 3031.7(3) Straight Party and Pennsylvania Method
- Test Case Identifier: 04 – 1107-A(4), 25 P.S. § 3031.7(4) Straight Party and Write-In
- Test Case Identifier: 05 – 1107-A(5), 25 P.S. § 3031.7(5) Selection of Candidate and Write-in
- Test Case Identifier: 07 – 1107-A(7), 25 P.S. § 3031.7(7) Attempt to Over Vote Contests and Questions (Regular/ADA)
- Test Case Identifier: 10 – 1107-A(10), 25 P.S. § 3031.7(10) Ballot Review and Change (Regular/ADA)
- Test Case Identifier: 16 – 1107-A(16), 25 P.S. § 3031.7(16) Public Counter, No Reopening of Polls, Media Security with Tamper Proof Locks and Zero Proof and Tally Reports

### **System Integration Test Cases:**

- Test Case Identifier: 04, 06, 08, 09, Permanent Physical Record, and Statistical Sample – 1107-A(4), 25 P.S. § 3031.7(4) Enables Voting for Legal Combinations; 1107-A(6), 25 P.S. § 3031.7(6) Permits Voting for as Many Candidates as Entitled, Permits Voting For or Against Questions, Precludes Voting for Unauthorized Candidates or Questions; 1107-A(8), 25 P.S. § 3031.7(8) Precludes Multiple Voting and Tabulating Multiple Votes; 1107-A(9), 25 P.S. § 3031.7(9) Permits Voter at Primary to Vote Only for Candidates in Party of Registration, Any Candidate for Nonpartisan Nomination, and For Any Entitled Question; 1101-A, 25 P.S. § 3031.1

Provides for Permanent Physical Record of Each Vote Cast; and 1117-A, 25 P.S. § 3031.17 Statistical Sample

#### **Penetration Analysis Test Cases:**

- Test Case Identifier: 12 – 1107-A(12), 25 P.S. § 3031.7(12) Acceptable Ballot Security Procedures and Impoundment of Ballots

### **6.0 TEST DATA**

*This section contains a detailed description of the test election definitions and ballot logic being exercised.*

The election definitions being used for this re-examination are provided in Appendix A of this Test Protocol. A predefined set of election parameters are included in the election definitions. Both the general election and the closed primary election definitions provide the voting variations, geographic subdivisions, parties, supported languages and test voting pattern with results being tested. The only languages required for this re-examination are English and Spanish. The Department provided the Spanish translation. Each test voting pattern provides the input method and device. For all Write-In selections, the name will be input as “John Doe.” For multiple Write-In selections, the name will be appended with the character “I” for the number of Write-In selections (*i.e.*, “John Doe I,” “John Doe II,” “John Doe III,” and “John Doe IIII” in a “Vote for Four” contest with four write-ins).

#### **6.1 Data Recording**

*This subsection contains a detailed description of the procedures to be followed during test execution and data collection.*

All test data produced during this re-examination is the property of the Department. The output test data will be collected and stored in an appropriate manner as to allow for data analysis. Actual results from executed tests will be recorded in real-time in Test Execution Logs.

#### **6.2 Data Evaluation**

The Examiner will evaluate all test results against the expected results set forth in the test cases provided in Appendix B. The acceptable range for system performance and the expected results is derived from the test designers experience and expertise. If an expected result is not achieved, an evaluation will be performed as to “why” the test or test step did not produce the expected results. This evaluation will consider test error, invalid expectations, and system performance. Failure to achieve the expected results does not constitute a test failure. A test failure only occurs when the “Criteria for Evaluation of Test Results,” as set forth in the test cases, are not achieved for a specific test.

**APPENDIX A**  
**ELECTION DEFINITIONS**

**Election Definition: Pennsylvania Certification Closed Primary Election****Primary Election Description:**

A closed primary election for 2 parties in 3 precincts. This election contains 35 contests compiled into 6 ballot styles. Each ballot style contains 15 contests. The voting variations supported in a primary election by the Commonwealth of Pennsylvania are defined in this election. The voting variations are as follows:

- Partisan contest
- Non-Partisan
- Primary Presidential delegation nominations
- Write-In voting
- N of M Contest
- Cross-Party Filed Candidates

This closed primary election was designed to functionally test the handling of multiple ballot styles across geographical subdivisions, support for two languages, and support for common primary specific voting variations.

**Configuration:**

**EMS computer loaded with software certified for use in Pennsylvania to create the following configuration:**

**Name:** Pennsylvania Certification Closed Primary Election

**Voting Devices:** 1 machine for each precinct

**Precincts:** Precinct 1, Precinct 2, Precinct 3

**Parties:** Republican, Democrat

**Languages:** English, Spanish

**Totals Contests:** 35

**Contests as follows:**

| Precinct 1 REP                                                                                                                                         | Precinct 2 REP | Precinct 3 REP                                                                                           | Precinct 1 DEM                                                                                                                                                 | Precinct 2 DEM | Precinct 3 DEM                                                                                               |

## **Election Definition: Pennsylvania Certification General Election**

### **General Election Description:**

A general election combining presidential year contests, non-presidential year contests, and municipal contests into a single election held in 3 precincts one of which is a split precinct on the “Representative in the General Assembly” contests. This election contains 21 contests compiled into 4 ballot styles (excluding language styles). 15 of the contests are in all ballot styles. The other 6 are split between at least 2 of the precincts with a maximum of 21 different contests spread across the 3 precincts. All voting variations supported by the Commonwealth of Pennsylvania are defined in this election. The voting variations are as follows:

- Partisan contest
- Non-Partisan contest
- N of M contest
- Referendum contest
- Retention Contest
- Straight Party voting
- Write-In voting
- Split Precinct
- Cross-Party Nominated

This general election was designed to functionally test the handling of multiple ballot styles across geographical subdivisions, support for English and Spanish languages, support for all Pennsylvania voting variations, and audio support for English and Spanish.

### **Configuration:**

**EMS computer loaded with software certified for use in Pennsylvania to create the following configuration:**

**Name:** Pennsylvania Certification General Election

**Voting Devices:** 1 machine for each precinct

**Precincts:** Precinct 1, Precinct 2 split into 2a and 2b, Precinct 3

**Parties:** Republican, Democratic, Green, Libertarian

**Languages:** English, Spanish

**Totals Contests:** 21

**Contests as follows:**

| Precinct 1                                                                                                | Precinct 2a | Precinct 2b | Precinct 3 |
|-----------------------------------------------------------------------------------------------------------|-------------|-------------|------------|
| <b>Straight Party</b>                                                                                     |             |             |            |
| Republican                                                                                                |             |             |            |
| Democratic                                                                                                |             |             |            |
| Green                                                                                                     |             |             |            |
| Libertarian                                                                                               |             |             |            |
| <b>President/Vice President of the United States</b>                                                      |             |             |            |

| <b>Test Case Identifier:</b> 01 – 25 P.S. § 3031.7(1) Voter Secrecy (ADA Voter)                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>PA ST 25 P.S. § 3031.7 Requirement:</b>                                                                                                                  | <i>(1) Provides for voting in absolute secrecy and prevents any person from seeing or knowing for whom any voter, except one who has received or is receiving assistance as prescribed by law, has voted or is voting.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>Test Objective:</b> To determine if a voters selections using an ADA input device can be observed during the act of voting or once a vote has been cast. | <b>Test Configuration:</b> Precinct tabulation device configured as described for normal election day operation by Pennsylvania procedures and/or the device manufacturer for an ADA voter. A marker is placed 12 feet (measured from the lowest point of the devices voting surface to the floor) directly behind the center of the voting device. From that marker, another marker is placed 12 feet to the right side and the left side. The side distance observation points should be approximately 17 feet. See Step 1000 for a layout diagram. The ADA voter will be positioned in the center of the tabulation device with a site line of 4 feet. See Step 1001. |
| <b>Test Equipment:</b>                                                                                                                                      | Standard 15+ foot tape measure                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>Special Procedural Requirements:</b>                                                                                                                     | Two roles are required for this test case. An ADA Voter role and an Observer role. The ADA Voter will be positioned with a line of site at 48 inches. The observation must be made by an individual between the heights of 68 inches and 71 inches.                                                                                                                                                                                                                                                                                                                                                                                                                      |

| <b>PA ST 25 P.S. § 3031.7 Requirement:</b>                                                                                          | <i>(1) Provides for voting in absolute secrecy and prevents any person from seeing or knowing for whom any voter, except one who has received or is receiving assistance as prescribed by law, has voted or is voting.</i>                                                                                                                                                                                                                                                                                                                                                 |
| <b>Test Objective:</b> To determine if a voter's selections can be observed during the act of voting, or once a vote has been cast. | <b>Test Configuration:</b> Precinct tabulation device configured as described for normal election day operation by Pennsylvania procedures and/or the device manufacturer. A marker is placed 12 feet (measured from the lowest point of the devices voting surface to the floor) directly behind the center of the voting device. From that marker, another marker is placed 12 feet to the right side and the left side. The side distance observation points should be approximately 17 feet. See step 1000 for a layout diagram.                                       |
| <b>Test Equipment:</b>                                                                                                              | Standard 15+ foot tape measure                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Special Procedural Requirements:</b>                                                                                             | Two roles are required for this test case. A Voter role and an Observer role. The observation must be made by an individual between the heights of 5 feet 8 inches and 5 feet 11 inches.                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Assumptions:</b>                                                                                                                 | An election is loaded on the device and the polls are open, ready for voting.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| <b>PA ST 25 P.S. § 3031.7 Requirements:</b>                                                                                                                            | <p>(16) <i>If the voting system is of a type which provides for the computation and tabulation of votes at the district level, the district component of the automatic tabulating equipment shall include the following mechanisms or capabilities:</i></p> <p>(i) <i>A public counter, the register of which is visible from the outside of the automatic tabulating equipment component into which the ballots are entered, which shall show during any period of operation the total number of ballots entered for computation and tabulation.</i></p> <p>(ii) <i>A lock, or locks, by the use of which all operation of the tabulation element of the automatic tabulating equipment is absolutely prevented immediately after the polls are closed or where the tabulation of votes is completed.</i></p> <p>(iii) <i>It shall be so constructed and controlled that, during the progress of voting, it shall preclude every person from seeing or knowing the number of votes theretofore registered for any candidate or question; and it shall preclude every person from tampering with the tabulating element.</i></p> <p>(iv) <i>If the number of choices recorded for any office or on any question exceeds the number for which the voter is entitled to vote, it shall reject all choices recorded on the ballot for that office or question, provided, that if used during the period of voting it may also have the capacity to indicate to a voter that he has improperly voted for more candidates for any office than he is entitled to vote for, and in such case it shall have the capacity to permit the voter to mark a new ballot or to forego his opportunity to make such correction.</i></p> <p>(v) <i>It shall be equipped with an element which generates a printed record at the beginning of its operation which verifies that the tabulating elements for each candidate position and each question and the public counter are all set to zero and with an element which generates a printed record at the finish of its operation of the total number of voters whose ballots have been tabulated, the total number of votes cast for each candidate whose name appears on the ballot, and the total number of votes cast for, or against, any question appearing on the ballot.</i></p> |
| <b>Test Objective:</b> To determine if the voting device has a public counter, does not allow the reopening of the polls, and supplies a zero proof and tally report.  | <b>Test Configuration:</b> Precinct tabulation device configured as described for normal election day operation by Pennsylvania procedures and/or the device manufacturer. This includes all security locks and seals.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

The system shall provide for a permanent physical record of each vote cast.</i></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>PA ST 25 P.S. § 3031.17 Requirements:</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <p><i>The county board of elections, as part of the computation and canvass of returns, shall conduct a statistical recount of a random sample of ballots after each election using manual, mechanical or electronic devices of a type different than those used for the specific election. The sample shall include at least two (2) per centum of the votes cast or two thousand (2,000) votes whichever is the lesser..</i></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Test Objective:</b><br>This area of testing will focus on the system being able to perform a general and a closed primary from ballot design to reporting of results.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Test Configuration:</b><br>The system integration testing will execute a general and a primary election from ballot design through vote accumulation, consolidation and reporting. The election definitions will include all supported voting variations, languages, multiple ballot styles, and ADA voting. Two election definitions will be defined and executed according to a predefined voting pattern. All requirements tested in the targeted functionality testing will be monitored including accuracy throughout system integration testing.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Test Method:</b><br>The method for testing these requirements is defined as follows: <p>Provide an election definition that contains multiple ballot styles based on geographical subdivision in both a general election and a closed primary and tests that each vote is counted only once.</p> <p>Two elections will be utilized to perform System Integration Testing:</p> <ul style="list-style-type: none"> <li>• PA Certification General Election</li> <li>• PA Certification Closed Primary Election</li> </ul> <p>This test will be performed by evaluating the system from the pre-voting state of loading the media and obtaining pre-voting reports through the post-voting state of accumulation of voted data and printing of post-election reports. All documented steps will be followed to perform this test.</p> <ul style="list-style-type: none"> <li>• Election definition and ballot layout coded prior to test</li> <li>• Print pre-election report for ballot layout, precinct summary, and election summary</li> <li>• Load election media</li> <li>• Install election onto the precinct tabulation device</li> <li>• Open polls and print zero proof report</li> </ul> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

- Vote pre-defined voting pattern
- Closed polls and print results tapes
- Print audit logs
- Perform a 10% statistical sample
- Harvest permanent physical record
- Load election results into EMS
- Print precinct summary and election summary reports
- Collect and analyze all data

**Criteria for Evaluation of the Test Results:**

All intended selection input by the tester are recorded, stored and reported accurately.

**25 P.S. § 3031.5. Examination and approval of electronic voting systems by the Secretary of the Commonwealth**

*(a) Any person or corporation owning, manufacturing or selling, or being interested in the manufacture or sale of, any electronic voting system, may request the Secretary of the Commonwealth to examine such system if the voting system has been examined and approved by a federally recognized independent testing authority and if it meets any voting system performance and test standards established by the Federal Government. The costs of the examination shall be paid by the person requesting the examination in an amount set by the Secretary of the Commonwealth. Any ten or more persons, being qualified registered electors of this Commonwealth, may, at any time, request the Secretary of the Commonwealth to reexamine any electronic voting system theretofore examined and approved by him. Before any reexamination, the person, persons, or corporation, requesting such reexamination, shall pay to the Treasurer of the Commonwealth a reexamination fee of four hundred fifty dollars (\$450). The Secretary of the Commonwealth may, at any time, in his discretion, reexamine any such system therefore examined and approved by him. The Secretary of the Commonwealth may issue directives or instructions for implementation of electronic voting procedures and for the operation of electronic voting systems.*
