## 1.0 INTRODUCTION

### 1.1 Scope

A re-examination of the Dominion Voting Systems AVC Advantage 10 Voting System and WinEDS 3.1.074 (hereafter referred to as “AVC Advantage 10 Voting System”) was performed per the direction of the Secretary of the Commonwealth, acting through the Pennsylvania Department of State, Bureau of Commissions, Elections and Legislation. This Test Report documents the procedures followed, the results obtained, and the conclusions drawn from that re-examination.

### 1.2 Objective

The objective of the re-examination was to examine the AVC Advantage 10 Voting System, previously certified for use in the Commonwealth of Pennsylvania on November 3, 2006, to determine whether the system remains compliant with the requirements of Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 – 3031.22, and to document compliance through the execution of single thread test cases where applicable.

### 1.3 References

The documents listed below were utilized in the development of the Test Report:

- Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 – 3031.22
- Federal Election Commission 2002 Voting Systems Standards
- Help America Vote Act (HAVA) of 2002, Public Law 107-252, 42 U.S.C. § 15301 *et seq.*
- Pro V&V Test Protocol for Re-Examination of Dominion Voting Systems AVC Advantage 10 and WinEDS 3.1.074 Voting System
- Sequoia Voting Systems AVC Advantage 10 System Overview, Version 1.02, dated July 2006

### 1.4 Terms and Abbreviations

Term	Abbreviation	Definition
Americans with Disabilities Act	ADA	Americans with Disabilities Act of 1990 is a law enacted by the United States Congress to prohibit discrimination based on disability.
Commercial Off-The-Shelf	COTS	Commercial, readily available hardware or software.
Direct Recording Electronic	DRE	An electronic voting system that utilizes electronic components for the functions of ballot presentation, vote capture, vote recording and tabulation which are logically and physically integrated into a single unit.

Term	Abbreviation	Definition
Election Management System	EMS	Set of processing functions and databases within a voting system that defines, develops and maintains election databases, performs election definitions and setup functions, formats ballots, counts votes, consolidates and reports results, and maintains audit trails.
Federal Election Commission	FEC	Commission created in 1975 to regulate the campaign finance legislation in the United States.
Independent Testing Authority	ITA	Independent testing organizations accredited by the National Association of State Election Directors (NASD) to perform voting system qualification testing.
Technical Data Package	TDP	Manufacturer's documentation related to the voting system required to be submitted with the system as a precondition for certification.
Federal Election Commission 2002 Voting System Standards	VSS	Voluntary guidelines published by the FEC, the second iteration of national level voting system standards.

## 2.0 SYSTEM OVERVIEW AND IDENTIFICATION

The AVC Advantage 10 is a DRE voting machine that is comprised of the following components:

- Main CPU  
An embedded AMD Elan SC400 based system running ROM-DOS.
- I/O Processor  
The original Z80 CPU. It manages I/O devices and communicates via a dedicated serial port with the Main CPU.
- Voter Panel  
Contains all of the selection and display devices for the voter, including: an array of switches to select candidates, write-in module, cast vote switch, and a booth light. Provides a full-face ballot presentation for the voter, with up to 504 voting positions. A printed overlay is used to indicate each contest and candidate, and to provide instructions as desired by the jurisdiction. A Mylar sheet is secured on top of the printed overlay to protect it. Contains all the selection and display devices
- Operator Panel  
Contains all the selection and display devices for the maintenance or poll worker, including: switches and LEDs to select and display options, LCD message display, and indicators for power and low battery.
- Power supply.
- Report printer.

The AVC Advantage 10 Voting System performs the following functions:

- Validate and load ballot definitions.
- Perform pre-election testing and verifications.
- Perform election-day voting.
- Perform post-election testing and verifications.
- Print Zero Proof and Results Reports.
- Perform maintenance diagnostic tests and functions such as Audit Trail Transfer, Set Time/Date, and print the Event Log report.

WinEDS is a client/server application developed specifically for election management. The system has been designed to support single input of customer profile data such as voting locations, precincts, political subdivisions, offices, and parties, and use the data to simultaneously manage multiple elections by multiple users. The system also supports the use of multiple voting systems within any given election. For the AVC Advantage 10 Voting System, WinEDS is a client/server application to design and print ballots as well as tally cartridges.

## 2.1 Software

The software listed in Table 2.1 was used during the examination of the AVC Advantage 10 Voting System. Table 2.1 provides the component name, software/firmware version and a SHA-1 Hash, if calculated, during the re-examination.

**Table 2.1 Software**

<b>Component Name</b>	<b>Version</b>	<b>Unique Identifier (digital signature or hash value)</b>
Advantage Firmware	10.3.5	fc7ef29747563f12de4fc849def9d51b644a375d – SHA1
I/O Firmware	10.3	108fc7dd7217166035403fe34da6af8e79735aa0 –SHA1
WinEDS	3.1.074	Not Calculated

## 2.2 Hardware

Table 2.2 provides hardware component name, model number, and serial number for the units that were examined.

**Table 2.2 Hardware**

<b>Component Name</b>	<b>Model Number</b>	<b>Serial Number(s)</b>	<b>Description</b>
AVC Advantage	D-10	11612, 11613, 11615	A DRE voting machine.
Audio Voting Accessory	Audio Box, Rev C	---	Optional audio voting interface.

## 2.3 Peripherals

Table 2.3 provides the peripheral components used during the re-examination.

**Table 2.3 Peripherals**

<b>Part Name</b>	<b>Model Number</b>	<b>Description</b>
Cartridges	COTS Read/Write PCMCIA card	PC card memory device used for storing and transporting election information, cast vote records, and audit data.
Desktop Printer	Various	COTS Printer to print EMS reports.

## **2.4 Test Support Equipment/Materials**

The test materials listed in Table 2.4 were used during the re-examination.

**Table 2.4 Test Materials**

<b>Part Name</b>	<b>Quantity</b>	<b>Description</b>
8 ½" x 11" paper	Various	EMS report paper
USB Flash drive	1	Sandisk USB 2.0 Cruzer 8 GB

## **3.0 TEST PROCESS**

### **3.1 Background**

The AVC Advantage 10 Voting System was certified for use in the Commonwealth of Pennsylvania on November 3, 2006, after an examination was conducted pursuant to the Pennsylvania Election Code. The AVC Advantage 10 Voting System has been in use by Pennsylvania counties since its initial certification. Pursuant to section 1105-A of the Pennsylvania Election Code, 25 P.S. § 3031.5, a group of Pennsylvania voters formally requested that the Secretary conduct a re-examination of the AVC Advantage 10 Voting System. The Secretary granted the request. Pro V&V, Inc. was contracted to develop test protocols and conduct the re-examination testing to ascertain whether the certified electronic voting system complies with the requirements set forth in the Pennsylvania Election Code.

### **3.2 General Information**

The re-examination of the AVC Advantage 10 Voting System was performed by Jack Cobb of Pro V&V, Inc. (the "Examiner"), per the direction of the Secretary of the Commonwealth, acting through the Pennsylvania Department of State, Bureau of Commissions, Elections and Legislation. The re-examination commenced on March 6, 2012, at the Commonwealth Keystone Building, Hearing Room 1, 400 North Street, Harrisburg, Pennsylvania. The re-examination lasted approximately eight hours.

### **3.3 Test Approach**

To achieve the objective of this re-examination, the Examiner separated the requirements of Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 – 3031.22, into four main areas of test execution: (1) Review; (2) Targeted Functionality; (3) System Integration; and (4) Penetration Analysis. The "Review" testing consisted of analyzing ITA and other third-party reports for specific tests that satisfied the requirements of the Pennsylvania Election Code and verifying that the AVC Advantage 10 Voting System met those requirements. The "Targeted Functionality" testing sought to ascertain whether the AVC

Advantage 10 Voting System met all of the requirements of the Pennsylvania Election Code that could be met by execution of a single thread test case. The “System Integration” testing sought to ascertain whether the AVC Advantage 10 Voting System met all of the requirements of the Pennsylvania Election Code that could be met by the execution of an entire election. General and closed-primary election definitions were devised and run for the pre-voting, voting, and post-voting functions of the voting system. The “Penetration Analysis” testing sought to ascertain whether the AVC Advantage 10 Voting System met all of the requirements of the Pennsylvania Election Code that could be met by analyzing security procedures and impoundment of ballots. Precinct tabulation devices were installed for delivery to the precinct, and analysis of the security procedures performed. Appendix A (“As Run Test Protocol”) contains the details of the test protocol performed on the AVC Advantage 10 Voting System.

## **4.0 TEST FINDINGS AND RECOMMENDATIONS**

The AVC Advantage 10 Voting System, listed in Section 2.0 of this report, was subjected to the tests summarized in the following paragraphs.

### **4.1 Review**

A review of the ITA reports listed on page 90 of Appendix A was conducted to determine compliance with the following sections of the Pennsylvania Election Code:

- 25 P.S. § 3031.5(a), requiring that a DRE “ha[ve] been examined and approved by a federally recognized independent testing authority” and that it “meet any voting system performance and test standards established by the Federal Government;”
- 25 P.S. § 3031.7(11), requiring that a DRE be “suitably designed for the purpose used, ... constructed in a neat and workmanlike manner of durable material of good quality, ... safely and efficiently useable in the conduct of elections and, with respect to the counting of ballots cast at each district, ... suitably designed and equipped to be capable of absolute accuracy, which accuracy shall be demonstrated to the Secretary of the Commonwealth;”
- 25 P.S. § 3031.7(13), requiring that a DRE, “[w]hen properly operated, records correctly and computes and tabulates accurately every valid vote registered;”
- 25 P.S. § 3031.7(14), requiring that a DRE be “safely transportable;” and
- 25 P.S. § 3031.7(15), requiring that a DRE be “so constructed that a voter may readily learn the method of operating it.”

**Summary Findings:** The test reports submitted by Dominion Voting Systems satisfied the requirements set forth in 25 P.S. § 3031.5(a). The AVC Advantage 10 Voting System was examined and approved by an ITA as meeting the applicable performance and test standards. *See* Software Qualification Test Report Sequoia WinEDS 3.1.074, Rev 1.2 Dated October 17, 2006.

The design requirements of Sections 3031.7(11) and (14) of the Pennsylvania Election Code were met by the documented Product Safety Test in the submitted ITA reports. *See* ITA report Change Release Report of the Sequoia AVC Advantage DRE Voting Machine (Firmware Version 10.3.5) dated September 18, 2006 (citing Wyle Laboratories’ Test report No. 51884-09, “Hardware Qualification testing of the AVC Advantage DRE Voting Machine (Firmware Release 10.1.9),” dated May 24, 2006).

The accuracy requirements of Sections 3031.7(11) and (13) of the Pennsylvania Election Code were met by the documented Accuracy Test submitted in the ITA reports. See page 91 of Appendix A.

Section 3031.7(14) of the Pennsylvania Election Code was met by the combination of documented Hardware Non-Operating Environmental Tests which included: bench handling, vibration, low temperature, high temperature, and humidity. These components tests were designed to test the storage of precinct tabulation devices between elections, as well as transportation between the storage facility and the polling place. Although the test data was not provided directly in the report submitted, the ITA referenced two hardware reports as the basis for acceptance in the federal test campaign. See ITA report Change Release Report of the Sequoia AVC Advantage DRE Voting Machine (Firmware Version 10.3.5) dated September 18, 2006 (citing Wyle Laboratories' Test report No. 51884-09, "Hardware Qualification testing of the AVC Advantage DRE Voting Machine (Firmware Release 10.1.9)," dated May 24, 2006).

The manufacturer did not provide a Summative Usability Report to meet the requirements set forth in 25 P.S. § 3031.7(15). The Examiner, however, did not encounter any issues performing the method of operation for standard voting sessions or ADA voting sessions during execution of the re-examination. Additionally, Department of State staff members were used to input voting data for the system integration area of testing. No operational issues were reported.

By review of the above stated documents, and the certification to the FEC 2002 VSS of the AVC Advantage 10 Voting System, I conclude the AVC Advantage 10 Voting System meets these requirements of the Pennsylvania Election Code.

## **4.2 Targeted Functionality**

As set forth in the Test Protocols published before the re-examination, nine test cases were designed to determine compliance with the requirements of 25 P.S. § 3031.7(1), (2), (3), (4), (5), (7), (10) and (16). The Examiner conducted each of these tests, with necessary modifications as discussed below. The following is a list of the individual test cases and a summary of the results and observations for each test case.

### **Test Case Identifier: 01 – 1107-A(1), 25 P.S. § 3031.7(1) Voter Secrecy (Regular Voter):**

This test case was designed to test for compliance with 25 P.S. § 3031.7(1), requiring that a DRE "provides for voting in absolute secrecy and prevents any person from seeing or knowing for whom any voter, except one who has received or is receiving assistance as prescribed by law, has voted or is voting." This test case required observation of voter input from a distance that is considered public space for a DRE in the standard voting position. Three different observation positions were used to observe what, if any, voter inputs could be seen.

**Summary Finding:** No issues or anomalies were noted during the execution of this test case. The actual results obtained during execution met the expected results. The objective criteria for evaluation were analyzed and the system met the criteria. Any jurisdiction using the AVC Advantage 10 Voting System should follow Directive 4 of "Directive Concerning the Use, Implementation and Operation of Electronic Voting Systems by the County Board of Elections," dated April 28, 2009, and issued by the Secretary of the Commonwealth. In my opinion, the AVC Advantage 10 Voting System, if setup per Directive 4, can provide for secrecy so that no person can see whom any voter has voted for, thus meeting the requirement of the Election Code.

**Test Case Identifier: 01 – 1107-A(1), 25 P.S. § 3031.7(1) Voter Secrecy (ADA Voter):**

This test case was designed to determine whether audible and visual voter input from a distance that is considered public space for a DRE in the ADA position could be observed by a third-party. Before test execution, it was determined that the examination room's size and acoustics were invalid for the audio portion of the test (only visual observations were recorded).

**Summary Finding:** No issues or anomalies were noted during the execution of this test case. The actual results obtained during execution met the expected results. The objective criteria for evaluation were analyzed and the system met the criteria. Any jurisdiction using the AVC Advantage 10 Voting System should follow Directive 4 of "Directive Concerning the Use, Implementation and Operation of Electronic Voting Systems by the County Board of Elections," dated April 28, 2009, and issued by the Secretary of the Commonwealth. In my opinion, the AVC Advantage 10 Voting System, if setup per Directive 4, can provide for secrecy so that no person can see whom any ADA voter has voted for, thus meeting the requirement of the Election Code.

**Test Case Identifier: 02 – 1107-A(2), 25 P.S. § 3031.7(2) Selection of Candidates and Questions by Voter (Regular/ADA):**

This test case was designed to test for compliance with 25 P.S. § 3031.7(2), requiring that a DRE "provides facilities for voting for such candidates as may be nominated and upon such questions as may be submitted." This test case ensures a vote for a candidate for "1 of 1," "N of M," and "Question" contests could be recorded and reported as input for a standard voting session and an ADA voting session.

**Summary Finding:** No issues or anomalies were noted during the execution of this test case. The AVC Advantage 10 Voting System successfully recorded and reported votes for "1 of 1," "N of M," and "Question" contests for both a standard voting session and an ADA voting session. The actual results obtained during execution met the expected results. See page 66 of Appendix A. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude that the AVC Advantage 10 Voting System meets the requirements of Section 3031.7(2) of the Pennsylvania Election Code.

**Test Case Identifier: 03 – 1107-A(3), 25 P.S. § 3031.7(3) StraightParty and Pennsylvania Method:**

This test case was designed to test for compliance with 25 P.S. § 3031.7(3), which requires that a DRE allow a voter to perform straight-party voting according to the "Pennsylvania Method." This test case was designed to ensure that a straight-party selection and the Pennsylvania Method of straight-party voting could be recorded and reported as input for a standard voting session and an ADA voting session.

**Summary Finding:** No issues or anomalies were noted during the execution of this test case. During the execution of this test case, the AVC Advantage 10 Voting System successfully recorded and reported straight-party votes and demonstrated the Pennsylvania Method of straight-party voting for both a standard voting session and an ADA voting session. The actual results obtained during execution met the expected results. See page 68 of Appendix A. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude that the AVC Advantage 10 Voting System meets the requirements of Section 3031.7(3) of the Pennsylvania Election Code.

**Test Case Identifier: 04 – 1107-A(4), 25 P.S. § 3031.7(4) Straight-Party and Write-In:**

This test case was designed to test for compliance with 25 P.S. § 3031.7(4), which requires that a DRE permit a voter to vote for a candidate of his or her choice through a straight-party or write-in voting. This test case ensures that both a straight-party and write-in selection could be recorded and reported as input for a standard voting session and an ADA voting session.

**Summary Finding:** No issues or anomalies were noted during the execution of this test case. During the execution of this test case, the AVC Advantage 10 Voting System successfully recorded and reported straight-party and write-in votes for both a standard voting session and an ADA voting session. The actual results obtained during execution met the expected results. *See* page 72 of Appendix A. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude the AVC Advantage 10 Voting System meets the requirements of Section 3031.7(4) of the Pennsylvania Election Code.

**Test Case Identifier: 05 – 1107-A(5), 25 P.S. § 3031.7(5) Selection of Candidate and Write-in:**

This test case was designed to test for compliance with 25 P.S. §3031.7(5), which requires that a DRE permit a voter to vote for any candidate or write-in a candidate. This test case ensures that a candidate and write-in selection could be recorded and reported as input for a standard voting session and an ADA voting session.

**Summary Finding:** No issues or anomalies were noted during the execution of this test case. During the execution of this test case the AVC Advantage 10 Voting System successfully recorded and reported candidate selections and write-in votes for both a standard voting session and an ADA voting session. The actual results obtained during execution met the expected results. *See* page 75 of Appendix A. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude the AVC Advantage 10 Voting System meets the requirements of Section 3031.7(5) of the Pennsylvania Election Code.

**Test Case Identifier: 07 – 1107-A(7), 25 P.S. § 3031.7(7) Attempt to Over Vote Contests and Questions (Regular/ADA):**

This test case was designed to test for compliance with 25 P.S. §3031.7(7), which requires that a DRE prevent a voter from over voting. This test case ensures that a voter could not over vote for a contest or question during a standard voting session and an ADA voting session.

**Summary Finding:** No issues or anomalies were noted during the execution of this test case. The AVC Advantage 10 Voting System successfully prohibited a voter from selecting more than the number of allowable selections, including write-in votes, for both a standard voting session and an ADA voting session. The actual results obtained during execution met the expected results. *See* page 78 of Appendix A. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude the AVC Advantage 10 Voting System meets the requirements of Section 3031.7(7) of the Pennsylvania Election Code.

**Test Case Identifier: 10 – 1107-A(10), 25 P.S. § 3031.7(10) Ballot Review and Change (Regular/ADA):**

This test case was designed to test for compliance with 25 P.S. § 3031.7(10), which requires that a DRE allow for ballot review and change before casting the ballot. This test case ensures that a

voter can review a voted ballot and make changes before casting the ballot and have a cast ballot input during a standard voting session and an ADA voting session.

**Summary Finding:** No issues or anomalies were noted during the execution of this test case. During the execution of this test case, the AVC Advantage 10 Voting System provided a voter with a review screen and allowed for the voter to return to either the beginning of the ballot or an individual contest to make changes to his or her selections before casting the ballot for both a standard voting session and an ADA voting session. The actual results obtained during execution met the expected results. *See* page 81 of Appendix A. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude the AVC Advantage 10 Voting System meets the requirements of Section 3031.7(10) of the Pennsylvania Election Code.

**Test Case Identifier: 16 – 1107-A(16), 25 P.S. § 3031.7(16) Public Counter, No Re-opening of Polls, Media Security with Tamper Proof Locks and Zero Proof and Tally Reports:**

This test case was designed to test for compliance with 25 P.S. § 3031.7(16), which requires that a DRE have a public counter, have the ability to lock after the polls are closed, provide for voter secrecy, prohibit over votes, and print zero proof and results reports. This test case verifies the display of a public counter. It also ensures that the device provides (a) a lock to prevent tabulation after the polls are closed and to prevent re-opening of the polls, (b) tamper evident locks and seals, and (c) zero proof and results reports.

**Summary Finding:** No issues or anomalies were noted during the execution of this test case. During the execution of this test case the AVC Advantage 10 Voting System provided a public counter that incremented with each cast vote; provided the ability to be locked after the polls were closed; precluded the re-opening of the polls after the polls were closed; provided design features that allow tamper evident locks and seals to be placed on the device (*see* photographs in Section 4.4); and provided zero proof and results reports. The actual results obtained during execution met the expected results. *See* page 84 of Appendix A. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude the AVC Advantage 10 Voting System meets the requirements of Section 3031.7(16) of the Pennsylvania Election Code.

### **4.3 System Integration Testing**

System Integration Testing was performed to test proprietary hardware, software and peripherals, as well as COTS materials configured as a precinct count system. This test meets many of the requirements of the Pennsylvania Election Code that were previously verified in the Targeted Functionality area of testing, but was designed to specifically meet the following sections and requirements:

- 25 P.S. § 3031.1, defining "electronic voting system" to be a "system in which one or more voting devices are used to permit the registering or recording of votes and in which such votes are computed and tabulated by automatic tabulating equipment. The system shall provide for a permanent physical record of each vote cast;"
- 25 P.S. § 3031.7(4), requiring that a DRE "permits each voter, at other than primary elections, to vote a ticket selected from the nominees of any and all political parties, from the nominees of any and all political bodies, and from any persons whose names are not in nomination and do not appear upon the official ballot;"
- 25 P.S. § 3031.7(6), requiring that a DRE "permits each voter to vote for as many persons for any office as he is entitled to vote for and to vote for or against any question upon

which he is entitled to vote and precludes each voter from voting or from having his vote tabulated for any candidate, or upon any question, for whom or upon which he is not entitled to vote;”

- 25 P.S. § 3031.7(8), requiring that a DRE “precludes each voter from voting or from having his vote tabulated more than once for any candidate for the same office or upon any question, except in districts and for offices where cumulative voting is authorized by law;”
- 25 P.S. § 3031.7(9), requiring that a DRE “permits each voter at a primary election to vote only for the candidates seeking nomination by a political party in which such voter is registered and enrolled, and for any candidate for nonpartisan nomination, and for any question upon which he is entitled to vote;” and
- 25 P.S. § 3031.17, requiring that the “county board of elections, as part of the computation and canvass of returns, shall conduct a statistical recount of a random sample of ballots after each election using manual, mechanical or electronic devices of a type different than those used for the specific election. The sample shall include at least two (2) per centum of the votes cast or two thousand (2,000) votes whichever is the lesser.”

Two election definitions, a general and closed primary election, were devised to test and measure specific input devices, voting patterns and results. Pre-voting reports were generated, consisting of a ballot proof report, precinct summary report, and election summary report. The polls were opened, and precinct tabulator zero proof reports were generated. The Examiner and Department of State staff members attempted to input a complex voting pattern consisting of distinct combinations of vote selection as documented in the Test Protocol (*See Appendix A Election Definitions*). The polls were closed, and results reports were generated including cast vote records and ballot images. The voted data was then transferred to the election management system (EMS), and election summary reports, precinct summary reports, and ballot images were printed. At the conclusion of the test, the Examiner conducted a statistical recount of at least 10% of the votes cast using the cast vote records and ballot images. The procedure for conducting the statistical recount was to use the documented voting pattern and compare it to the cast vote records and ballot images. The procedure identified each ballot by the distinct voting pattern that was input. The Examiner also generated a backup of the EMS database and retained a copy with the other test data.

**Summary Finding:** No issues or anomalies were noted during the execution of this test case. The AVC Advantage 10 Voting System successfully completed both the general and closed primary election. The actual results obtained during execution met the expected results. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude the AVC Advantage 10 Voting System meets the requirements of Sections 3031.1 and 3031.17 of the Pennsylvania Election Code in that the system generated a permanent physical record in the format of the cast vote record and ballot images that were used to conduct a statistical recount. The AVC Advantage 10 Voting System also complies with Sections 3031.7(4) and (9) in that test voters in the primary election were only able to vote for their party and the system rejected attempts to vote for non-party candidates. The AVC Advantage 10 Voting System meets the requirements for Sections 3031.7(6) and (8) in that the test voters cast votes on different ballot styles for candidates and questions and the AVC Advantage 10 Voting System precluded test voters from over voting.

#### **4.4 Penetration Analysis**

A penetration analysis was performed to verify compliance with 25 P.S. § 3031.7(12), which requires that a DRE “provides acceptable ballot security procedures and impoundment of ballots to prevent tampering with or substitution of any ballots or ballot cards.”

The precinct tabulation devices were configured for delivery to a polling place from a warehouse; this included all suggested seals and locks recommended by the manufacturer. The Examiner inspected the device for the ability to tamper with the transportation case and the device inside the case. The inspection examined the ports, the outer case, and memory devices from the aspect of the device as delivered to the polling place and configured for voting. The Examiner also examined both the precinct device and the EMS for password management of administrative functions and ensured the system counter cannot be reset by unauthorized persons. The Examiner photographed the configuration and analyzed the configuration for possible vulnerabilities. Photographs 1.1 through 1.3 indicate locks and seals on the precinct tabulation devices.

**Photograph 1.1 lock on the rear of the AVC Advantage D10**

**Photograph 1.2 lock on the voter panel**

**Photograph 1.3 inside the AVC Advantage D10**

**Summary Finding:** No issues or anomalies were noted during the execution of this test case. During the conducting of this analysis, the AVC Advantage 10 Voting System provided acceptable ballot security procedures and impoundment of ballots to prevent tampering with or substitution of any ballots or ballot cards. It also provided acceptable password management and restriction of access to administrative functions. Therefore, I conclude the AVC Advantage 10 Voting System meets the requirements of Section 3031.7(12) of the Pennsylvania Election Code.

## **5.0 CERTIFICATION FOR USE**

The AVC Advantage 10 Voting System, certified for use in the Commonwealth of Pennsylvania and presented for re-examination, meets the requirements of Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 – 3031.22. As the examiner, I recommend the voting system documented in Section 2.0 of this report remain certified for use in the Commonwealth of Pennsylvania.

## **1.0 INTRODUCTION**

The primary purpose of the re-examination is to confirm that the Dominion Voting Systems AVC Advantage 10 Voting System and WinEDS 3.1.074 meets the requirements of Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 – 3031.22. This re-examination is being performed per the direction of the Secretary of the Commonwealth, acting through the Pennsylvania Department of State, Bureau of Commissions, Elections and Legislation. This re-examination will commence on March 6, 2012, at the following location:

Commonwealth Keystone Building  
Hearing Room 1  
400 North Street  
Harrisburg, Pennsylvania

The daily duration of this re-examination will be from 9:00 A.M. until 5:00 P.M. Eastern Standard Time unless a representative of the Secretary of the Commonwealth requests an extension, suspension, or a halt in testing.

## **1.0 References**

The documents listed below were used in the development of the Test Protocol.

## **1.1 Terms and Abbreviation**

*This subsection lists terms and abbreviations relevant to this re-examination*

“ADA” – Americans with Disabilities Act

“COTS” – Commercial Off-The-Shelf

“Department” – Pennsylvania Department of State

“DRE” – Direct Recording Electronic

“EAC” – Election Assistance Commission

“EMS” – Election Management System

“Examiner” – The examiner appointed by the Secretary of the Commonwealth to conduct the re-examination

“FEC” – Federal Election Commission

“ITA” – Independent Testing Authority

“PA” – The Commonwealth of Pennsylvania

“Pennsylvania Election Code” - Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 – 3031.22

“Secretary” – The Secretary of the Commonwealth

“TDP” – Technical Data Package

“VSS” – Federal Election Commission 2002 Voting System Standards

“VVSG” – Election Assistance Commission 2005 Voluntary Voting System Guidelines

## **1.2 Background**

The Dominion Voting Systems AVC Advantage 10 Voting System and WinEDS 3.1.074 were certified for use in the Commonwealth of Pennsylvania on May 2, 2006, after an examination conducted pursuant to the Pennsylvania Election Code. The Sequoia AVC Advantage 10 and WinEDS have been in use by Pennsylvania counties since their initial certification. Pursuant to section 1105-A of the Pennsylvania Election Code, 25 P.S. § 3031.5, a group of Pennsylvania voters formally requested that the Secretary conduct a re-examination of the Dominion AVC Advantage 10. The Secretary granted the request.

The Test Protocol was developed to ascertain whether the certified electronic voting system complies with the requirements set forth in the Pennsylvania Election Code.

## **2.0 TEST ITEMS**

*This section contains detailed descriptions of the items tested during the re-examination, including all software, hardware, and peripherals, both proprietary and COTS, and any test support equipment or materials necessary for test performance. The following diagram illustrates the Dominion AVC Advantage 10 requirements.*

### **2.1 Software**

*This subsection contains a listing of the software and firmware being evaluated.*

**Table 2.1 Software**

<b>Component Name</b>	<b>Version</b>	<b>Unique Identifier (digital signature or hash value)</b>
Advantage Firmware	10.3.5	TBD
I/O Firmware	10.3	TBD
WinEDS	3.1.074	TBD

## 2.2 Hardware

*This subsection contains a listing of the hardware being evaluated.*

**Table 2.2 Hardware**

Component Name	Model Number	Revision Number	Description
AVC Advantage	D-10	N/A	<p>A Direct Record Electronic voting machine is comprised of the following components:</p> <p><u>Main CPU</u> An embedded AMD Elan SC400 based system running ROM-DOS.</p> <p><u>I/O Processor</u> The original Z80 CPU. It manages I/O devices and communicates via a dedicated serial port with the Main CPU.</p> <p><u>Voter Panel</u> Contains all the selection and display devices for the voter, including: an array of switches to select candidates, write-in module, cast vote switch, and a booth light.</p> <p><u>Operator Panel</u> Contains all the selection and display devices for the maintenance or poll worker, including: switches and LEDs to select and display options, LCD message display, and indicators for power and low battery.</p> <p>As well as a power supply and report printer.</p>
Audio Voting Accessory	Audio Box	Rev C	Optional audio voting interface.

## 2.3 Peripherals

*This subsection contains detailed descriptions of optional equipment used by the system being evaluated.*

**Table 2.3 Peripherals**

Part Name	Model Number	Revision Number	Description
Cartridges	COTS Read/Write PCMCIA card	N/A	PC card memory device used for storing and transporting election information, cast vote records, and audit data.
Desktop Printer	Various	N/A	COTS Printer to print EMS reports

## 2.4 Test Support Equipment/Materials

*This subsection contains detailed descriptions of the test support equipment and materials needed to perform the required testing.*

The Examiner will provide a tape measure (to be used in Test Case 1), Test Execution Logs, and a digital camera for test documentation. The re-examination will be video recorded by the Department.

The voting system manufacturer must provide an EMS system currently certified for use in Pennsylvania loaded with the closed primary and general-election definitions (Appendix A). These election definitions are the ballot configurations that will be used throughout the re-examination. The manufacturer is responsible for providing the Department and the Examiner with technical staff to support the re-examination. The manufacturer must provide three precinct-tabulation devices for each voting system being examined. The manufacturer must be prepared to load the firmware for each precinct tabulation device. The Department will also require manufacturer to configure the precinct tabulation devices as they would be in the precinct on Election Day, including seals and locks. The manufacturer must be prepared to print pre-election reports, precinct results reports, audit logs, and post-election reports.

## 3.0 TEST MATERIALS

*This section contains a detailed description of all materials made available to Examiner for the re-examination.*

### 3.1 Technical Data Package

*This subsection lists all manufacturer provided documentation that is relevant to the system being tested.*

#### **4.0 TEST SPECIFICATIONS**

*This section contains a detailed description of the procedures to be followed during test setup and preparation.*

The re-examination of the voting system will occur in an environmentally controlled room. The room will be configured such that the Department, the Examiner, and the voting system manufacturer have their own independent work areas. The public will be allowed to observe the examination, but may not comment or interact with either the employees of the Department, the Examiner, or the voting system manufacturer, at any time. The manufacturer will be allotted time and space to stage the voting system prior to the re-examination. This time and space will be determined between the Department and the manufacturer in advance of the examination date. Once the manufacturer informs the Department that the voting system is properly set up, the Examiner will provide the manufacturer with the firmware/software for the precinct tabulation device, submitted to the Department from the trusted source. The manufacturer will load the firmware/software on to the required media for installation onto the precinct tabulation device and install the firmware/software onto the precinct tabulation device before commencement of the re-examination. Once each precinct tabulation device is loaded with the firmware/software, the manufacturer will not be allowed access to the internal components of the devices without the consent of the Department or the Examiner. If the re-examination is suspended, the precinct tabulation devices will be secured in a manner to ensure control of the test environment. If, at any point, the Department or the Examiner determines that the control of the test environment has been compromised, all firmware/software will be reloaded on the precinct tabulation devices.

The voting system manufacturer shall set up the precinct tabulation devices as they would be in the precinct on Election Day, minus the locks and seals. The locks and seals will be installed and evaluated at a later time in the re-examination.

The Examiner will maintain photographic and written documentation of the re-examination. This will include, but is not limited to, photographs of the firmware/software installation, test execution notes and observations, photographs of the test setup, and collection of test data. The Department will video record the re-examination.

#### **5.0 TEST PROCEDURES**

*This section contains a detailed description of the test sequence, test procedures and expected results.*

The test cases for this re-examination are contained in Appendix B of this Test Protocol. All steps of the tests cases contain an expected result to provide objective pass/fail criteria. There are no dependencies for execution of the test cases. The test cases have been divided into four main areas for execution: (1) Review; (2) Targeted Functionality; (3) System Integration; and (4) Penetration Analysis. -The Review

area of this re-examination will not be performed on-site during the set dates of the re-examination. The Review area of testing includes documentation review of third-party reports and review of the manufacturer's TDP. All other areas of testing will be performed on-site during the re-examination. The test sequence for this re-examination will be as follows:

**Review:**

- 1107-A(11), 25 P.S. § 3031.7(11) Suitably Designed, Constructed in Workmanlike Manner of Durable Material, Safely and Efficiently Useable, Capable of Absolute Accuracy
- 1107-A(13), 25 P.S. § 3031.7(13) Record Correctly, Computes and Tabulates Accurately
- 1107-A(14), 25 P.S. § 3031.7(14) Safely Transportable
- 1107-A(15), 25 P.S. § 3031.7(15) Voter May Readily Learn to Operate

**Targeted Functionality Test Cases:**

- Test Case Identifier: 01 – 1107-A(1), 25 P.S. § 3031.7(1) Voter Secrecy (Regular Voter)
- Test Case Identifier: 01 – 1107-A(1), 25 P.S. § 3031.7(1) Voter Secrecy (ADA Voter)
- Test Case Identifier: 02 – 1107-A(2), 25 P.S. § 3031.7(2) Selection of Candidates and Questions by Voter (Regular/ADA)
- Test Case Identifier: 03 – 1107-A(3), 25 P.S. § 3031.7(3) Straight Party and Pennsylvania Method
- Test Case Identifier: 04 – 1107-A(4), 25 P.S. § 3031.7(4) Straight Party and Write-In
- Test Case Identifier: 05 – 1107-A(5), 25 P.S. § 3031.7(5) Selection of Candidate and Write-in
- Test Case Identifier: 07 – 1107-A(7), 25 P.S. § 3031.7(7) Attempt to Over Vote Contests and Questions (Regular/ADA)
- Test Case Identifier: 10 – 1107-A(10), 25 P.S. § 3031.7(10) Ballot Review and Change (Regular/ADA)
- Test Case Identifier: 16 – 1107-A(16), 25 P.S. § 3031.7(16) Public Counter, No Reopening of Polls, Media Security with Tamper Proof Locks and Zero Proof and Tally Reports

**System Integration Test Cases:**

- Test Case Identifier: 04, 06, 08, 09, Permanent Physical Record, and Statistical Sample – 1107-A(4), 25 P.S. § 3031.7(4) Enables Voting for Legal Combinations; 1107-A(6), 25 P.S. § 3031.7(6) Permits Voting for as Many Candidates as Entitled, Permits Voting For or Against Questions, Precludes Voting for Unauthorized Candidates or Questions; 1107-A(8), 25 P.S. § 3031.7(8) Precludes Multiple Voting and Tabulating Multiple Votes; 1107-A(9), 25 P.S. § 3031.7(9) Permits Voter at Primary to Vote Only for Candidates in Party of Registration, Any Candidate for Nonpartisan Nomination, and For Any Entitled Question; 1101-A, 25 P.S. § 3031.1 Provides for Permanent Physical Record of Each Vote Cast; and 1117-A, 25 P.S. § 3031.17 Statistical Sample

**Penetration Analysis Test Cases:**

- Test Case Identifier: 12 – 1107-A(12), 25 P.S. § 3031.7(12) Acceptable Ballot Security Procedures and Impoundment of Ballots

## **6.0 TEST DATA**

*This section contains a detailed description of the test election definitions and ballot logic being exercised.*

The election definitions being used for this re-examination are provided in Appendix A of this Test Protocol. A predefined set of election parameters are included in the election definitions. Both the general election and the closed primary election definitions provide the voting variations, geographic subdivisions, parties, supported languages and test voting pattern with results being tested. The only languages required for this re-examination are English and Spanish. The Department provided the Spanish translation. Each test voting pattern provides the input method and device. For all Write-In selections, the name will be input as “John Doe.” For multiple Write-In selections, the name will be appended with the character “I” for the number of Write-In selections (*i.e.*, “John Doe I,” “John Doe II,” “John Doe III,” and “John Doe IIII” in a “Vote for Four” contest with four write-ins).

### **6.1 Data Recording**

*This subsection contains a detailed description of the procedures to be followed during test execution and data collection.*

All test data produced during this re-examination is the property of the Department. The output test data will be collected and stored in an appropriate manner as to allow for data analysis. Actual results from executed tests will be recorded in real-time in Test Execution Logs.

### **6.2 Data Evaluation**

The Examiner will evaluate all test results against the expected results set forth in the test cases provided in Appendix B. The acceptable range for system performance and the expected results is derived from the test designers experience and expertise. If an expected result is not achieved, an evaluation will be performed as to “why” the test or test step did not produce the expected results. This evaluation will consider test error, invalid expectations, and system performance. Failure to achieve the expected results does not constitute a test failure. A test failure only occurs when the “Criteria for Evaluation of Test Results,” as set forth in the test cases, are not achieved for a specific test.

## **APPENDIX A - ELECTION DEFINITIONS**

### Election Definition: Pennsylvania Certification Closed Primary Election

#### Primary Election Description:

A closed primary election for 2 parties in 3 precincts. This election contains 35 contests compiled into 6 ballot styles. Each ballot style contains 15 contests. The voting variations supported in a primary election by the Commonwealth of Pennsylvania are defined in this election. The voting variations are as follows:

- Partisan contest
- Non-Partisan
- Primary Presidential delegation nominations
- Write-In voting
- N of M Contest
- Cross-Party Filed Candidates

This closed primary election was designed to functionally test the handling of multiple ballot styles across geographical subdivisions, support for two languages, and support for common primary specific voting variations.

#### Configuration:

**EMS computer loaded with software certified for use in Pennsylvania to create the following configuration:**

**Name:** Pennsylvania Certification Closed Primary Election

**Voting Devices:** 1 machine for each precinct

**Precincts:** Precinct 1, Precinct 2, Precinct 3

**Parties:** Republican, Democrat

**Languages:** English, Spanish

**Totals Contests:** 35

**Contests as follows:**

### **Election Definition: Pennsylvania Certification General Election**

#### **General Election Description:**

A general election combining presidential year contests, non-presidential year contests, and municipal contests into a single election held in 3 precincts one of which is a split precinct on the “Representative in the General Assembly” contests. This election contains 21 contests compiled into 4 ballot styles (excluding language styles). 15 of the contests are in all ballot styles. The other 6 are split between at least 2 of the precincts with a maximum of 21 different contests spread across the 3 precincts. All voting variations supported by the Commonwealth of Pennsylvania are defined in this election. The voting variations are as follows:

- Partisan contest
- Non-Partisan contest
- N of M contest
- Referendum contest
- Retention Contest
- Straight Party voting
- Write-In voting
- Split Precinct
- Cross-Party Nominated

This general election was designed to functionally test the handling of multiple ballot styles across geographical subdivisions, support for English and Spanish languages, support for all Pennsylvania voting variations, and audio support for English and Spanish.

#### **Configuration:**

**EMS computer loaded with software certified for use in Pennsylvania to create the following configuration:**

**Name:** Pennsylvania Certification General Election

**Voting Devices:** 1 machine for each precinct

**Precincts:** Precinct 1, Precinct 2 split into 2a and 2b, Precinct 3

**Parties:** Republican, Democratic, Green, Libertarian

**Languages:** English, Spanish

**Totals Contests:** 21

**Contests as follows:**

## **APPENDIX B - TEST CASES**

<b>Test Case Identifier:</b> 01 – 25 P.S. § 3031.7(1) Voter Secrecy (ADA Voter)	
<b>PA ST 25 P.S. § 3031.7 Requirement:</b>	<i>(1) Provides for voting in absolute secrecy and prevents any person from seeing or knowing for whom any voter, except one who has received or is receiving assistance as prescribed by law, has voted or is voting.</i>
<b>Test Objective:</b> To determine if a voters selections input using an ADA device can be observed during the act of voting, or once a vote has been cast.	<b>Test Configuration:</b> Precinct tabulation device configured as described for normal election day operation by Pennsylvania procedures and or the device manufacturer for an ADA voter. A marker is placed 12 feet (measured from the lowest point of the devices voting surface to the floor) directly behind the center of the voting device. From that marker, another marker is placed 12 feet to the right side and the left side. The side distance observation points should be approximately 17 feet. See Step 1000 for a layout diagram. The ADA voter will be positioned in the center of the tabulation device with a site line of 4 feet. See Step 1001.
<b>Test Equipment:</b>	Standard 15+ foot tape measure
<b>Special Procedural Requirements:</b>	Two roles are required for this test case. An ADA Voter role and an observer role. The ADA voter will be positioned with a line of site at 48 inches. The observation must be made by an individual between the heights 68 inches and 71 inches.
<b>Assumptions:</b>	An election is loaded on the device and the polls are open, ready for voting.
<b>Step</b>	<b>Description</b>
<b>1000</b>	<p>Layout Diagram:</p> <p>Verify all measurements.</p> <p><i>Expected:</i> Center measurement is 12 feet and the side distance observation points are approximately 17 feet.</p> <p><i>Actual:</i> Measured 12 feet.</p>
<b>1001</b>	<p>ADA Voter Position:</p>

	<p>Verify all measurements.</p> <p><i>Expected:</i> Center measurement is 12 feet and the side distance observation points are approximately 17 feet with a voter line of sight at 48 inches.</p> <p><i>Actual:</i> Measured line of site at 48 inches.</p>
<b>1010</b>	<p>Observer Role - Activate a ballot for ADA voting.</p> <p><i>Expected:</i> Ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> Ballot is presented and vote selections can be input.</p>
<b>1020</b>	<p>ADA Voter Role - Select the candidate corresponding to the upper most left hand position of the ballot presentation.</p> <p>Observer Role - Attempt to ascertain visually, the voters input from the right most position, the center position, and the left most position</p> <p>ADA Voters Role - Use the supplied method to advance the ballot to a cast vote state. The only selection should be the upper most left hand position. All other selections are to be under voted.</p> <p><i>Expected:</i> The Observer cannot determine the Voter's input selections.</p> <p><i>Actual:</i> Observer reported no observations.</p>
<b>1030</b>	<p>ADA Voter Role - Select the candidate corresponding to the upper most right hand position of the ballot presentation.</p> <p>Observer Role - Attempt to ascertain, both audibly and visually, the voters input from the right most position, the center position, and the left most position</p> <p>ADA Voters Role - Use the supplied method to advance the ballot to a cast vote state. The only selection should be the upper most right hand position. All other selections are to be under voted.</p> <p><i>Expected:</i> The Observer cannot determine the Voter's input selections.</p> <p><i>Actual:</i> Observer reported no observations.</p>
<b>1040</b>	<p>ADA Voter Role - Select the candidate corresponding to the lower most left hand position of the ballot presentation.</p> <p>Observer Role - Attempt to ascertain, both audibly and visually, the voters input from the right most position, the center position, and the left most position</p> <p>ADA Voters Role - Use the supplied method to advance the ballot to a cast vote state. The only selection should</p>

	<p>be the lower most left hand position. All other selections are to be under voted.</p> <p><i>Expected:</i> The Observer cannot determine the Voter's input selections.</p> <p><i>Actual:</i> Observer reported no observations.</p>
<b>1050</b>	<p>ADA Voter Role - Select the candidate corresponding to the lower most right hand position of the ballot presentation.</p> <p>Observer Role - - Attempt to ascertain, both audibly and visually, the voters input from the right most position, the center position, and the left most position</p> <p>ADA Voters Role - Use the supplied method to advance the ballot to a cast vote state. The only selection should be the lower most right hand position. All other selections are to be under voted.</p> <p><i>Expected:</i> The Observer cannot determine the Voter's input selections.</p> <p><i>Actual:</i> Observer reported no observations.</p>
<p><b>Criteria for Evaluation of the Test Results: The observer must not be able to determine the voter's selection from any observation position or any voter selection surface position.</b></p>	

<b>Test Case Identifier:</b> 01 – 25 P.S. § 3031.7(1) Voter Secrecy (Regular Voter)	
<b>PA ST 25 P.S. § 3031.7 Requirement:</b>	<i>(1) Provides for voting in absolute secrecy and prevents any person from seeing or knowing for whom any voter, except one who has received or is receiving assistance as prescribed by law, has voted or is voting.</i>
<b>Test Objective:</b> To determine if a voters selections can be observed during the act of voting, or once a vote has been cast.	<b>Test Configuration:</b> Precinct tabulation device configured as described for normal election day operation by Pennsylvania procedures and or the device manufacturer. A marker is placed 12 feet (measured from the lowest point of the devices voting surface to the floor) directly behind the center of the voting device. From that marker, another marker is placed 12 feet to the right side and the left side. The side distance observation points should be approximately 17 feet. See step 1000 for a layout diagram.
<b>Test Equipment:</b>	Standard 15+ foot tape measure
<b>Special Procedural Requirements:</b>	Two roles are required for this test case. A Voter role and an observer role. The observation must be made by an individual between the heights of 5 feet 8 inches and 5 feet 11 inches.
<b>Assumptions:</b>	An election is loaded on the device and the polls are open, ready for voting.
<b>Step</b>	<b>Description</b>
<b>1000</b>	<p>Layout Diagram:</p> <p>Verify all measurements.</p> <p><i>Expected:</i> Center measurement is 12 feet and the side distance observation points are approximately 17 feet.</p> <p><i>Actual:</i> Measured 12 feet.</p>
<b>1010</b>	<p>Observer Role - Activate a ballot for regular voting.</p> <p><i>Expected:</i> Ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot is presented and vote selections can be input.</p>
<b>1020</b>	<p>Voter Role - Select the candidate in the upper most left hand position of the ballot presentation.</p> <p>Observer Role - Attempt to ascertain, both audibly and visually, the voters input from the right most position, the center position, and the left most position</p> <p>Voters Role - Use the supplied method to advance the ballot to a cast vote state. The only selection should be the upper most left hand position. All other selections are to be under voted.</p>

	<p><i>Expected:</i> The Observer cannot determine the Voter's input selections.</p> <p><i>Actual:</i> Observer reported no observations.</p>
<b>1030</b>	<p>Voter Role - Select the candidate in the upper most right hand position of the ballot presentation.</p> <p>Observer Role - Attempt to ascertain, both audibly and visually, the voters input from the right most position, the center position, and the left most position</p> <p>Voters Role - Use the supplied method to advance the ballot to a cast vote state. The only selection should be the upper most right hand position. All other selections are to be under voted.</p> <p><i>Expected:</i> The Observer cannot determine the Voter's input selections.</p> <p><i>Actual:</i> Observer reported no observations.</p>
<b>1040</b>	<p>Voter Role - Select the candidate in the lower most left hand position of the ballot presentation.</p> <p>Observer Role - Attempt to ascertain, both audibly and visually, the voters input from the right most position, the center position, and the left most position</p> <p>Voters Role - Use the supplied method to advance the ballot to a cast vote state. The only selection should be the lower most left hand position. All other selections are to be under voted.</p> <p><i>Expected:</i> The Observer cannot determine the Voter's input selections.</p> <p><i>Actual:</i> Observer reported no observations.</p>
<b>1050</b>	<p>Voter Role - Select the candidate in the lower most right hand position of the ballot presentation.</p> <p>Observer Role - Attempt to ascertain, both audibly and visually, the voters input from the right most position, the center position, and the left most position</p> <p>Voters Role - Use the supplied method to advance the ballot to a cast vote state. The only selection should be the lower most right hand position. All other selections are to be under voted.</p> <p><i>Expected:</i> The Observer cannot determine the Voter's input selections.</p> <p><i>Actual:</i> Observer reported no observations.</p>
<p><b>Criteria for Evaluation of the Test Results: The observer must not be able to determine the voter's selection from any observation position or any voter selection surface position.</b></p>	

<b>Test Case Identifier:</b> 02 – 25 P.S. § 3031.7(2) Selection of Candidates and Questions by Voter (Regular/ADA)	
<b>PA ST 25 P.S. § 3031.7 Requirement:</b>	(2) Provides facilities for voting for such candidates as may be nominated and upon such questions as may be submitted.
<b>Test Objective:</b> To determine if a voter has the ability to select candidates and questions.	<b>Test Configuration:</b> Precinct tabulation device configured as described for normal election day operation by Pennsylvania procedures and/or the device manufacturer.
<b>Test Equipment:</b>	None
<b>Special Procedural Requirements:</b>	None
<b>Assumptions:</b>	An election is loaded on the device and the polls are open, ready for voting.
<b>Step</b>	<b>Description</b>
<b>1000</b>	<p>Activate a ballot for voting</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The Ballot was presented.</p>
<b>1010</b>	<p>Select the first candidate in the first partisan contest excluding a straight party contest.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for the first candidate in the first partisan contest excluding a straight party contest.</p> <p><i>Actual:</i> Selection was made for James Collins.</p>
<b>1020</b>	<p>Use the designated method to advance the ballot to the first “N of M” contest. Select the first “N” candidates in the contest. (e.g. in a Vote for Two contest the first two candidates would be selected).</p> <p><i>Expected:</i> The precinct tabulation device advances to the first “N of M” contest. Once selected the precinct tabulation device displays or provides an indication of a vote for the first “N” candidates in the first “N of M” contest.</p> <p><i>Actual:</i> Selections were made for Mary L. Daniel and Jack “Duke” Brodisky.</p>
<b>1030</b>	<p>Use the designated method to advance the ballot to the first “Question” contest. Select the “Yes” option in the contest.</p> <p><i>Expected:</i> The precinct tabulation device advances to the first “Question” contest. Once selected the precinct tabulation device displays or provides an indication of a vote selection for the “Yes” option in the first “Question” contest.</p> <p><i>Actual:</i> Selection was made of “Yes”.</p>
<b>1040</b>	<p>Use the designated method to advance the ballot to the second “Question” contest. Select the “No” option in the contest.</p> <p><i>Expected:</i> The precinct tabulation device advances to the second “Question” contest. Once selected the precinct tabulation device displays or provides an indication of a vote selection for the “No” option in the second “Question” contest.</p>

	<i>Actual:</i> Selection was made for “No”.
<b>1050</b>	<p>Use the designated method to advance the “Ballot Review”. Observe the “Ballot Review” to see if the above selections are displayed. Use the designated method to cast the voted selections.</p> <p><i>Expected:</i> The precinct tabulation device advances to the “Ballot Review” screen. After review and ballot is cast successfully.</p> <p><i>Actual:</i> Ballot was cast successfully for all selections.</p>
<b>1060</b>	<p>Repeat steps 1000- 1050 from above using an ADA input device.</p> <p><i>Expected:</i> Repeat 1000 <u>  X  </u>  Repeat 1010 <u>  X  </u>  Repeat 1020 <u>  X  </u>  Repeat 1030 <u>  X  </u>  Repeat 1040 <u>  X  </u>  Repeat 1050 <u>  X  </u></p> <p><i>Actual:</i> All steps were successfully repeated was audio session.</p>
<b>1070</b>	<p>Close the polls and print the closed polls report tape.</p> <p><i>Expected:</i> The polls closed and a report is printed.</p> <p><i>Actual:</i> The polls closed and report printed.</p>
<b>1080</b>	<p>Review the closed polls report to ensure all selections input above are recorded and reported correctly.</p> <p><i>Expected:</i> The closed polls report presents the accumulated totals for the selections input above.</p> <p><i>Actual:</i> All selections were accurately reported on the results report.</p>
<b>Criteria for Evaluation of the Test Results:</b> The intended selections input above are recorded, stored, and reported as input by the tester.	

<b>Test Case Identifier:</b> 03 – 25 P.S. § 3031.7(3) Straight Party and Pennsylvania Method	
<b>PA ST 25 P.S. § 3031.7 Requirements:</b>	<i>(3) Permits each voter, at other than primary elections, to vote a straight political party ticket by one mark or act and, by one mark or act, to vote for all the candidates of one political party for presidential electors and, by one mark or act, to vote for all the candidates of one political party for every office to be voted for, and every such mark or act shall be equivalent to and shall be counted as a vote for every candidate of the political party so marked including its candidates for presidential electors, except with respect to those offices as to which the voter has registered a vote for individual candidates of the same or another political party or political body, in which case the automatic tabulating equipment shall credit the vote for that office only for the candidate individually so selected, notwithstanding the fact that the voter may not have individually voted for the full number of candidates for that office for which he was entitled to vote.</i>
<b>Test Objective:</b> To determine if the voting system supports straight party voting and the Pennsylvania Method.	<b>Test Configuration:</b> Precinct tabulation device configured as described for normal election day operation by Pennsylvania procedures and/or the device manufacturer.
<b>Test Equipment:</b>	None
<b>Special Procedural Requirements:</b>	None
<b>Assumptions:</b>	An election is loaded on the device and the polls are open, ready for voting.
<b>Step</b>	<b>Description</b>
<b>1000</b>	<p>Activate a ballot for voting.</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was presented.</p>
<b>1010</b>	<p>Select the option for the first party selection of the straight party.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for the first party selection in the straight party contest.</p> <p><i>Actual:</i> Republican was selected.</p>
<b>1020</b>	<p>Use the designated method to advance through the ballot to each partisan contest. Observe all partisan contests for the indication of a voter selection for all partisan candidates associated with the first straight party selection.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for all the partisan candidates in each contest associated with the first straight party selection.</p> <p><i>Actual:</i> All Republican candidates were selected.</p>
<b>1030</b>	<p>Use the designated method to advance through the remainder of the ballots advancing to the ballot review screen. Observe the selection in the ballot review observing only the partisan contests associated with the first straight party selections are present. Use the designated method to cast the voted ballot.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for only the partisan contests associated with the first straight party selection. After review the ballot is cast successfully.</p>

	<p><i>Actual:</i> All republican candidates were selected and under votes for non-partisan contests.</p>
<b>1040</b>	<p>Activate a ballot for voting.</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was presented.</p>
<b>1050</b>	<p>Select the option for the second party selection of the straight party.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for the second party in the straight party contest.</p> <p><i>Actual:</i> Democrat was selected.</p>
<b>1060</b>	<p>Use the designated method to advance through the ballot to each partisan contest. Observe all partisan contests for an indication of a voter selection for all partisan candidates associated with the second straight party selection.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for all the partisan candidates in each contest associated with the second straight party selection.</p> <p><i>Actual:</i> Democratic candidates were selected.</p>
<b>1070</b>	<p>Use the designated method to retreat through the ballot selections to the first “N of M” contest. Select the first partisan candidate that is not the party associated with the second straight party selection. Leave the remainder of the selections under voted.</p> <p><i>Expected:</i> “N” candidates for the party of the second straight party selections should display or provide an indication of the non-selection. The selected candidate should be the only selection displayed or indicated.</p> <p><i>Actual:</i> Mary L. Daniel was selected and all other candidates were deselected.</p>
<b>1080</b>	<p>Use the designated method to retreat through the ballot to the “Straight Party” contest. Observe the selection for the second straight party selection.</p> <p><i>Expected:</i> The second straight party selections should be displayed or an indication given as selected.</p> <p><i>Actual:</i> Democrat was selected.</p>
<b>1090</b>	<p>Use the designated method to advance through the remainder of the ballot advancing to the ballot review. Review the selections in the ballot review to verify that the partisan contests associated with the second straight party selections are present with the exception of the first “N of M” contest. Use the designated method to cast the voted ballot.</p> <p><i>Expected:</i> The precinct tabulation device displays or indicates the selection for the partisan contests associated</p>

	<p>with the second straight party selection for all contests except the first “N of M” contest. The first “N of M” contest displays or indicates the selection of the first candidate that is not associated with the second straight party selection. After review the ballot is cast successfully.</p> <p><i>Actual:</i> The ballot review screen displayed the correct selections.</p>
<b>1100</b>	<p>Activate a ballot for voting.</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was displayed.</p>
<b>1110</b>	<p>Select the option for the first party selection of the straight party.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for the first party in the straight party contest.</p> <p><i>Actual:</i> Republican was selected.</p>
<b>1120</b>	<p>Use the designated method to advance through the ballot to each partisan contest. Observe all partisan contests for an indication of a voter selection for all partisan candidates associated with the first straight party selection.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for all the partisan candidates in each contest associated with the first straight party selection.</p> <p><i>Actual:</i> All Republican candidates were selected.</p>
<b>1130</b>	<p>Use the designated method to retreat through the ballot selections to the first “N of M” contest. Select the first partisan candidate that is associated with the first straight party selection. Leave this contest and the remainder of the selections under voted.</p> <p><i>Expected:</i> “N” candidates for the party of the first straight party selections should display or provide an indication of the non-selection. The selected candidate should be the only selection displayed or indicated.</p> <p><i>Actual:</i> Mary L. Daniel was selected and all other candidates were deselected.</p>
<b>1140</b>	<p>Use the designated method to advance through the remainder of the ballot advancing to the ballot review. Review the selections in the ballot review to verify that the partisan contests associated with the first straight party selections are present with the exception of the first “N of M” contest. Use the designated method to cast the voted ballot.</p> <p><i>Expected:</i> The precinct tabulation device displays or indicates the selection for the partisan contests associated with the first straight party selection for all contests except the first “N of M” contest. The first “N of M” contest displays or indicates the selection of the second candidate that is associated with the first straight party selection and an under vote. After review the ballot is cast successfully.</p> <p><i>Actual:</i> All selections were indicated.</p>
<b>1150</b>	<p>Repeat steps 1000- 1150 from above using an ADA input device.</p>

	<p><i>Expected:</i> Repeat 1000 __X__  Repeat 1010 __X__  Repeat 1020 __X__  Repeat 1030 __X__  Repeat 1040 __X__  Repeat 1050 __X__  Repeat 1060 __X__  Repeat 1070 __X__  Repeat 1080 __X__  Repeat 1090 __X__  Repeat 1100 __X__  Repeat 1110 __X__  Repeat 1120 __X__  Repeat 1130 __X__  Repeat 1140 __X__  Repeat 1150 __X__</p> <p><i>Actual:</i> All steps were successfully repeated using the audio session.</p>
<b>1160</b>	<p>Close the polls and print the closed polls report tape.</p> <p><i>Expected:</i> The polls closed and a report is printed.</p> <p><i>Actual:</i> The polls were closed and results report printed.</p>
<b>1170</b>	<p>Review the closed polls report to ensure all selections input above are recorded and reported correctly.</p> <p><i>Expected:</i> The closed polls report presents the accumulated totals for the selections input above.</p> <p><i>Actual:</i> All selections were accurately reported on the results report.</p>
<p><b>Criteria for Evaluation of the Test Results:</b> The intended selections input above are recorded, stored, and reported as input by the tester. The functionality of selecting a candidate of the same party or of a different party of the straight party selection de-selects all candidates for the straight party vote.</p>	

<b>Test Case Identifier:</b> 04 – 25 P.S. § 3031.7(4) Straight Party and Write-In	
<b>PA ST 25 P.S. § 3031.7 Requirements:</b>	<i>(4) Permits each voter, at other than primary elections, to vote a ticket selected from the nominees of any and all political parties, from the nominees of any and all political bodies, and from any persons whose names are not in nomination and do not appear upon the official ballot.</i>
<b>Test Objective:</b> To determine if the voting system supports straight party voting and write-in.	<b>Test Configuration:</b> Precinct tabulation device configured as described for normal election day operation by Pennsylvania procedures and/or the device manufacturer.
<b>Test Equipment:</b>	None
<b>Special Procedural Requirements:</b>	None
<b>Assumptions:</b>	An election is loaded on the device and the polls are open, ready for voting.
<b>Step</b>	<b>Description</b>
<b>1000</b>	<p>Activate a ballot for voting</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was presented.</p>
<b>1010</b>	<p>Select the option for the first party selection of the straight party.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for the first party selection in the straight party contest.</p> <p><i>Actual:</i> Republican was selected.</p>
<b>1020</b>	<p>Use the designated method to advance through the ballot to each partisan contest. Observe all partisan contests for a display or indication of a voter selection for all partisan candidates associated with the first straight party selection.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for all the partisan candidates in each contest associated with the first straight party selection.</p> <p><i>Actual:</i> All Republican candidates were selected.</p>
<b>1030</b>	<p>Use the designated method to advance through the remainder of the ballot advancing to the ballot review screen. Observe the selection in the ballot review observing only the partisan contests associated with the first straight party selections are present. Use the designated method to cast the voted ballot.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of the selection for only the partisan contests associated with the first straight party selection. After review the ballot is cast successfully.</p> <p><i>Actual:</i> The ballot review screen displayed the selections for all republican candidates and no selection for non-partisan contests.</p>
<b>1040</b>	<p>Activate a ballot for regular voting</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p>

	<i>Actual:</i> The ballot was presented.
<b>1050</b>	<p>Select the option for the first party selection of the straight party.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection associated with the first party selection in the straight party contest.</p> <p><i>Actual:</i> Republican was selected.</p>
<b>1060</b>	<p>Use the designated method to advance to the first partisan contest. Select the write-in option. Input John Doe as the write-in name.</p> <p><i>Expected:</i> The precinct tabulation advances to the first partisan contest and allows the input of the “Write-In” candidate John Doe.</p> <p><i>Actual:</i> John Doe was input as a write-in candidate for President of the United States.</p>
<b>1070</b>	<p>Use the designated method to advance to the ballot review screen. Observe the selections associated with the first straight party selection with the exception of the first partisan contest. Use the designated method to cast the voted ballot.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection associated with the first party selection in the straight party contest with the exception of the first partisan contest which should indicate the write-in input of John Doe.</p> <p><i>Actual:</i> Republican candidates in all partisan races were selected with the exception of John Doe as a write-in for President of the United States</p>
<b>1080</b>	<p>Activate a ballot for regular voting</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was presented.</p>
<b>1090</b>	<p>Select the option for the first party selection of the straight party.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection associated with the first party selection in the straight party contest.</p> <p><i>Actual:</i> Republican was selected.</p>
<b>1100</b>	<p>Use the designated method to advance to the first “Question” contest. Select the “Yes” option. Attempt to over vote by selecting the “No” option. Observe the action of attempting to select the second option.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of an attempt to over vote. The precinct tabulation device might disallow the selection and not display any communication.</p> <p><i>Actual:</i> The device requires a de-selection before another selection is made.</p>

1110	<p>Repeat steps 1000- 1100 from above using an ADA input device.</p> <p><i>Expected:</i> Repeat 1000 <u>  X  </u>  Repeat 1010 <u>  X  </u>  Repeat 1020 <u>  X  </u>  Repeat 1030 <u>  X  </u>  Repeat 1040 <u>  X  </u>  Repeat 1050 <u>  X  </u>  Repeat 1060 <u>  X  </u>  Repeat 1070 <u>  X  </u>  Repeat 1080 <u>  X  </u>  Repeat 1090 <u>  X  </u>  Repeat 1100 <u>  X  </u></p> <p><i>Actual:</i> All steps were repeated using an audio session.</p>
1120	<p>Close the polls and print the closed polls report tape.</p> <p><i>Expected:</i> The polls closed and a report is printed.</p> <p><i>Actual:</i> The polls were closed and the results report was printed.</p>
1130	<p>Review the closed polls report to ensure all selections input above are recorded and reported correctly.</p> <p><i>Expected:</i> The closed polls report presents the accumulated totals for the selections input above.</p> <p><i>Actual:</i> All selections were accurately reported on the results report.</p>
<p><b>Criteria for Evaluation of the Test Results:</b> The intended selections input above are recorded, stored, and reported as input by the tester. The functionality of selecting a write-in candidate functions with a straight party selection.</p>	

<b>Test Case Identifier:</b> 05 – 25 P.S. § 3031.7(5) Selection of Candidate and Write-in	
<b>PA ST 25 P.S. § 3031.7 Requirements:</b>	
<b>Test Objective:</b> To determine if the voting system supports the selection of a candidate and a write-in candidate.	<b>Test Configuration:</b> (5) <i>Permits each voter to vote for any person and any office for whom and for which he is lawfully entitled to vote, whether or not the name of such person appears upon the ballot as a candidate for nomination or election.</i>
<b>Test Equipment:</b>	None
<b>Special Procedural Requirements:</b>	None
<b>Assumptions:</b>	An election is loaded on the device and the polls are open, ready for voting.
<b>Step</b>	<b>Description</b>
<b>1000</b>	<p>Activate a ballot for voting.</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was presented.</p>
<b>1010</b>	<p>Select the option for the first candidate in the first partisan contest.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for the first candidate selection in the first partisan contest.</p> <p><i>Actual:</i> James Collins and Arthur Remus were selected for President of the United States.</p>
<b>1020</b>	<p>Use the designated method to advance through the remainder of the ballot advancing to the ballot review screen. Observe the selection in the ballot review observing only the first candidate in the first partisan contest is selected. Use the designated method to cast the voted ballot.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of the selection for only the first candidate selection in first partisan contests. After review the ballot is cast successfully.</p> <p><i>Actual:</i> James Collins and Arthur Remus were the only selection displayed.</p>
<b>1030</b>	<p>Activate a ballot for voting.</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was presented.</p>
<b>1040</b>	<p>Select the option for a write-in candidate in the first partisan contest. Use the designed method to input “John Doe”.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for a write-in candidate.</p> <p><i>Actual:</i> John Doe was input for President of the United States.</p>

<b>1050</b>	<p>Use the designated method to advance through the remainder of the ballot advancing to the ballot review screen. Observe the selection in the ballot review observing only the write-in candidate in the first partisan contest is selected. Use the designated method to cast the voted ballot.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of the selection for only the write-in candidate “John Doe” in first partisan contests. After review the ballot is cast successfully.</p> <p><i>Actual:</i> John Doe was the only selection displayed.</p>
<b>1060</b>	<p>Activate a ballot for voting.</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was presented.</p>
<b>1070</b>	<p>Select the option for a write-in candidate in the first “N of M” contest. Use the designed method to input “John Doe” for all selections. Observe any activity to preclude the same input.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a duplicate vote selection for a write-in candidate. If no indication is provided then trace the ability to adjudicate the vote through the entire system. It may require the EMS component to verify.</p> <p><i>Actual:</i> John Doe and John Doe were input. It was traced through the EMS to adjudicate the duplicate inputs successfully.</p>
<b>1080</b>	<p>Repeat steps 1000- 1070 from above using an ADA input device.</p> <p><i>Expected:</i> Repeat 1000 __X__  Repeat 1010 __X__  Repeat 1020 __X__  Repeat 1030 __X__  Repeat 1040 __X__  Repeat 1050 __X__  Repeat 1060 __X__  Repeat 1070 __X__</p> <p><i>Actual:</i> All steps were repeated using an audio session.</p>
<b>1090</b>	<p>Close the polls and print the closed polls report tape.</p> <p><i>Expected:</i> The polls closed and a report is printed.</p> <p><i>Actual:</i> The polls were closed and the results report printed.</p>
<b>1100</b>	<p>Review the closed polls report to ensure all selections input above are recorded and reported correctly.</p> <p><i>Expected:</i> The closed polls report presents the accumulated totals for the selections input above.</p> <p><i>Actual:</i> All selections were accurately reported on the results report.</p>

<b>Criteria for Evaluation of the Test Results:</b> The intended selections input above are recorded, stored, and reported as input by the tester. The functionality of selecting a candidate and a write-in candidate functions.	

<b>Test Case Identifier:</b> 07– 25 P.S. § 3031.7(7) Attempt to Over Vote Contests and Questions (Regular/ADA)	
<b>PA ST 25 P.S. § 3031.7 Requirements:</b>	(7) If it is of a type that registers the vote electronically, the voting system shall preclude each voter from voting for more persons for any office than he is entitled to vote for or upon any question more than once.
<b>Test Objective:</b> To determine if the voting device allows over voting on contests and questions	<b>Test Configuration:</b> Precinct tabulation device configured as described for normal election day operation by Pennsylvania procedures and/or the device manufacturer.
<b>Equipment:</b>	None
<b>Special Procedural Requirements:</b>	None
<b>Assumptions:</b>	An election is loaded on the device and the polls are open, ready for voting.
<b>Step</b>	<b>Description</b>
<b>1000</b>	<p>Activate a ballot for voting.</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was presented.</p>
<b>1010</b>	<p>Select the first candidate in the first partisan “1 of 1” contest excluding a straight party contest.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for the first candidate in the first partisan “1 of 1” contest excluding a straight party contest.</p> <p><i>Actual:</i> James Collins and Arthur Remus were selected for President of the United States.</p>
<b>1020</b>	<p>Attempt to select the second candidate in the first partisan “1 of 1” contest ensure the contest is the same contest as voted in step 1010. Observe the action of attempting to place a second vote.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of an attempt to over vote. The precinct tabulation device might disallow the selection and not display any communication.</p> <p><i>Actual:</i> Calvin Marino and Keith Satterwhite were selected. The device requires a de-selection before another selection is made.</p>
<b>1030</b>	<p>Attempt to select the write-in option. Observe the action of attempting to input a write-in.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of an attempt to over vote. The precinct tabulation device might disallow the selection and not display any communication.</p> <p><i>Actual:</i> The device requires a de-selection before another selection is made.</p>
<b>1040</b>	<p>Use the designated method to advance the ballot to the first “N of M” contest. Select the first “N” candidates in the contest. (e.g. in a Vote for Two contest the first two candidates would be selected).</p> <p><i>Expected:</i> The precinct tabulation device advances to the first “N of M” contest. Once selected, the precinct tabulation device displays or provides an indication of a vote for the first “N” candidates in the first “N of M” contest.</p> <p><i>Actual:</i> Mary L. Daniel and Jack “Duke” Brodsky were selected.</p>

<b>1050</b>	<p>Attempt to select the “N +1” candidate in the first “N of M” contest ensure the contest is the same contest as voted in step 1030. Observe the action of attempting to place an over vote.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of an attempt to over vote. The precinct tabulation device might disallow the selection and not display any communication.</p> <p><i>Actual:</i> The device requires a de-selection before another selection is made.</p>
<b>1060</b>	<p>Use the designated method to advance the ballot to the first “Question” contest. Select the “Yes” option in the contest.</p> <p><i>Expected:</i> The precinct tabulation device advances to the first “Question” contest. Once selected, the precinct tabulation device displays or provides an indication of a vote for the “Yes” option in the first “Question” contest.</p> <p><i>Actual:</i> “Yes” was selected.</p>
<b>1070</b>	<p>Attempt to select the “No” option in the first “Question” contest ensure the contest is the same contest as voted in step 1050. Observe the action of attempting to place an over vote.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of an attempt to over vote. The precinct tabulation device might disallow the selection and not display any communication.</p> <p><i>Actual:</i> The device requires a de-selection before another selection is made.</p>
<b>1080</b>	<p>Use the designated method to advance the “Ballot Review”. Observe the “Ballot Review” to see if the above selections are indicated. Use the designated method to cast the voted selections.</p> <p><i>Expected:</i> The precinct tabulation device advances to the “Ballot Review” screen. After review and ballot is cast successfully.</p> <p><i>Actual:</i> The selections were displayed correctly.</p>
<b>1090</b>	<p>Repeat steps 1000- 1080 from above using an ADA input device.</p> <p><i>Expected:</i> Repeat 1000 __X__  Repeat 1010 __X__  Repeat 1020 __X__  Repeat 1030 __X__  Repeat 1040 __X__  Repeat 1050 __X__  Repeat 1060 __X__  Repeat 1070 __X__  Repeat 1080 __X__</p> <p><i>Actual:</i> All steps were repeated using an audio session.</p>
<b>1100</b>	<p>Close the polls and print the closed polls report tape.</p>

	<p><i>Expected:</i> The polls closed and a report is printed.</p> <p><i>Actual:</i> The polls were closed and the results report printed.</p>
<b>1110</b>	<p>Review the closed polls report to ensure all selections input above are recorded and reported correctly.</p> <p><i>Expected:</i> The closed polls report presents the accumulated totals for the selections input above.</p> <p><i>Actual:</i> All selections were accurately reported on the results report.</p>
<p><b>Criteria for Evaluation of the Test Results:</b> The intended selections input above are recorded, stored, and reported as input by the tester. The attempts to select more persons than the vote for and any question more than once are unsuccessful.</p>	

<b>Test Case Identifier:</b> 10 – 25 P.S. § 3031.7(10) Ballot Review and Change (Regular ADA)	
<b>PA ST 25 P.S. § 3031.7 Requirements:</b>	<p><i>(10) If it is of a type that registers the vote electronically, the voting system shall permit each voter to change his vote for any candidate or upon any question appearing on the official ballot up to the time that he takes the final step to register his vote and to have his vote computed.</i></p> <p><i>If it is of a type that uses paper ballots or ballot cards to register the vote and automatic tabulating equipment to compute such votes, the system shall provide that a voter who spoils his ballot may obtain another ballot; any ballot thus returned shall be immediately cancelled and at the close of the polls shall be enclosed in an envelope marked "Spoiled" which shall be sealed and returned to the county board.</i></p>
<b>Test Objective:</b> To determine if the voting device allows the voter to review the selections and change a vote selection before cast of the ballot.	<b>Test Configuration:</b> Precinct tabulation device configured as described for normal election day operation by Pennsylvania procedures and/or the device manufacturer.
<b>Test Equipment:</b>	None
<b>Special Procedural Requirements:</b>	None
<b>Assumptions:</b>	An election is loaded on the device and the polls are open, ready for voting.
<b>Step</b>	<b>Description</b>
<b>1000</b>	<p>Activate a ballot for voting.</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was presented.</p>
<b>1010</b>	<p>Select the first candidate in the first all “1 of 1” contest excluding a straight party contest, the first “N” candidates in all “N of M” contests, and select the “Yes” option in all “Question” contests.</p> <p><i>Expected:</i> The precinct tabulation device allow for the navigation and the voting inputs to be selected as described above.</p> <p><i>Actual:</i> James Collins and Arthur Remus were selected for President of the United States. Mary L. Daniel and Jack “Duke” Brodsky were selected for Court of Common Pleas and “Yes” selected in all question contests.</p>
<b>1020</b>	<p>Use the designated method to advance the “Ballot Review”. Observe the “Ballot Review” to see if the above selections are indicated.</p> <p><i>Expected:</i> The precinct tabulation device advances to the “Ballot Review” screen. The vote selections can be verified.</p> <p><i>Actual:</i> The ballot review screen displayed the selection correctly.</p>
<b>1030</b>	<p>Use the designated method to retract to the first partisan “1 of 1” contest excluding the straight party contest.</p> <p><i>Expected:</i> The precinct tabulation device navigates to the first partisan “1 of 1” contest excluding the straight party contest.</p> <p><i>Actual:</i> Navigated to President of the United States.</p>

<b>1040</b>	<p>Deselect the first candidate selection and select the second candidate.</p> <p><i>Expected:</i> The precinct tabulation device indicates the de-selection of the first candidate and the select of the second candidate.</p> <p><i>Actual:</i> Calvin Marino and Keith Satterwhite were selected.</p>
<b>1050</b>	<p>Use the designated method to advance to the first “Question” contest. De-select the “Yes” option and select the “No” option.</p> <p><i>Expected:</i> The precinct tabulation device navigates to the first “Question” contest and provides an indication of the de-selection of the “Yes” option and a selection of the “No” option.</p> <p><i>Actual:</i> “ No” was selected in the Statewide Referendum contest.</p>
<b>1060</b>	<p>Use the designated method to advance the “Ballot Review”. Observe the “Ballot Review” to see if the above selections are indicated. Use the designated method to cast the voted selections.</p> <p><i>pected:</i> The precinct tabulation device advances to the “Ballot Review” screen. After review and ballot is cast successfully.</p> <p><i>Actual:</i> The selections were displayed correctly.</p>
<b>1070</b>	<p>Repeat steps 1000- 1060 from above using an ADA input device.</p> <p><i>Expected:</i> Repeat 1000 __X__  Repeat 1010 __X__  Repeat 1020 __X__  Repeat 1030 __X__  Repeat 1040 __X__  Repeat 1050 __X__  Repeat 1060 __X__</p> <p><i>Actual:</i> All steps were repeated using an audio session.</p>
<b>1080</b>	<p>Close the polls and print the closed polls report tape.</p> <p><i>Expected:</i> The polls closed and a report is printed.</p> <p><i>Actual:</i> The polls were closed and the results report printed.</p>
<b>1090</b>	<p>Review the closed polls report to ensure all selections input above are recorded and reported correctly.</p> <p><i>Expected:</i> The closed polls report presents the accumulated totals for the selections input above.</p> <p><i>Actual:</i> All selections were accurately reported on the results report.</p>
<b>Criteria for Evaluation of the Test Results:</b> The intended selections input above are recorded, stored,	

and reported as input by the tester. The voter input can be changed by navigating through the ballot after a ballot has been reviewed.

<b>Test Case Identifier:</b> 16 – 25 P.S. § 3031.7(16) Public Counter, No Reopening of Polls, Media Security with Tamper Proof Locks and Zero Proof and Tally Reports.	
<b>PA ST 25 P.S. § 3031.7 Requirements:</b>	<p><i>(16) If the voting system is of a type which provides for the computation and tabulation of votes at the district level, the district component of the automatic tabulating equipment shall include the following mechanisms or capabilities:</i></p> <p><i>(i) A public counter, the register of which is visible from the outside of the automatic tabulating equipment component into which the ballots are entered, which shall show during any period of operation the total number of ballots entered for computation and tabulation.</i></p> <p><i>(ii) A lock, or locks, by the use of which all operation of the tabulation element of the automatic tabulating equipment is absolutely prevented immediately after the polls are closed or where the tabulation of votes is completed.</i></p> <p><i>(iii) It shall be so constructed and controlled that, during the progress of voting, it shall preclude every person from seeing or knowing the number of votes theretofore registered for any candidate or question; and it shall preclude every person from tampering with the tabulating element.</i></p> <p><i>(iv) If the number of choices recorded for any office or on any question exceeds the number for which the voter is entitled to vote, it shall reject all choices recorded on the ballot for that office or question, provided, that if used during the period of voting it may also have the capacity to indicate to a voter that he has improperly voted for more candidates for any office than he is entitled to vote for, and in such case it shall have the capacity to permit the voter to mark a new ballot or to forego his opportunity to make such correction.</i></p> <p><i>(v) It shall be equipped with an element which generates a printed record at the beginning of its operation which verifies that the tabulating elements for each candidate position and each question and the public counter are all set to zero and with an element which generates a printed record at the finish of its operation of the total number of voters whose ballots have been tabulated, the total number of votes cast for each candidate whose name appears on the ballot, and the total number of votes cast for, or against, any question appearing on the ballot.</i></p>
<b>Test Objective:</b> To determine if the voting device has a public counter, does not allow the reopening of the polls, and supplies a zero proof and tally report.	<b>Test Configuration:</b> Precinct tabulation device configured as described for normal election day operation by Pennsylvania procedures and/or the device manufacturer. This includes all security locks and seals.
<b>Test Equipment:</b>	None
<b>Special Procedural Requirements:</b>	None
<b>Assumptions:</b>	The election media is installed but the polls have not been opened.
<b>Step</b>	<b>Description</b>
<b>1000</b>	<p>Ensure media is loaded but the polls have not been opened. Use the designated method to open polls. If a response is needed to print “Zero Proof” report, select this option.</p> <p><i>Expected:</i> The precinct tabulation device opens the polls and prints a “Zero Proof” report.</p> <p><i>Actual:</i> Polls opened and zero proof report was printed.</p>
<b>1010</b>	<p>Activate a ballot for voting.</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p>

	<i>Actual:</i> The ballot was presented.
<b>1020</b>	<p>Use the designated method to navigate to the straight party contest. Select the first selection in the straight party contest.</p> <p><i>Expected:</i> The precinct tabulation device navigates to the first straight party contest, allows the input of the first selection, and indicates the first selection was input.</p> <p><i>Actual:</i> Republican was selected.</p>
<b>1030</b>	<p>Use the designated method to advance the “Ballot Review”. Observe all selections for the party associated with the selection for the first straight party selection are selected. Observe the public counter value being 0.</p> <p><i>Expected:</i> The precinct tabulation device navigates to the “Ballot Review” screen. The public counter is visible and the value is 0.</p> <p><i>Actual:</i> Selections for Republican candidates were displayed. The counters had to be observed before the ballot is presented.</p>
<b>1040</b>	<p>Use the designated method to cast the voted selections. Observe the acknowledgement of “successful” ballot cast if provided, and the public counter incrementing by one.</p> <p><i>Expected:</i> The precinct tabulation device successfully cast the ballot and the public counter is incremented. If the ballot was not cast successfully the test is halted.</p> <p><i>Actual:</i> The ballot was cast successfully. The incrementing of the counter had to be observed after the ballot was cast.</p>
<b>1050</b>	<p>Close the polls and print the closed polls report tape.</p> <p><i>Expected:</i> The polls closed and a report is printed.</p> <p><i>Actual:</i> The polls were closed and the results report printed.</p>
<b>1060</b>	<p>Use the designated method to attempt to reopen the polls.</p> <p><i>Expected:</i> The polls cannot be reopened.</p> <p><i>Actual:</i> The polls could not be reopened.</p>
<b>1070</b>	<p>Place lock on precinct tabulation device per Pennsylvania Procedures to ensure all operation of the tabulation element is prevented.</p> <p><i>Expected:</i> The precinct tabulation device can be secured so that all operation of the tabulation element is prevented.</p>

	<i>Actual:</i> The precinct tabulation device could be locked.
<b>1070</b>	<p>Review the closed polls report to ensure all selections input above are recorded and reported correctly.</p> <p><i>Expected:</i> The closed polls report presents the accumulated totals for the selections input above.</p> <p><i>Actual:</i> The polls were closed and the results report printed.</p>
<b>Criteria for Evaluation of the Test Results:</b> The intended selections input above are recorded, stored, and reported as input by the tester. The voting device is able to produce a “Zero Proof” and “Tally Report”. The voting device has a visible public counter and the counter increments correctly.	

<b>Test Case Identifier:</b> 04, 06, 08, 09, Permanent Physical Record, and Statistical Sample – 25 P.S. §§ 3031.7(4), (6), (8), (9); 3031.1; and 3031.17 System Integration	
<b>PA ST 25 P.S. § 3031.7 Requirements:</b>	<p><i>(4) Permits each voter, at other than primary elections, to vote a ticket selected from the nominees of any and all political parties, from the nominees of any and all political bodies, and from any persons whose names are not in nomination and do not appear upon the official ballot.</i></p> <p><i>(6) Permits each voter to vote for as many persons for any office as he is entitled to vote for and to vote for or against any question upon which he is entitled to vote and precludes each voter from voting or from having his vote tabulated for any candidate, or upon any question, for whom or upon which he is not entitled to vote.</i></p> <p><i>(8) Precludes each voter from voting or from having his vote tabulated more than once for any candidate for the same office or upon any question, except in districts and for offices where cumulative voting is authorized by law.</i></p> <p><i>(9) Permits each voter at a primary election to vote only for the candidates seeking nomination by a political party in which such voter is registered and enrolled, and for any candidate for nonpartisan nomination, and for any question upon which he is entitled to vote.</i></p>
<b>PA ST 25 P.S. § 3031.1 Requirements:</b>	<i>"ELECTRONIC VOTING SYSTEM" means a system in which one or more voting devices are used to permit the registering or recording of votes and in which such votes are computed and tabulated by automatic tabulating equipment. The system shall provide for a permanent physical record of each vote cast.</i>
<b>PA ST 25 P.S. § 3031.17 Requirements:</b>	<i>The county board of elections, as part of the computation and canvass of returns, shall conduct a statistical recount of a random sample of ballots after each election using manual, mechanical or electronic devices of a type different than those used for the specific election. The sample shall include at least two (2) per centum of the votes cast or two thousand (2,000) votes whichever is the lesser.</i>
<b>Test Objective:</b> This area of testing will focus on the system being able to perform a general and a closed primary from ballot design to reporting of results.	
<b>Test Configuration:</b> The system integration testing will execute a general and a primary election from ballot design through vote accumulation, consolidation and reporting. The election definitions will include all supported voting variations, languages, multiple ballot styles, and ADA voting. Two election definitions will be defined and executed according to a predefined voting pattern. All requirements tested in the targeted functionality testing will be monitored including accuracy throughout system integration testing.	
<b>Test Method:</b> The method for testing these requirements is defined as follows:  Provide an election definition that contains multiple ballot styles based on geographical subdivision in both a general election and a closed primary and tests that each vote is counted only once.  Two elections will be utilized to perform System Integration Testing: <ul style="list-style-type: none"> <li>• PA Certification General Election</li> <li>• PA Certification Closed Primary Election</li> </ul> This test will be performed by evaluating the system from the pre-voting state of loading the media and obtaining pre-voting reports through the post-voting state of accumulation of voted data and printing of post-election reports. All documented steps will be followed to perform this test.	

- Election definition and ballot layout coded prior to test
- Print pre-election report for ballot layout, precinct summary, and election summary
- Load election media
- Install election onto the precinct tabulation device
- Open polls and print zero proof report
- Vote pre-defined voting pattern
- Closed polls and print results tapes
- Print audit logs
- Perform a 10% sample according to PA procedures
- Harvest permanent physical record example
- Load election results into EMS
- Print precinct summary and election summary reports
- Collect and analyze all data

**Criteria for Evaluation of the Test Results:**

All intended selection input by the tester are recorded, stored and reported accurately.

<b>Test Case Identifier:</b> 12 – 25 P.S. § 3031.7(12) Penetration Analysis	
<b>PA ST 25 P.S. § 3031.7 Requirements:</b>	<i>(12) Provides acceptable ballot security procedures and impoundment of ballots to prevent tampering with or substitution of any ballots or ballot cards.</i>
<b>Test Objective:</b> This area of testing will focus on the current documented procedures and configuration to ensure that the physical and access secure measures provide a determined level of security. <i>Depending on the scope of this project this may be performed by a third-party expert.</i>	
<b>Test Configuration:</b> The voting system will be configured as would be for a polling place with all security precautions in place.	
<b>Test Method:</b> The method for testing these requirements is defined as follows:  Test steps will be followed to evaluate the physical and access controls and procedures in place for the storage of voted ballots. This test will be performed by evaluating the system to ensure that all access areas and seals and/or locks provide adequate security from external access. The tester will: <ul style="list-style-type: none"> <li>• check all seal and/or locks and attempt to open the system</li> <li>• verify that the ballot storage device is secure by attempting to insert and retrieve ballots without removing any seals and/or locks</li> <li>• verify that any needed supplies can be accessed by the poll worker without allowing access to the ballots or internal components of the voting system</li> <li>• verify that the system counter cannot be reset by any unauthorized person at any unauthorized point</li> <li>• exercise verification of password security management</li> </ul>	
<b>Criteria for Evaluation of the Test Results:</b> All intended access controls are in place and are sufficient.	
<b>Comments:</b>

**25 P.S. § 3031.5. Examination and approval of electronic voting systems by the Secretary of the Commonwealth**

*(a) Any person or corporation owning, manufacturing or selling, or being interested in the manufacture or sale of, any electronic voting system, may request the Secretary of the Commonwealth to examine such system if the voting system has been examined and approved by a federally recognized independent testing authority and if it meets any voting system performance and test standards established by the Federal Government. The costs of the examination shall be paid by the person requesting the examination in an amount set by the Secretary of the Commonwealth. Any ten or more persons, being qualified registered electors of this Commonwealth, may, at any time, request the Secretary of the Commonwealth to reexamine any electronic voting system theretofore examined and approved by him. Before any reexamination, the person, persons, or corporation, requesting such reexamination, shall pay to the Treasurer of the Commonwealth a reexamination fee of four hundred fifty dollars (\$450). The Secretary of the Commonwealth may, at any time, in his discretion, reexamine any such system therefore examined and approved by him. The Secretary of the Commonwealth may issue directives or instructions for implementation of electronic voting procedures and for the operation of electronic voting systems.*
