Amplified Record of Engineering Work Experience Requirements

To assist the Board with providing the most appropriate evaluation of your engineering work experience, you must submit an “Amplified Record of Engineering Work/Design Experience” form (amplified record), which has been **completed in its entirety** (names, addresses, complete employment dates- *NOT to “present”* etc...) and provides the Board with specific, thorough and detailed descriptions of your progressive professional experience in engineering work/design that you obtained under the supervision of a licensed professional engineer (or similarly qualified engineer of a grade or character to fit him to assume responsible charge of the work/design involved in the practice of engineering), after the issuance of your Engineer-In-Training (EIT) certificate and prior to initial licensure.

The amplified record must clearly describe the supervised engineering work/design that you personally performed; delineate your role in any group engineering activity; provide an overall description of the nature of work/design you personally performed and specifically indicate how your engineering skills and responsibilities have progressively increased during your years of experience and must demonstrate conclusively the years of progressive professional experience you have obtained (*including detailed examples of how engineering knowledge and engineering principles, including the principles of math and science, were actually employed*) in engineering work/design of a grade and character to fit you to assume responsible charge of the work involved in the practice of engineering.

Please note that *the only work experience considered during any application review* is the experience information provided on *the amplified record*. Do NOT attach a resume or curriculum vitae in lieu of an Amplified Record of Work Experience form.

Additionally, please note that you should provide no more than **one year of work experience per page** of the amplified record; however, you may use as many pages as necessary to accurately describe each year of experience.
