## NONRESIDENT PHARMACIES

On October 7, 2015, Governor Tom Wolf signed Act 43 requiring nonresident pharmacies to register with the Pennsylvania State Board of Pharmacy prior to shipping medication into the Commonwealth.

In an effort to not interrupt the pharmaceutical services to our Pennsylvania residents, nonresident pharmacies that have an application on file with the Board on or before March 1, 2016 will be able to continue shipping medications to their Pennsylvania patients during the application approval process. From the date that your application is received in the Board office, you will have 120 days to resolve any discrepancies with your application and during this 120 day application processing period you will be able to continue to ship medication to your Pennsylvania patients.
