1.0 INTRODUCTION

1.1 Scope

An examination of the Danaher Controls, Inc. ELECTronic 1242 Voting System, version 5M2 (hereafter referred to as the “ELECTronic 1242 Voting System”), was performed per the direction of the Secretary of the Commonwealth, acting through the Pennsylvania Department of State, Bureau of Commissions, Elections and Legislation. This Test Report documents the procedures followed, the results obtained, and the conclusions drawn from that examination.

1.2 Objective

The objective of the examination was to determine whether the ELECTronic 1242 Voting System and an earlier version (5M1), previously certified for use in the Commonwealth of Pennsylvania on November 15, 2005, are compliant with the requirements of Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 – 3031.22, and to document compliance through the execution of single thread test cases where applicable.

1.3 References

The documents listed below were utilized in the development of the Test Report:

- Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 – 3031.22
- Federal Election Commission 2002 Voting Systems Standards
- Help America Vote Act (HAVA) of 2002, Public Law 107-252, 42 U.S.C. § 15301 *et seq.*

1.4 Terms and Abbreviations

Term	Abbreviation	Definition
Americans with Disabilities Act	ADA	Americans with Disabilities Act of 1990 is a law enacted by the United States Congress to prohibit discrimination based on disability.
Commercial Off-The-Shelf	COTS	Commercial, readily available hardware or software.
Direct Recording Electronic	DRE	An electronic voting system that utilizes electronic components for the functions of ballot presentation, vote capture, vote recording and tabulation which are logically and physically integrated into a single unit.

Term	Abbreviation	Definition
Election Management System	EMS	Set of processing functions and databases within a voting system that defines, develops and maintains election databases, performs election definitions and setup functions, formats ballots, counts votes, consolidates and reports results, and maintains audit trails.
Federal Election Commission	FEC	Commission created in 1975 to regulate the campaign finance legislation in the United States.
Independent Testing Authority	ITA	Independent testing organizations accredited by the National Association of State Election Directors (NASSED) to perform voting system qualification testing.
Technical Data Package	TDP	Manufacturer's documentation related to the voting system required to be submitted with the system as a precondition for certification.
Federal Election Commission 2002 Voting System Standards	VSS	Voluntary guidelines published by the FEC, the second iteration of national level voting system standards

2.0 SYSTEM OVERVIEW AND IDENTIFICATION

The ELECTronic 1242 Voting System is a DRE Voting System that consists of the ELECTronic 1242 full-face DRE Voting Machine and the Guardian Election Management System (GEMS). The ELECTronic 1242 Voting Machine is a standalone device that does not require direct communication at any time. The operation of the ELECTronic 1242 Voting Machine is controlled using a memory cartridge to download election data and results. The ELECTronic 1242 Voting Machine utilizes a pre-printed ballot overlay to display the ballot. Voter selections are input via push-buttons and are then recorded electronically.

The GEMS is composed of the Guardian Election Management Software, GT Audio, Guardian Reports, Display PC, Guardian Reader, MCRP-USB, MCRP-Serial, memory cartridges and the ELECTronic 1242 Election Voting Machine. GEMS is utilized for ballot design and layout, programming election data, and accumulating vote totals for reporting. GEMS operates on a standard Windows desktop personal computer.

Overview diagrams of GEMS and the ELECTronic 1242 Voting System are presented in Figures 2.1 and 2.2, respectively.

Figure 2.1 System Overview Diagram (Guardian Election Management System Overview)

Figure 2.2 System Overview Diagram

2.1 Software

The software listed in Table 2.1 was used during the examination of the ELECTronic 1242 Voting System. Table 2.1 provides the component name, software/firmware version and a SHA-1 Hash, if calculated, during the examination.

Table 2.1 Software/Firmware

Component Name	Version	Unique Identifier (digital signature or hash value)
Guardian Election Management System	3.0.1	Not Calculated
ELECTronic 1242 Firmware	5M2	3693d6627ff066508a4009d34fe52a608d51e080
GT Audio	1.0.0	Not Calculated
Guardian Reports	4.0.0	Not Calculated
Reader_USB	3.0.1	Not Calculated
Display PC	3.0.1	Not Calculated
DB Upgrade	3.0.1	Not Calculated
MCRP (Memory Cartridge Reader Programmer) –USB Firmware	1.09	Not Calculated

2.2 Hardware

Table 2.2 provides hardware component name, model number, and the serial number for the units that were examined.

Table 2.2 Hardware

Component Name	Model Number	Serial Number
ELECTronic 1242 Electronic Voting Machine (EVM)	1242	019191, 019192, 019193, 019195

3.0 TEST PROCESS

3.1 Background

The ELECTronic 1242 Voting System with ELECTronic 1242 firmware version 5M1 was certified for use in the Commonwealth of Pennsylvania on November 15, 2005, after an examination was conducted pursuant to the Pennsylvania Election Code. Two minor modifications, unrelated to the system’s capability, functionality, operability, or accuracy, were subsequently implemented, resulting in ELECTronic 1242 firmware version 5M2. Both versions have been in use by Pennsylvania counties since the system’s initial certification. Pursuant to section 1105-A of the Pennsylvania Election Code, 25 P.S. § 3031.5, a group of Pennsylvania voters formally requested that the Secretary conduct a re-examination of the ELECTronic 1242 Voting System. The Secretary granted the request. Pro V&V, Inc. was contracted to develop test protocols and conduct the re-examination testing to ascertain whether the certified electronic voting system complies with the requirements set forth in the Pennsylvania Election Code.

3.2 General Information

The examination of the ELECTronic 1242 Voting System was performed by Jack Cobb of Pro V&V, Inc. (the “Examiner”), per the direction of the Secretary of the Commonwealth, acting through the Pennsylvania Department of State, Bureau of Commissions, Elections and Legislation. Given the similarities between versions 5M1 and 5M2 relating to accuracy, efficiency, and capacity, *see* 25 P.S. § 3031.5(d), the examination of version 5M2 also constitutes a re-examination of version 5M1. The examination commenced on February 28, 2012, at the Commonwealth Keystone Building, Hearing Room 1, 400 North Street, Harrisburg, Pennsylvania. The examination lasted approximately ten hours.

3.3 Test Approach

To achieve the objective of this examination, the Examiner separated the requirements of Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 – 3031.22, into four main areas of test execution: (1) Review; (2) Targeted Functionality; (3) System Integration; and (4) Penetration Analysis. The “Review” testing consisted of analyzing ITA and other third-party reports for specific tests that satisfied the requirements of the Pennsylvania Election Code and verifying that both the 5M1 and 5M2 versions of the ELECTronic 1242 Voting System meet those requirements. The “Targeted Functionality” testing sought to ascertain whether both ELECTronic 1242 Voting Systems meet all of the requirements of the Pennsylvania Election Code that can be met by execution of a single thread test case. The “System Integration” testing sought to ascertain whether both ELECTronic 1242 Voting Systems meet all of the requirements of the Pennsylvania Election Code that can be met by the execution of an entire election. General and closed-primary election definitions were devised and run for the pre-voting, voting, and post-voting functions of the voting system. The “Penetration Analysis” testing sought to ascertain whether both ELECTronic 1242 Voting Systems meet all of

the requirements of the Pennsylvania Election Code that can be met by analyzing security procedures and impoundment of ballots. Precinct tabulation devices were installed for delivery to the precinct, and analysis of the security procedures performed. Appendix A (“As Run Test Protocol”) contains the details of the test protocol performed on the ELECTronic 1242 Voting System.

4.0 TEST FINDINGS AND RECOMMENDATIONS

The ELECTronic 1242 Voting System, listed in Section 2.0 of this report, was subjected to the tests summarized in the following paragraphs.

4.1 Review

A review of the ITA reports for both the 5M1 and 5M2 versions, listed on page 92 of Appendix A was conducted to determine compliance with the following sections of the Election Code:

- 25 P.S. § 3031.5(a), requiring that a DRE “ha[ve] been examined and approved by a federally recognized independent testing authority” and that it “meet any voting system performance and test standards established by the Federal Government;”
- 25 P.S. § 3031.7(11), requiring that a DRE be “suitably designed for the purpose used, ... constructed in a neat and workmanlike manner of durable material of good quality, ... safely and efficiently useable in the conduct of elections and, with respect to the counting of ballots cast at each district, ... suitably designed and equipped to be capable of absolute accuracy, which accuracy shall be demonstrated to the Secretary of the Commonwealth;”
- 25 P.S. § 3031.7(13), requiring that a DRE, “[w]hen properly operated, records correctly and computes and tabulates accurately every valid vote registered;”
- 25 P.S. § 3031.7(14), requiring that a DRE be “safely transportable;” and
- 25 P.S. § 3031.7(15), requiring that a DRE be “so constructed that a voter may readily learn the method of operating it.”

Summary Findings: The test reports submitted by Danaher Controls satisfied the requirements set forth in 25 P.S. § 3031.5(a). The ELECTronic 1242 Voting Systems, versions 5M1 and 5M2, were examined and approved by an ITA as meeting the applicable performance and test standards. *See* Danaher Controls Guardian Election Management System (GEMS) V 3.0 and ELECTronic 1242 Voting System Hardware & Software ITA Qualification Report Rev 04, dated March 8, 2006, and Danaher Controls Guardian Election Management System (GEMS) V 3.01 & ELECTronic 1242 V 5M2 Voting System Software ITA Qualification Report Incorporating GEMS software and ELECTronic 1242 Firmware Changes Rev 01, dated April 7, 2006.

The design requirements of Sections 3031.7(11) and (14) of the Pennsylvania Election Code were met by the documented Product Safety Tests in the submitted ITA reports. *See* page 91 of Appendix A. The transportation requirements of Section 3031.7(14) of the Election Code were met by the combination of documented Hardware Non-Operating Environmental Tests which included: bench handling, vibration, low temperature, high temperature, and humidity. These component tests were designed to test the storage of precinct tabulation devices between elections, as well as transportation between the storage facility and the polling place. As a result, it can be determined that the ELECTronic 1242 Voting Systems meet the requirements of the Pennsylvania Election Code.

The accuracy requirements of Sections 3031.7(11) and (13) of the Pennsylvania Election Code were met by the documented Accuracy Tests submitted in the ITA reports. See page 91 of Appendix A.

The manufacturer did not provide a Summative Usability Report to meet the requirements set forth in 25 P.S. § 3031.7(14). The Examiner, however, did not encounter any issues performing the method of operation for standard voting sessions or ADA voting sessions during execution of the examination. Additionally, Department of State staff members were used to input voting data for the system integration area of testing. No operational issues were reported.

By review of the above stated documents, and the certification to the FEC 2002 VSS of both the 5M1 and 5M2 versions of the ELECTronic 1242 Voting System, I conclude the ELECTronic 1242 Voting Systems meet these requirements of the Pennsylvania Election Code.

4.2 Targeted Functionality

As set forth in the Test Protocols published before the examination, nine test cases were designed to determine compliance of the ELECTronic 1242 Voting System with the requirements of 25 P.S. § 3031.7(1), (2), (3), (4), (5), (7), (10) and (16). The Examiner conducted each of these tests, with necessary modifications as discussed below. The following is a list of the individual test cases and a summary of the results and observations for each test case.

Test Case Identifier: 01 – 1107-A(1), 25 P.S. § 3031.7(1) Voter Secrecy (Regular Voter):

This test case was designed to test for compliance with 25 P.S. § 3031.7(1), requiring that a DRE “provides for voting in absolute secrecy and prevents any person from seeing or knowing for whom any voter, except one who has received or is receiving assistance as prescribed by law, has voted or is voting.” This test case required observation of voter input from a distance that is considered public space for a DRE in the standard voting position. Three different observation positions were used to observe what, if any, voter inputs could be seen.

Summary Finding: No issues or anomalies were noted during the execution of this test case. The actual results obtained during execution met the expected results. The objective criteria for evaluation were analyzed and the system met the criteria. Any jurisdiction using the ELECTronic 1242 Voting Systems should follow Directive 4 of “Directive Concerning the Use, Implementation and Operation of Electronic Voting Systems by the County Board of Elections,” dated April 28, 2009, and issued by the Secretary of the Commonwealth. In my opinion, the ELECTronic 1242 Voting Systems, if setup per Directive 4, can provide for secrecy so that no person can see whom any voter has voted for, thus meeting the requirement of the Election Code.

Test Case Identifier: 01 – 1107-A(1), 25 P.S. § 3031.7(1) Voter Secrecy (ADA Voter):

This test case was designed to determine whether audible and visual voter input from a distance that is considered public space for a DRE in the ADA position could be observed by a third-party. Before test execution, it was determined that the examination room’s size and acoustics were invalid for the audio portion of the test (only visual observations were recorded).

Summary Finding: During the execution of this test case, the observer did report being able to see parts of the ballot and voter inputs. It should be noted however, that this test was conducted while the ELECTronic 1242 Voting System was activated for a standard voting session for the purposes of the observations. In an actual accessible voting session the LCD display is not active.

Any jurisdiction using the ELECTronic 1242 Voting Systems should follow Directive 4 of “Directive Concerning the Use, Implementation and Operation of Electronic Voting Systems by the County Board of Elections,” dated April 28, 2009, and issued by the Secretary of the Commonwealth. In my opinion, the ELECTronic 1242 Voting Systems, if setup per Directive 4, can provide for secrecy so that no person can see whom any ADA voter has voted for, thus meeting the requirement of the Election Code.

Test Case Identifier: 02 – 1107-A(2), 25 P.S. § 3031.7(2) Selection of Candidates and Questions by Voter (Regular/ADA):

This test case was designed to test for compliance with 25 P.S. § 3031.7(2), requiring that a DRE “provides facilities for voting for such candidates as may be nominated and upon such questions as may be submitted.” This test case ensures a vote for a candidate for “1 of 1,” “N of M,” and “Question” contests could be recorded and reported as input for a standard voting session and an ADA voting session.

Summary Finding: No issues or anomalies were noted during the execution of this test case. The ELECTronic 1242 Voting System successfully recorded and reported votes for “1 of 1,” “N of M,” and “Question” contests for both a standard voting session and an ADA voting session. The actual results obtained during execution met the expected results. *See* page 67 of Appendix A. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude that the ELECTronic 1242 Voting Systems meet the requirements of Section 3031.7(2) of the Pennsylvania Election Code.

Test Case Identifier: 03 – 1107-A(3), 25 P.S. § 3031.7(3) Straight-Party and Pennsylvania Method:

This test case was designed to test for compliance with 25 P.S. § 3031.7(3), which requires that a DRE allow a voter to perform straight-party voting according to the “Pennsylvania Method.” This test case was designed to ensure that a straight-party selection and the Pennsylvania Method of straight-party voting could be recorded and reported as input for a standard voting session and an ADA voting session.

Summary Finding: During the execution of this test case, the The ELECTronic 1242 Voting System successfully recorded and reported straight-party votes and demonstrated the Pennsylvania Method of straight-party voting for both a standard voting session and an ADA voting session. However, during execution of Test Step 1130 of Test Case Identifier 03 – 25 P.S. § 3031.7(3) Straight Party and Pennsylvania Method (*See* page 69 of Appendix A), it was observed that the ELECTronic 1242 voting unit did not produce the expected result. While attempting to execute the “Pennsylvania Method” of straight-party voting with preference, the ELECTronic 1242 voting unit deselected all candidates for the Republican Party, including the candidate intended to be the preference selection, Mary Daniels. The Examiner reselected Mary Daniels with a second action and the selection was recorded. The steps to reproduce this anomaly were executed a second time. At the conclusion of the examination, the Examiner researched the official record from the original certification examination on June 8, 2005. This exact same behavior was noted by the original Examiner, Dr. Michael I. Shamos, in Volume II of the recorded examination at approximately the 58th minute and again in Volume III of the recorded examination at approximately the 8th minute. The Examiner then reviewed the original certification report submitted by Dr. Shamos dated September 2005. There is no mention of the anomaly observed. The original report concluded that the voting system successfully executed the “Pennsylvania Method.”

The Examiner interprets 25 P.S. § 3031.7(3) as requiring the action of the selection of Mary Daniels as a preferred selection to select Mary Daniels and deselect all other republican candidates. Through research of the original examination and report submitted of the original examination, the Examiner believes this was not the interpretation of 25 P.S. § 3031.7(3) used for the original certification of the ELECTronic 1242 Voting System. Since this anomaly is not considered to affect the ability of the voting system to accurately record, report or store voted data and none of the documentation from the original examination explains the interpretation used, the Examiner will accept this functionality as compliant with 25 P.S. § 3031.7(3). If any future examination is required for the ELECTronic 1242 Voting System, a defined interpretation of the functionality related to the “Pennsylvania Method “ of straight-party voting with preference should be determined before any future exam.

Test Case Identifier: 04 – 1107-A(4), 25 P.S. § 3031.7(4) Straight Party and Write-In:

This test case was designed to test for compliance with 25 P.S. § 3031.7(4), which requires that a DRE permit a voter in non-primary elections to vote for a candidate of his or her choice through a straight-party or write-in voting. This test case ensures that both a straight-party and write-in selection could be recorded and reported as input for a standard voting session and an ADA voting session.

Summary Finding: No issues or anomalies were noted during the execution of this test case. During the execution of this test case, the ELECTronic 1242 Voting System successfully recorded and reported straight-party and write-in votes for both a standard voting session and an ADA voting session. The actual results obtained during execution met the expected results. *See* page 73 of Appendix A. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude the ELECTronic 1242 Voting Systems meet the requirements of Section 3031.7(4) of the Pennsylvania Election Code.

Test Case Identifier: 05 – 1107-A(5), 25 P.S. § 3031.7(5) Selection of Candidate and Write-in:

This test case was designed to test for compliance with 25 P.S. § 3031.7(5), which requires that a DRE permit a voter to vote for any candidate or write-in a candidate. This test case ensures that a candidate and write-in selection could be recorded and reported as input for a standard voting session and an ADA voting session.

Summary Finding: No issues or anomalies were noted during the execution of this test case. During the execution of this test case the ELECTronic 1242 Voting System successfully recorded and reported candidate selections and write-in votes for both a standard voting session and an ADA voting session. The actual results obtained during execution met the expected results. *See* page 76 of Appendix A. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude the ELECTronic 1242 Voting Systems meet the requirements of Section 3031.7(5) of the Pennsylvania Election Code.

Test Case Identifier: 07 – 1107-A(7), 25 P.S. § 3031.7(7) Attempt to Over Vote Contests and Questions (Regular/ADA):

This test case was designed to test for compliance with 25 P.S. § 3031.7(7), which requires that a DRE prevent a voter from over voting. This test case ensures that a voter could not over vote for a contest or question during a standard voting session and an ADA voting session.

Summary Finding: The ELECTronic 1242 Voting System successfully prohibited a voter from selecting more than the number of allowable selections, including write-in votes, for both a standard voting session and an ADA voting session. No issues or anomalies were noted during the execution of this test case. The actual results obtained during execution met the expected results. *See* page 79 of Appendix A. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude the ELECTronic 1242 Voting Systems meet the requirements of Section 3031.7(7) of the Pennsylvania Election Code.

Test Case Identifier: 10 – 1107-A(10), 25 P.S. § 3031.7(10) Ballot Review and Change (Regular/ADA):

This test case was designed to test for compliance with 25 P.S. § 3031.7(10), which requires that a DRE allow for ballot review and change before casting the ballot. This test case ensures that a voter can review a voted ballot and make changes before casting the ballot and have a cast ballot input during a standard voting session and an ADA voting session.

Summary Finding: No issues or anomalies were noted during the execution of this test case. During the execution of this test case, the ELECTronic 1242 Voting System provided a voter with a review screen and allowed for the voter to return to either the beginning of the ballot or an individual contest to make changes to his or her selections before casting the ballot for both a standard voting session and an ADA voting session. The actual results obtained during execution met the expected results. *See* page 82 of Appendix A. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude the ELECTronic 1242 Voting Systems meet the requirements of Section 3031.7(10) of the Pennsylvania Election Code.

Test Case Identifier: 16 – 1107-A(16), 25 P.S. § 3031.7(16) Public Counter, No Re-opening of Polls, Media Security with Tamper Proof Locks and Zero Proof and Tally Reports:

This test case was designed to test for compliance with 25 P.S. § 3031.7(16), which requires that a DRE have a public counter, have the ability to lock after the polls are closed, provide for voter secrecy, prohibit over votes, and print zero proof and results reports. This test case verifies the display of a public counter. It also ensures that the device provides (a) a lock to prevent tabulation after the polls are closed and to prevent re-opening of the polls, (b) tamper evident locks and seals, and (c) zero proof and results reports.

Summary Finding: No issues or anomalies were noted during the execution of this test case. During the execution of this test case the ELECTronic 1242 Voting System provided a public counter that incremented with each cast vote; provided the ability to be locked after the polls were closed; precluded the re-opening of the polls after the polls were closed; provided design features that allow tamper evident locks and seals to be placed on the device (*see* photographs in Section 4.4); and provided zero proof and results reports. The actual results obtained during execution met the expected results. *See* page 85 of Appendix A. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude the ELECTronic 1242 Voting Systems meet the requirements of Section 3031.7(16) of the Pennsylvania Election Code.

4.3 System Integration Testing

System Integration Testing was performed to test proprietary hardware, software and peripherals, as well as COTS materials configured as a precinct count system. This test meets many of the requirements of the Election Code that were previously verified in the Targeted Functionality area of testing, but was designed to specifically meet the following sections and requirements:

- 25 P.S. § 3031.1, defining "electronic voting system" to be a "system in which one or more voting devices are used to permit the registering or recording of votes and in which such votes are computed and tabulated by automatic tabulating equipment. The system shall provide for a permanent physical record of each vote cast;"
- 25 P.S. § 3031.7(4), requiring that a DRE "permits each voter, at other than primary elections, to vote a ticket selected from the nominees of any and all political parties, from the nominees of any and all political bodies, and from any persons whose names are not in nomination and do not appear upon the official ballot;"
- 25 P.S. § 3031.7(6), requiring that a DRE "permits each voter to vote for as many persons for any office as he is entitled to vote for and to vote for or against any question upon which he is entitled to vote and precludes each voter from voting or from having his vote tabulated for any candidate, or upon any question, for whom or upon which he is not entitled to vote;"
- 25 P.S. § 3031.7(8), requiring that a DRE "precludes each voter from voting or from having his vote tabulated more than once for any candidate for the same office or upon any question, except in districts and for offices where cumulative voting is authorized by law;"
- 25 P.S. § 3031.7(9), requiring that a DRE "permits each voter at a primary election to vote only for the candidates seeking nomination by a political party in which such voter is registered and enrolled, and for any candidate for nonpartisan nomination, and for any question upon which he is entitled to vote;" and
- 25 P.S. § 3031.17, requiring that the "county board of elections, as part of the computation and canvass of returns, shall conduct a statistical recount of a random sample of ballots after each election using manual, mechanical or electronic devices of a type different than those used for the specific election. The sample shall include at least two (2) per centum of the votes cast or two thousand (2,000) votes whichever is the lesser."

Two election definitions, a general and closed primary election, were devised to test and measure specific input devices, voting patterns and results. Pre-voting reports were generated, consisting of a ballot proof report, precinct summary report, and election summary report. The polls were opened, and precinct tabulator zero proof reports were generated. The Examiner and other Department of State staff members attempted to input a complex voting pattern consisting of distinct combinations of vote selection as documented in the Test Protocol (*See Appendix A Election Definitions*). The polls were closed, and results reports were generated including cast vote records and ballot images. The voted data was then transferred to the election management system (EMS), and election summary reports, precinct summary reports, and ballot images were printed. At the conclusion of the test, the Examiner conducted a statistical recount of at least 10% of the votes cast using the cast vote records and ballot images. The procedure for conducting the statistical recount was to use the documented voting pattern and compare it to the cast vote records and ballot images. The procedure identified each ballot by the distinct voting pattern that was input. The Examiner also generated a backup of the EMS database and retained a copy with the other test data.

Summary Finding: No issues or anomalies were noted during the execution of this test case. The ELECTronic 1242 Voting System successfully completed both the general and closed primary election. The actual results obtained during execution met the expected results. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I

conclude the ELECTronic Voting Systems meet the requirements of Sections 3031.1 and 3031.17 of the Pennsylvania Election Code in that the system generated a permanent physical record in the format of the cast vote record and ballot images that were used to conduct a statistical recount. The ELECTronic Voting Systems also comply with Sections 3031.7(4) in that voters were able to vote for any candidate from any party or political body of their choice. The ELECTronic Voting Systems meet the requirements of 25 P.S. § 3031.7(9) in that test voters in the primary election were only able to vote for their party and the system rejected attempts to vote for non-party candidates. The ELECTronic 1242 Voting Systems meet the requirements for Sections 3031.7(6) and (8) in that the test voters cast votes on different ballot styles for candidates and questions and the ELECTronic 1242 Voting System precluded test voters from over voting.

4.4 Penetration Analysis

A penetration analysis was performed to verify compliance with 25 P.S. § 3031.7(12), which requires that a DRE “provides acceptable ballot security procedures and impoundment of ballots to prevent tampering with or substitution of any ballots or ballot cards.”

The precinct tabulation devices were configured for delivery to a polling place from a warehouse; this included all suggested seals and locks. The Examiner inspected the device for the ability to tamper with the transportation case and the device inside the case. The inspection examined the ports, the outer case, and memory devices from the aspect of the device as delivered to the polling place and configured for voting. The Examiner also examined both the precinct device and the EMS for password management of administrative functions and ensured the system counter cannot be reset by unauthorized persons. The Examiner photographed the configuration and analyzed the configuration for possible vulnerabilities. Photographs 1.1 through 1.4 indicate locks and seals on the precinct tabulation devices.

Photograph 1.1 lock on transportation case

Photograph 1.2 lock on polls open and close switch

Photograph 1.3 lock on results cartridge door

Photograph 1.4 lock on transportation case post-election

Summary Finding: During the conducting of this analysis, the ELECTronic 1242 Voting System provided acceptable ballot security procedures and impoundment of ballots to prevent tampering with or substitution of any ballots or ballot cards. It also provided acceptable password management and restriction of access to administrative functions. Therefore, I conclude the ELECTronic 1242 Voting Systems meet the requirements of Section 3031.7(12) of the Pennsylvania Election Code.

5.0 CERTIFICATION FOR USE

The ELECTronic 1242 Voting Systems, certified for use in the Commonwealth of Pennsylvania and presented for examination, meet the requirements of Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 – 3031.22. As the Examiner, I recommend the voting system documented in Section 2.0 of this report be certified for use in the Commonwealth of Pennsylvania. I also recommend that version 5M1 of the ELECTronic 1242 be re-certified for use in the Commonwealth.

1.0 INTRODUCTION

The primary purpose of the examination is to confirm that the Danaher Controls, Inc. ELECTronic 1242 Voting System (hereafter referred to as the ELECTronic 1242 Voting System) meets the requirements of Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 – 3031.22. This examination is being performed per the direction of the Secretary of the Commonwealth, acting through the Pennsylvania Department of State, Bureau of Commissions, Elections and Legislation. This examination will commence on February 28, 2012 at the following location:

Commonwealth Keystone Building
Hearing Room 1
400 North Street
Harrisburg, Pennsylvania

The daily duration of this examination will be from 9:00 A.M. until 5:00 P.M. Eastern Standard Time unless a representative of the Secretary of the Commonwealth requests an extension, suspension, or a halt in testing.

1.0 References

The documents listed below were used in the development of the Test Protocol.

- Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 – 3031.22
- Federal Election Commission 2002 Voting Systems Standards

1.1 Terms and Abbreviation

This subsection lists terms and abbreviations relevant to this examination

“ADA” – Americans with Disabilities Act

“COTS” – Commercial Off-The-Shelf

“Department” – Pennsylvania Department of State

“DRE” – Direct Recording Electronic

“EAC” – Election Assistance Commission

“EMS” – Election Management System

“Examiner” – The examiner appointed by the Secretary of the Commonwealth to conduct the examination

“FEC” – Federal Election Commission

“ITA” – Independent Testing Authority

“PA” – The Commonwealth of Pennsylvania

“Pennsylvania Election Code” - Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 – 3031.22

“Secretary” – The Secretary of the Commonwealth

“TDP” – Technical Data Package

“VSS” – Federal Election Commission 2002 Voting System Standards

“VVSG” – Election Assistance Commission 2005 Voluntary Voting System Guidelines

1.2 Background

The ELECTronic 1242 Voting System was certified for use in the Commonwealth of Pennsylvania on November 15, 2005 after an examination conducted pursuant to the Pennsylvania Election Code. Two additional modifications were added after the original examination. These modifications are considered minor in nature and will also be examined during the examination. The Danaher 1242 Voting System has been in use by Pennsylvania counties since its initial certification. Pursuant to section 1105-A of the Pennsylvania Election Code, 25 P.S. § 3031.5, a group of Pennsylvania voters formally requested that the Secretary conduct an examination of the ELECTronic 1242 Voting System. The Secretary granted the request.

The Test Protocol was developed to ascertain whether the certified electronic voting system complies with the requirements set forth in the Pennsylvania Election Code.

2.0 TEST ITEMS

This section contains detailed descriptions of the items tested during the examination, including all software, hardware, and peripherals, both proprietary and COTS, and any test support equipment or materials necessary for test performance. The following diagram illustrates the Danaher 1242 Voting System requirements.

2.1 Software

This subsection contains a listing of the software and firmware being evaluated.

Table 2.1 Software/Firmware

Component Name	Version	Unique Identifier (digital signature or hash value)
Guardian Election Management System	3.0.1	Not Calculated
ELECTronic 1242 Firmware	5M2	3693d6627ff066508a4009d34fe52a608d51e080
GT Audio	1.0.0	Not Calculated
Guardian Reports	4.0.0	Not Calculated
Reader_USB	3.0.1	Not Calculated
Display PC	3.0.1	Not Calculated
DB Upgrade	3.0.1	Not Calculated
MCRP (Memory Cartridge Reader Programmer) – USB Firmware	1.09	Not Calculated

2.2 Hardware

This subsection contains a listing of the hardware being evaluated.

Table 2.2 Hardware

Component Name	Model Number	Serial Number	Description
ELECTronic 1242 Electronic Voting Machine (EVM)	1242	019191, 019192, 019193, 019195	A Direct Recording Electronic (DRE) Voting System used at the precinct level.
Memory Cartridge 5M	---	---	---
Memory Cartridge Reader/Writer Programmer Device (MCRP-USB)	---	---	A device used for uploading election definition data and downloading post-election data from a memory cartridge.
ADA Keypad	---	---	ADA Keypad comprised mainly of 6 tactile switches, connector cable, a Braille overlay, a printed circuit board and an audio jack.
Windows Based Computer	---	---	---
Plotter	---	---	---
Laser Printer	---	---	---
Head-Set	---	---	---

2.3 Peripherals

This subsection contains detailed descriptions of optional equipment used by the system being evaluated.

Table 2.3 Peripherals

Part Name	Model Number	Revision Number	Description
Desktop Printer	TBD	TBD	COTS Printer to print EMS reports

2.4 Test Support Equipment/Materials

This subsection contains detailed descriptions of the test support equipment and materials needed to perform the required testing.

The Examiner will provide a tape measure (to be used in Test Case 1), Test Execution Logs, and a digital camera for test documentation. The examination will be video recorded by the Department.

The voting system manufacturer must provide an EMS system currently certified for use in Pennsylvania loaded with the closed primary and general-election definitions (Appendix A). These election definitions are the ballot configurations that will be used throughout the examination. The manufacturer is responsible for providing the Department and the Examiner with technical staff to support the examination. The manufacturer must provide three precinct-tabulation devices for each voting system being examined. The manufacturer must be prepared to load the firmware for each precinct tabulation device. The Department will also require manufacturer to configure the precinct tabulation devices as they would be in the precinct on Election Day, including seals and locks. The manufacturer must be prepared to print pre-election reports, precinct results reports, audit logs, and post-election reports.

3.0 TEST MATERIALS

This section contains a detailed description of all materials made available to Examiner for the examination.

3.1 Technical Data Package

This subsection lists all manufacturer provided documentation that is relevant to the system being tested.

Table 3.1 Documentation

Document Name	Revision	Issue Date

3.2 Third Party Test Reports

This subsection lists the reports provided by third party entities that are relevant to the system being evaluated and the test engagement.

Table 3.2 Third Party Test Reports

Report Title	Description	Report No.	Issue Date
“Hardware Testing of the Danaher Controls ELECTronic 1242 Election Voting Machine (EVM)”	Hardware testing results (operating and non-operating).	51452-01	March 22, 2005
“47 CFR Part 15, Subpart B, Class B Testing on the ELECTronic 1242 Election Voting Machine”	FCC testing results.	51452-02	March 14, 2005
“Hardware Testing of the Danaher Controls Memory Cartridge Reader/Writer Programmer Device (MCRP)”	Hardware testing results (operating and non-operating).	51452-03	April 20, 2005
“47 CFR Part 15, Subpart B, Class B Testing on the ELECTronic 1242 Memory Cartridge Reader/Writer Programmer Device”	FCC testing results.	51452-04	April 14, 2005

3.3 Previous Test Results

This subsection describes the results of any previous testing performed by the Department that are relevant to the examination and the system being evaluated.

Table 3.3 Previous Test Results

Report Title	Description	Revision	Issue Date
Danaher Controls, ELECTronic 1242 Voting System	PA Examination	1.0	9/2005

4.0 TEST SPECIFICATIONS

This section contains a detailed description of the procedures to be followed during test setup and preparation.

The examination of the voting system will occur in an environmentally controlled room. The room will be configured such that the Department, the Examiner, and the voting system manufacturer have their own independent work areas. The public will be allowed to observe the examination, but may not comment or interact with either the employees of the Department, the Examiner, or the voting system manufacturer, at any time. The manufacturer will be allotted time and space to stage the voting system prior to the examination. This time and space will be determined between the Department and the manufacturer in advance of the examination date. Once the manufacturer informs the Department that the voting system is properly set up, the Examiner will provide the manufacturer with the firmware/software for the precinct tabulation device, submitted to the Department from the trusted source. The manufacturer will load the firmware/software on to the required media for installation onto the precinct tabulation device and install the firmware/software onto the precinct tabulation device before commencement of the examination. Once each precinct tabulation device is loaded with the firmware/software, the manufacturer will not be allowed access to the internal components of the devices without the consent of the Department or the Examiner. If the examination is suspended, the precinct tabulation devices will be secured in a manner to ensure control of the test environment. If, at any point, the Department or the Examiner determines that the control of the test environment has been compromised, all firmware/software will be reloaded on the precinct tabulation devices.

The voting system manufacturer shall set up the precinct tabulation devices as they would be in the precinct on Election Day, minus the locks and seals. The locks and seals will be installed and evaluated at a later time in the examination.

The Examiner will maintain photographic and written documentation of the examination. This will include, but is not limited to, photographs of the firmware/software installation, test execution notes and observations, photographs of the test setup, and collection of test data. The Department will video record the examination.

5.0 TEST PROCEDURES

This section contains a detailed description of the test sequence, test procedures and expected results.

The test cases for this examination are contained in Appendix B of this Test Protocol. All steps of the tests cases contain an expected result to provide objective pass/fail criteria. There are no dependencies for execution of the test cases. The test cases have been divided into four main areas for execution: (1) Review; (2) Targeted Functionality; (3) System Integration; and (4) Penetration Analysis. -The Review area of this re-examination will not be performed on-site during the set dates of the re-examination. The Review area of testing includes documentation review of third-party reports and review of the manufacturer's TDP. All other areas of testing will be performed on-site during the examination. The test sequence for this examination will be as follows:

Review:

- 1107-A(11), 25 P.S. § 3031.7(11) Suitably Designed, Constructed in Workmanlike Manner of Durable Material, Safely and Efficiently Useable, Capable of Absolute Accuracy
- 1107-A(13), 25 P.S. § 3031.7(13) Record Correctly, Computes and Tabulates Accurately
- 1107-A(14), 25 P.S. § 3031.7(14) Safely Transportable
- 1107-A(15), 25 P.S. § 3031.7(15) Voter May Readily Learn to Operate

Targeted Functionality Test Cases:

- Test Case Identifier: 01 – 1107-A(1), 25 P.S. § 3031.7(1) Voter Secrecy (Regular Voter)
- Test Case Identifier: 01 – 1107-A(1), 25 P.S. § 3031.7(1) Voter Secrecy (ADA Voter)
- Test Case Identifier: 02 – 1107-A(2), 25 P.S. § 3031.7(2) Selection of Candidates and Questions by Voter (Regular/ADA)
- Test Case Identifier: 03 – 1107-A(3), 25 P.S. § 3031.7(3) Straight Party and Pennsylvania Method
- Test Case Identifier: 04 – 1107-A(4), 25 P.S. § 3031.7(4) Straight Party and Write-In
- Test Case Identifier: 05 – 1107-A(5), 25 P.S. § 3031.7(5) Selection of Candidate and Write-in
- Test Case Identifier: 07 – 1107-A(7), 25 P.S. § 3031.7(7) Attempt to Over Vote Contests and Questions (Regular/ADA)
- Test Case Identifier: 10 – 1107-A(10), 25 P.S. § 3031.7(10) Ballot Review and Change (Regular/ADA)
- Test Case Identifier: 16 – 1107-A(16), 25 P.S. § 3031.7(16) Public Counter, No Reopening of Polls, Media Security with Tamper Proof Locks and Zero Proof and Tally Reports

System Integration Test Cases:

- Test Case Identifier: 04, 06, 08, 09, Permanent Physical Record, and Statistical Sample – 1107-A(4), 25 P.S. § 3031.7(4) Enables Voting for Legal Combinations; 1107-A(6), 25 P.S. § 3031.7(6) Permits Voting for as Many Candidates as Entitled, Permits Voting For or Against Questions, Precludes Voting for Unauthorized Candidates or Questions; 1107-A(8), 25 P.S. § 3031.7(8) Precludes Multiple Voting and Tabulating Multiple Votes; 1107-A(9), 25 P.S. § 3031.7(9) Permits Voter at Primary to Vote Only for Candidates in Party of Registration, Any Candidate for Nonpartisan Nomination, and For Any Entitled Question; 1101-A, 25 P.S. § 3031.1 Provides for Permanent Physical Record of Each Vote Cast; and 1117-A, 25 P.S. § 3031.17 Statistical Sample

Penetration Analysis Test Cases:

- Test Case Identifier: 12 – 1107-A(12), 25 P.S. § 3031.7(12) Acceptable Ballot Security Procedures and Impoundment of Ballots

6.0 TEST DATA

This section contains a detailed description of the test election definitions and ballot logic being exercised.

The election definitions being used for this examination are provided in Appendix A of this Test Protocol. A predefined set of election parameters are included in the election definitions. Both the general election and the closed primary election definitions provide the voting variations, geographic subdivisions, parties, supported languages and test voting pattern with results being tested. The only languages required for this examination are English and Spanish. The Department provided the Spanish translation. Each test voting pattern provides the input method and device. For all Write-In selections, the name will be input as “John Doe.” For multiple Write-In selections, the name will be appended with the character “I” for the number of Write-In selections (*i.e.*, “John Doe I,” “John Doe II,” “John Doe III,” and “John Doe IIII” in a “Vote for Four” contest with four write-ins).

6.1 Data Recording

This subsection contains a detailed description of the procedures to be followed during test execution and data collection.

All test data produced during this examination is the property of the Department. The output test data will be collected and stored in an appropriate manner as to allow for data analysis. Actual results from executed tests will be recorded in real-time in Test Execution Logs.

6.2 Data Evaluation

The Examiner will evaluate all test results against the expected results set forth in the test cases provided in Appendix B. The acceptable range for system performance and the expected results is derived from the test designers experience and expertise. If an expected result is not achieved, an evaluation will be performed as to “why” the test or test step did not produce the expected results. This evaluation will consider test error, invalid expectations, and system performance. Failure to achieve the expected results does not constitute a test failure. A test failure only occurs when the “Criteria for Evaluation of Test Results,” as set forth in the test cases, are not achieved for a specific test.

APPENDIX A
ELECTION DEFINITIONS

Election Definition: Pennsylvania Certification Closed Primary Election

Primary Election Description:

A closed primary election for 2 parties in 3 precincts. This election contains 35 contests compiled into 6 ballot styles. Each ballot style contains 15 contests. The voting variations supported in a primary election by the Commonwealth of Pennsylvania are defined in this election. The voting variations are as follows:

- Partisan contest
- Non-Partisan
- Primary Presidential delegation nominations
- Write-In voting
- N of M Contest
- Cross-Party Filed Candidates

This closed primary election was designed to functionally test the handling of multiple ballot styles across geographical subdivisions, support for two languages, and support for common primary specific voting variations.

Configuration:

EMS computer loaded with software certified for use in Pennsylvania to create the following configuration:

Name: Pennsylvania Certification Closed Primary Election

Voting Devices: 1 machine for each precinct

Precincts: Precinct 1, Precinct 2, Precinct 3

Parties: Republican, Democrat

Languages: English, Spanish

Totals Contests: 35

Contests as follows:

Election Definition: Pennsylvania Certification General Election

General Election Description:

A general election combining presidential year contests, non-presidential year contests, and municipal contests into a single election held in 3 precincts one of which is a split precinct on the “Representative in the General Assembly” contests. This election contains 21 contests compiled into 4 ballot styles (excluding language styles). 15 of the contests are in all ballot styles. The other 6 are split between at least 2 of the precincts with a maximum of 21 different contests spread across the 3 precincts. All voting variations supported by the Commonwealth of Pennsylvania are defined in this election. The voting variations are as follows:

- Partisan contest
- Non-Partisan contest
- N of M contest
- Referendum contest
- Retention Contest
- Straight Party voting
- Write-In voting
- Split Precinct
- Cross-Party Nominated

This general election was designed to functionally test the handling of multiple ballot styles across geographical subdivisions, support for English and Spanish languages, support for all Pennsylvania voting variations, and audio support for English and Spanish.

Configuration:

EMS computer loaded with software certified for use in Pennsylvania to create the following configuration:

Name: Pennsylvania Certification General Election

Voting Devices: 1 machine for each precinct

Precincts: Precinct 1, Precinct 2 split into 2a and 2b, Precinct 3

Parties: Republican, Democratic, Green, Libertarian

Languages: English, Spanish

Totals Contests: 21

Contests as follows:

APPENDIX B - TEST CASES

Test Case Identifier: 01 – 25 P.S. § 3031.7(1) Voter Secrecy (ADA Voter)	
PA ST 25 P.S. § 3031.7 Requirement:	<i>(1) Provides for voting in absolute secrecy and prevents any person from seeing or knowing for whom any voter, except one who has received or is receiving assistance as prescribed by law, has voted or is voting.</i>
Test Objective: To determine if a voters selections input using an ADA device can be observed during the act of voting, or once a vote has been cast.	Test Configuration: Precinct tabulation device configured as described for normal election day operation by Pennsylvania procedures and or the device manufacturer for an ADA voter. A marker is placed 12 feet (measured from the lowest point of the devices voting surface to the floor) directly behind the center of the voting device. From that marker, another marker is placed 12 feet to the right side and the left side. The side distance observation points should be approximately 17 feet. See Step 1000 for a layout diagram. The ADA voter will be positioned in the center of the tabulation device with a site line of 4 feet. See Step 1001.
Test Equipment:	Standard 15+ foot tape measure
Special Procedural Requirements:	Two roles are required for this test case. An ADA Voter role and an observer role. The ADA voter will be positioned with a line of site at 48 inches. The observation must be made by an individual between the heights 68 inches and 71 inches.
Assumptions:	An election is loaded on the device and the polls are open, ready for voting.
Step	Description
1000	<p>Layout Diagram:</p> <p>Verify all measurements.</p> <p><i>Expected:</i> Center measurement is 12 feet and the side distance observation points are approximately 17 feet.</p> <p><i>Actual:</i> Measured 12 feet.</p>
1001	<p>ADA Voter Position:</p>

	<p>Verify all measurements.</p> <p><i>Expected:</i> Center measurement is 12 feet and the side distance observation points are approximately 17 feet with a voter line of sight at 48 inches.</p> <p><i>Actual:</i> Measured line of site at 48 inches.</p>
1010	<p>Observer Role - Activate a ballot for ADA voting.</p> <p><i>Expected:</i> Ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> Ballot is presented and vote selections can be input.</p>
1020	<p>ADA Voter Role - Select the candidate corresponding to the upper most left hand position of the ballot presentation.</p> <p>Observer Role - Attempt to ascertain visually, the voters input from the right most position, the center position, and the left most position</p> <p>ADA Voters Role - Use the supplied method to advance the ballot to a cast vote state. The only selection should be the upper most left hand position. All other selections are to be under voted.</p> <p><i>Expected:</i> The Observer cannot determine the Voter's input selections.</p> <p><i>Actual:</i> Observer reported no observations.</p>
1030	<p>ADA Voter Role - Select the candidate corresponding to the upper most right hand position of the ballot presentation.</p> <p>Observer Role - Attempt to ascertain, both audibly and visually, the voters input from the right most position, the center position, and the left most position</p> <p>ADA Voters Role - Use the supplied method to advance the ballot to a cast vote state. The only selection should be the upper most right hand position. All other selections are to be under voted.</p> <p><i>Expected:</i> The Observer cannot determine the Voter's input selections.</p> <p><i>Actual:</i> Observer reported no observations.</p>
1040	<p>ADA Voter Role - Select the candidate corresponding to the lower most left hand position of the ballot presentation.</p> <p>Observer Role - Attempt to ascertain, both audibly and visually, the voters input from the right most position, the center position, and the left most position</p> <p>ADA Voters Role - Use the supplied method to advance the ballot to a cast vote state. The only selection should</p>

	<p>be the lower most left hand position. All other selections are to be under voted.</p> <p><i>Expected:</i> The Observer cannot determine the Voter's input selections.</p> <p><i>Actual:</i> Observer reported no observations.</p>
<p>1050</p>	<p>ADA Voter Role - Select the candidate corresponding to the lower most right hand position of the ballot presentation.</p> <p>Observer Role - - Attempt to ascertain, both audibly and visually, the voters input from the right most position, the center position, and the left most position</p> <p>ADA Voters Role - Use the supplied method to advance the ballot to a cast vote state. The only selection should be the lower most right hand position. All other selections are to be under voted.</p> <p><i>Expected:</i> The Observer cannot determine the Voter's input selections.</p> <p><i>Actual:</i> Observer reported no observations.</p>
<p>Criteria for Evaluation of the Test Results: The observer must not be able to determine the voter's selection from any observation position or any voter selection surface position.</p>	

Test Case Identifier: 01 – 25 P.S. § 3031.7(1) Voter Secrecy (Regular Voter)	
PA ST 25 P.S. § 3031.7 Requirement:	(1) Provides for voting in absolute secrecy and prevents any person from seeing or knowing for whom any voter, except one who has received or is receiving assistance as prescribed by law, has voted or is voting.
Test Objective: To determine if a voters selections can be observed during the act of voting, or once a vote has been cast.	Test Configuration: Precinct tabulation device configured as described for normal election day operation by Pennsylvania procedures and or the device manufacturer. A marker is placed 12 feet (measured from the lowest point of the devices voting surface to the floor) directly behind the center of the voting device. From that marker, another marker is placed 12 feet to the right side and the left side. The side distance observation points should be approximately 17 feet. See step 1000 for a layout diagram.
Test Equipment:	Standard 15+ foot tape measure
Special Procedural Requirements:	Two roles are required for this test case. A Voter role and an observer role. The observation must be made by an individual between the heights of 5 feet 8 inches and 5 feet 11 inches.
Assumptions:	An election is loaded on the device and the polls are open, ready for voting.
Step	Description
1000	<p>Layout Diagram:</p> <p>Verify all measurements.</p> <p><i>Expected:</i> Center measurement is 12 feet and the side distance observation points are approximately 17 feet.</p> <p><i>Actual:</i> Measured 12 feet.</p>

<p>Criteria for Evaluation of the Test Results: The observer must not be able to determine the voter's selection from any observation position or any voter selection surface position.</p>	

Test Case Identifier: 02 – 25 P.S. § 3031.7(2) Selection of Candidates and Questions by Voter (Regular/ADA)	
PA ST 25 P.S. § 3031.7 Requirement:	(2) Provides facilities for voting for such candidates as may be nominated and upon such questions as may be submitted.
Test Objective: To determine if a voter has the ability to select candidates and questions.	Test Configuration: Precinct tabulation device configured as described for normal election day operation by Pennsylvania procedures and/or the device manufacturer.
Test Equipment:	None
Special Procedural Requirements:	None
Assumptions:	An election is loaded on the device and the polls are open, ready for voting.
Step	Description
1000	<p>Activate a ballot for voting</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was presented.</p>
1010	<p>Select the first candidate in the first partisan contest excluding a straight party contest.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for the first candidate in the first partisan contest excluding a straight party contest.</p> <p><i>Actual:</i> Selection was made for James Collins.</p>
1020	<p>Use the designated method to advance the ballot to the first “N of M” contest. Select the first “N” candidates in the contest. (e.g. in a Vote for Two contest the first two candidates would be selected).</p> <p><i>Expected:</i> The precinct tabulation device advances to the first “N of M” contest. Once selected the precinct tabulation device displays or provides an indication of a vote for the first “N” candidates in the first “N of M” contest.</p> <p><i>Actual:</i> Selections were made for Mary L. Daniel and Jack “Duke” Brodisky.</p>
1030	<p>Use the designated method to advance the ballot to the first “Question” contest. Select the “Yes” option in the contest.</p> <p><i>Expected:</i> The precinct tabulation device advances to the first “Question” contest. Once selected the precinct tabulation device displays or provides an indication of a vote selection for the “Yes” option in the first “Question” contest.</p> <p><i>Actual:</i> Selection was made of “Yes”.</p>
1040	<p>Use the designated method to advance the ballot to the second “Question” contest. Select the “No” option in the contest.</p> <p><i>Expected:</i> The precinct tabulation device advances to the second “Question” contest. Once selected the precinct tabulation device displays or provides an indication of a vote selection for the “No” option in the second “Question” contest.</p>

	<p><i>Actual:</i> Selection was made for “No”.</p>
1050	<p>Use the designated method to advance the “Ballot Review”. Observe the “Ballot Review” to see if the above selections are displayed. Use the designated method to cast the voted selections.</p> <p><i>Expected:</i> The precinct tabulation device advances to the “Ballot Review” screen. After review and ballot is cast successfully.</p> <p><i>Actual:</i> Ballot was cast successfully for all selections.</p>
1060	<p>Repeat steps 1000- 1050 from above using an ADA input device.</p> <p><i>Expected:</i> Repeat 1000 <input checked="" type="checkbox"/> Repeat 1010 <input checked="" type="checkbox"/> Repeat 1020 <input checked="" type="checkbox"/> Repeat 1030 <input checked="" type="checkbox"/> Repeat 1040 <input checked="" type="checkbox"/> Repeat 1050 <input checked="" type="checkbox"/></p> <p><i>Actual:</i> All steps were successfully repeated was audio session.</p>
1070	<p>Close the polls and print the closed polls report tape.</p> <p><i>Expected:</i> The polls closed and a report is printed.</p> <p><i>Actual:</i> The polls closed and report printed.</p>
1080	<p>Review the closed polls report to ensure all selections input above are recorded and reported correctly.</p> <p><i>Expected:</i> The closed polls report presents the accumulated totals for the selections input above.</p> <p><i>Actual:</i> All selections were accurately reported on the results report.</p>
<p>Criteria for Evaluation of the Test Results: The intended selections input above are recorded, stored, and reported as input by the tester.</p>	

Test Case Identifier: 03 – 25 P.S. § 3031.7(3) Straight Party and Pennsylvania Method	
PA ST 25 P.S. § 3031.7 Requirements:	<i>(3) Permits each voter, at other than primary elections, to vote a straight political party ticket by one mark or act and, by one mark or act, to vote for all the candidates of one political party for presidential electors and, by one mark or act, to vote for all the candidates of one political party for every office to be voted for, and every such mark or act shall be equivalent to and shall be counted as a vote for every candidate of the political party so marked including its candidates for presidential electors, except with respect to those offices as to which the voter has registered a vote for individual candidates of the same or another political party or political body, in which case the automatic tabulating equipment shall credit the vote for that office only for the candidate individually so selected, notwithstanding the fact that the voter may not have individually voted for the full number of candidates for that office for which he was entitled to vote.</i>
Test Objective: To determine if the voting system supports straight party voting and the Pennsylvania Method.	Test Configuration: Precinct tabulation device configured as described for normal election day operation by Pennsylvania procedures and/or the device manufacturer.
Test Equipment:	None
Special Procedural Requirements:	None
Assumptions:	An election is loaded on the device and the polls are open, ready for voting.
Step	Description
1000	<p>Activate a ballot for voting.</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was presented.</p>
1010	<p>Select the option for the first party selection of the straight party.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for the first party selection in the straight party contest.</p> <p><i>Actual:</i> Republican was selected.</p>
1020	<p>Use the designated method to advance through the ballot to each partisan contest. Observe all partisan contests for the indication of a voter selection for all partisan candidates associated with the first straight party selection.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for all the partisan candidates in each contest associated with the first straight party selection.</p> <p><i>Actual:</i> All Republican candidates were selected.</p>
1030	<p>Use the designated method to advance through the remainder of the ballots advancing to the ballot review screen. Observe the selection in the ballot review observing only the partisan contests associated with the first straight party selections are present. Use the designated method to cast the voted ballot.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for only the partisan contests associated with the first straight party selection. After review the ballot is cast successfully.</p>

	<p><i>Actual:</i> All republican candidates were selected and under votes for non-partisan contests.</p>
1040	<p>Activate a ballot for voting.</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was presented.</p>
1050	<p>Select the option for the second party selection of the straight party.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for the second party in the straight party contest.</p> <p><i>Actual:</i> Democrat was selected.</p>
1060	<p>Use the designated method to advance through the ballot to each partisan contest. Observe all partisan contests for an indication of a voter selection for all partisan candidates associated with the second straight party selection.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for all the partisan candidates in each contest associated with the second straight party selection.</p> <p><i>Actual:</i> Democratic candidates were selected.</p>
1070	<p>Use the designated method to retreat through the ballot selections to the first “N of M” contest. Select the first partisan candidate that is not the party associated with the second straight party selection. Leave the remainder of the selections under voted.</p> <p><i>Expected:</i> “N” candidates for the party of the second straight party selections should display or provide an indication of the non-selection. The selected candidate should be the only selection displayed or indicated.</p> <p><i>Actual:</i> Mary L. Daniel was selected and all other candidates were deselected.</p>
1080	<p>Use the designated method to retreat through the ballot to the “Straight Party” contest. Observe the selection for the second straight party selection.</p> <p><i>Expected:</i> The second straight party selections should be displayed or an indication given as selected.</p> <p><i>Actual:</i> Democrat was selected.</p>
1090	<p>Use the designated method to advance through the remainder of the ballot advancing to the ballot review. Review the selections in the ballot review to verify that the partisan contests associated with the second straight party selections are present with the exception of the first “N of M” contest. Use the designated method to cast the voted ballot.</p> <p><i>Expected:</i> The precinct tabulation device displays or indicates the selection for the partisan contests associated</p>

	<p>with the second straight party selection for all contests except the first “N of M” contest. The first “N of M” contest displays or indicates the selection of the first candidate that is not associated with the second straight party selection. After review the ballot is cast successfully.</p> <p><i>Actual:</i> The ballot review screen displayed the correct selections.</p>
1100	<p>Activate a ballot for voting.</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was displayed.</p>
1110	<p>Select the option for the first party selection of the straight party.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for the first party in the straight party contest.</p> <p><i>Actual:</i> Republican was selected.</p>
1120	<p>Use the designated method to advance through the ballot to each partisan contest. Observe all partisan contests for an indication of a voter selection for all partisan candidates associated with the first straight party selection.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for all the partisan candidates in each contest associated with the first straight party selection.</p> <p><i>Actual:</i> All Republican candidates were selected.</p>
1130	<p>Use the designated method to retreat through the ballot selections to the first “N of M” contest. Select the first partisan candidate that is associated with the first straight party selection. Leave this contest and the remainder of the selections under voted.</p> <p><i>Expected:</i> “N” candidates for the party of the first straight party selections should display or provide an indication of the non-selection. The selected candidate should be the only selection displayed or indicated.</p> <p><i>Actual:</i> Mary L. Daniel and all other candidates were deselected.</p>
1140	<p>Use the designated method to advance through the remainder of the ballot advancing to the ballot review. Review the selections in the ballot review to verify that the partisan contests associated with the first straight party selections are present with the exception of the first “N of M” contest. Use the designated method to cast the voted ballot.</p> <p><i>Expected:</i> The precinct tabulation device displays or indicates the selection for the partisan contests associated with the first straight party selection for all contests except the first “N of M” contest. The first “N of M” contest displays or indicates the selection of the second candidate that is associated with the first straight party selection and an under vote. After review the ballot is cast successfully.</p> <p><i>Actual:</i> All selections were indicated.</p>
1150	<p>Repeat steps 1000- 1150 from above using an ADA input device.</p>

	<p><i>Expected:</i> Repeat 1000 <input checked="" type="checkbox"/></p> <p>Repeat 1010 <input checked="" type="checkbox"/></p> <p>Repeat 1020 <input checked="" type="checkbox"/></p> <p>Repeat 1030 <input checked="" type="checkbox"/></p> <p>Repeat 1040 <input checked="" type="checkbox"/></p> <p>Repeat 1050 <input checked="" type="checkbox"/></p> <p>Repeat 1060 <input checked="" type="checkbox"/></p> <p>Repeat 1070 <input checked="" type="checkbox"/></p> <p>Repeat 1080 <input checked="" type="checkbox"/></p> <p>Repeat 1090 <input checked="" type="checkbox"/></p> <p>Repeat 1100 <input checked="" type="checkbox"/></p> <p>Repeat 1110 <input checked="" type="checkbox"/></p> <p>Repeat 1120 <input checked="" type="checkbox"/></p> <p>Repeat 1130 <input checked="" type="checkbox"/></p> <p>Repeat 1140 <input checked="" type="checkbox"/></p> <p>Repeat 1150 <input checked="" type="checkbox"/></p> <p><i>Actual:</i> All steps were successfully repeated using the audio session.</p>
<p>1160</p>	<p>Close the polls and print the closed polls report tape.</p> <p><i>Expected:</i> The polls closed and a report is printed.</p> <p><i>Actual:</i> The polls were closed and results report printed.</p>
<p>1170</p>	<p>Review the closed polls report to ensure all selections input above are recorded and reported correctly.</p> <p><i>Expected:</i> The closed polls report presents the accumulated totals for the selections input above.</p> <p><i>Actual:</i> All selections were accurately reported on the results report.</p>
<p>Criteria for Evaluation of the Test Results: The intended selections input above are recorded, stored, and reported as input by the tester. The functionality of selecting a candidate of the same party or of a different party of the straight party selection de-selects all candidates for the straight party vote.</p>	

Test Case Identifier: 04 – 25 P.S. § 3031.7(4) Straight Party and Write-In	
PA ST 25 P.S. § 3031.7 Requirements:	<i>(4) Permits each voter, at other than primary elections, to vote a ticket selected from the nominees of any and all political parties, from the nominees of any and all political bodies, and from any persons whose names are not in nomination and do not appear upon the official ballot.</i>
Test Objective: To determine if the voting system supports straight party voting and write-in.	Test Configuration: Precinct tabulation device configured as described for normal election day operation by Pennsylvania procedures and/or the device manufacturer.
Test Equipment:	None
Special Procedural Requirements:	None
Assumptions:	An election is loaded on the device and the polls are open, ready for voting.
Step	Description
1000	<p>Activate a ballot for voting</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was presented.</p>
1010	<p>Select the option for the first party selection of the straight party.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for the first party selection in the straight party contest.</p> <p><i>Actual:</i> Republican was selected.</p>
1020	<p>Use the designated method to advance through the ballot to each partisan contest. Observe all partisan contests for a display or indication of a voter selection for all partisan candidates associated with the first straight party selection.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for all the partisan candidates in each contest associated with the first straight party selection.</p> <p><i>Actual:</i> All Republican candidates were selected.</p>
1030	<p>Use the designated method to advance through the remainder of the ballot advancing to the ballot review screen. Observe the selection in the ballot review observing only the partisan contests associated with the first straight party selections are present. Use the designated method to cast the voted ballot.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of the selection for only the partisan contests associated with the first straight party selection. After review the ballot is cast successfully.</p> <p><i>Actual:</i> The ballot review screen displayed the selections for all republican candidates and no selection for non-partisan contests.</p>
1040	<p>Activate a ballot for regular voting</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p>

	<i>Actual:</i> The ballot was presented.
1050	<p>Select the option for the first party selection of the straight party.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection associated with the first party selection in the straight party contest.</p> <p><i>Actual:</i> Republican was selected.</p>
1060	<p>Use the designated method to advance to the first partisan contest. Select the write-in option. Input John Doe as the write-in name.</p> <p><i>Expected:</i> The precinct tabulation advances to the first partisan contest and allows the input of the “Write-In” candidate John Doe.</p> <p><i>Actual:</i> John Doe was input as a write-in candidate for President of the United States.</p>
1070	<p>Use the designated method to advance to the ballot review screen. Observe the selections associated with the first straight party selection with the exception of the first partisan contest. Use the designated method to cast the voted ballot.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection associated with the first party selection in the straight party contest with the exception of the first partisan contest which should indicate the write-in input of John Doe.</p> <p><i>Actual:</i> Republican candidates in all partisan races were selected with the exception of John Doe as a write-in for President of the United States</p>
1080	<p>Activate a ballot for regular voting</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was presented.</p>
1090	<p>Select the option for the first party selection of the straight party.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection associated with the first party selection in the straight party contest.</p> <p><i>Actual:</i> Republican was selected.</p>
1100	<p>Use the designated method to advance to the first “Question” contest. Select the “Yes” option. Attempt to over vote by selecting the “No” option. Observe the action of attempting to select the second option.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of an attempt to over vote. The precinct tabulation device might disallow the selection and not display any communication.</p> <p><i>Actual:</i> The device toggled so test steps were executed to exercise overvote capture in the N of M race. Both were successful.</p>

<p>1110</p>	<p>Repeat steps 1000- 1100 from above using an ADA input device.</p> <p><i>Expected:</i> Repeat 1000 <u> X </u> Repeat 1010 <u> X </u> Repeat 1020 <u> X </u> Repeat 1030 <u> X </u> Repeat 1040 <u> X </u> Repeat 1050 <u> X </u> Repeat 1060 <u> X </u> Repeat 1070 <u> X </u> Repeat 1080 <u> X </u> Repeat 1090 <u> X </u> Repeat 1100 <u> X </u></p> <p><i>Actual:</i> All steps were repeated using an audio session.</p>
<p>1120</p>	<p>Close the polls and print the closed polls report tape.</p> <p><i>Expected:</i> The polls closed and a report is printed.</p> <p><i>Actual:</i> The polls were closed and the results report was printed.</p>
<p>1130</p>	<p>Review the closed polls report to ensure all selections input above are recorded and reported correctly.</p> <p><i>Expected:</i> The closed polls report presents the accumulated totals for the selections input above.</p> <p><i>Actual:</i> All selections were accurately reported on the results report.</p>
<p>Criteria for Evaluation of the Test Results: The intended selections input above are recorded, stored, and reported as input by the tester. The functionality of selecting a write-in candidate functions with a straight party selection.</p>	

Test Case Identifier: 05 – 25 P.S. § 3031.7(5) Selection of Candidate and Write-in	
PA ST 25 P.S. § 3031.7 Requirements:	
Test Objective: To determine if the voting system supports the selection of a candidate and a write-in candidate.	Test Configuration: (5) Permits each voter to vote for any person and any office for whom and for which he is lawfully entitled to vote, whether or not the name of such person appears upon the ballot as a candidate for nomination or election.
Test Equipment:	None
Special Procedural Requirements:	None
Assumptions:	An election is loaded on the device and the polls are open, ready for voting.
Step	Description
1000	<p>Activate a ballot for voting.</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was presented.</p>
1010	<p>Select the option for the first candidate in the first partisan contest.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for the first candidate selection in the first partisan contest.</p> <p><i>Actual:</i> James Collins and Arthur Remus were selected for President of the United States.</p>
1020	<p>Use the designated method to advance through the remainder of the ballot advancing to the ballot review screen. Observe the selection in the ballot review observing only the first candidate in the first partisan contest is selected. Use the designated method to cast the voted ballot.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of the selection for only the first candidate selection in first partisan contests. After review the ballot is cast successfully.</p> <p><i>Actual:</i> James Collins and Arthur Remus were the only selection displayed.</p>
1030	<p>Activate a ballot for voting.</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was presented.</p>
1040	<p>Select the option for a write-in candidate in the first partisan contest. Use the designed method to input “John Doe”.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for a write-in candidate.</p> <p><i>Actual:</i> John Doe was input for President of the United States.</p>

<p>1050</p>	<p>Use the designated method to advance through the remainder of the ballot advancing to the ballot review screen. Observe the selection in the ballot review observing only the write-in candidate in the first partisan contest is selected. Use the designated method to cast the voted ballot.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of the selection for only the write-in candidate “John Doe” in first partisan contests. After review the ballot is cast successfully.</p> <p><i>Actual:</i> John Doe was the only selection displayed.</p>
<p>1060</p>	<p>Activate a ballot for voting.</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was presented.</p>
<p>1070</p>	<p>Select the option for a write-in candidate in the first “N of M” contest. Use the designed method to input “John Doe” for all selections. Observe any activity to preclude the same input.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a duplicate vote selection for a write-in candidate. If no indication is provided then trace the ability to adjudicate the vote through the entire system. It may require the EMS component to verify.</p> <p><i>Actual:</i> John Doe and John Doe were input. It was traced through the EMS to adjudicate the duplicate inputs successfully.</p>
<p>1080</p>	<p>Repeat steps 1000- 1070 from above using an ADA input device.</p> <p><i>Expected:</i> Repeat 1000 __X__ Repeat 1010 __X__ Repeat 1020 __X__ Repeat 1030 __X__ Repeat 1040 __X__ Repeat 1050 __X__ Repeat 1060 __X__ Repeat 1070 __X__</p> <p><i>Actual:</i> All steps were repeated using an audio session.</p>
<p>1090</p>	<p>Close the polls and print the closed polls report tape.</p> <p><i>Expected:</i> The polls closed and a report is printed.</p> <p><i>Actual:</i> The polls were closed and the results report printed.</p>
<p>1100</p>	<p>Review the closed polls report to ensure all selections input above are recorded and reported correctly.</p> <p><i>Expected:</i> The closed polls report presents the accumulated totals for the selections input above.</p> <p><i>Actual:</i> All selections were accurately reported on the results report.</p>

Criteria for Evaluation of the Test Results: The intended selections input above are recorded, stored, and reported as input by the tester. The functionality of selecting a candidate and a write-in candidate functions.	

Test Case Identifier: 07– 25 P.S. § 3031.7(7) Attempt to Over Vote Contests and Questions (Regular/ADA)	
PA ST 25 P.S. § 3031.7 Requirements:	(7) If it is of a type that registers the vote electronically, the voting system shall preclude each voter from voting for more persons for any office than he is entitled to vote for or upon any question more than once.
Test Objective: To determine if the voting device allows over voting on contests and questions	Test Configuration: Precinct tabulation device configured as described for normal election day operation by Pennsylvania procedures and/or the device manufacturer.
Equipment:	None
Special Procedural Requirements:	None
Assumptions:	An election is loaded on the device and the polls are open, ready for voting.
Step	Description
1000	<p>Activate a ballot for voting.</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p> <p><i>Actual:</i> The ballot was presented.</p>
1010	<p>Select the first candidate in the first partisan “1 of 1” contest excluding a straight party contest.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of a vote selection for the first candidate in the first partisan “1 of 1” contest excluding a straight party contest.</p> <p><i>Actual:</i> James Collins and Arthur Remus were selected for President of the United States.</p>
1020	<p>Attempt to select the second candidate in the first partisan “1 of 1” contest ensure the contest is the same contest as voted in step 1010. Observe the action of attempting to place a second vote.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of an attempt to over vote. The precinct tabulation device might disallow the selection and not display any communication.</p> <p><i>Actual:</i> Calvin Marino and Keith Satterwhite were selected. The device requires a de-selection of a selected candidate to select another.</p>
1030	<p>Attempt to select the write-in option. Observe the action of attempting to input a write-in.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of an attempt to over vote. The precinct tabulation device might disallow the selection and not display any communication.</p> <p><i>Actual:</i> The device requires a de-selection of a selected candidate to select another.</p>
1040	<p>Use the designated method to advance the ballot to the first “N of M” contest. Select the first “N” candidates in the contest. (e.g. in a Vote for Two contest the first two candidates would be selected).</p> <p><i>Expected:</i> The precinct tabulation device advances to the first “N of M” contest. Once selected, the precinct tabulation device displays or provides an indication of a vote for the first “N” candidates in the first “N of M” contest.</p> <p><i>Actual:</i> Mary L. Daniel and Jack “Duke” Brodsky were selected.</p>

<p>1050</p>	<p>Attempt to select the “N +1” candidate in the first “N of M” contest ensure the contest is the same contest as voted in step 1030. Observe the action of attempting to place an over vote.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of an attempt to over vote. The precinct tabulation device might disallow the selection and not display any communication.</p> <p><i>Actual:</i> The device requires a de-selection of a selected candidate to select another.</p>
<p>1060</p>	<p>Use the designated method to advance the ballot to the first “Question” contest. Select the “Yes” option in the contest.</p> <p><i>Expected:</i> The precinct tabulation device advances to the first “Question” contest. Once selected, the precinct tabulation device displays or provides an indication of a vote for the “Yes” option in the first “Question” contest.</p> <p><i>Actual:</i> “Yes” was selected.</p>
<p>1070</p>	<p>Attempt to select the “No” option in the first “Question” contest ensure the contest is the same contest as voted in step 1050. Observe the action of attempting to place an over vote.</p> <p><i>Expected:</i> The precinct tabulation device displays or provides an indication of an attempt to over vote. The precinct tabulation device might disallow the selection and not display any communication.</p> <p><i>Actual:</i> The device requires a de-selection of a selected candidate to select another.</p>
<p>1080</p>	<p>Use the designated method to advance the “Ballot Review”. Observe the “Ballot Review” to see if the above selections are indicated. Use the designated method to cast the voted selections.</p> <p><i>Expected:</i> The precinct tabulation device advances to the “Ballot Review” screen. After review and ballot is cast successfully.</p> <p><i>Actual:</i> The selections were displayed correctly.</p>
<p>1090</p>	<p>Repeat steps 1000- 1080 from above using an ADA input device.</p> <p><i>Expected:</i> Repeat 1000 <u> X </u> Repeat 1010 <u> X </u> Repeat 1020 <u> X </u> Repeat 1030 <u> X </u> Repeat 1040 <u> X </u> Repeat 1050 <u> X </u> Repeat 1060 <u> X </u> Repeat 1070 <u> X </u> Repeat 1080 <u> X </u></p> <p><i>Actual:</i> All steps were repeated using an audio session.</p>
<p>1100</p>	<p>Close the polls and print the closed polls report tape.</p>

	<p><i>Expected:</i> The polls closed and a report is printed.</p> <p><i>Actual:</i> The polls were closed and the results report printed.</p>
<p>1110</p>	<p>Review the closed polls report to ensure all selections input above are recorded and reported correctly.</p> <p><i>Expected:</i> The closed polls report presents the accumulated totals for the selections input above.</p> <p><i>Actual:</i> All selections were accurately reported on the results report.</p>
<p>Criteria for Evaluation of the Test Results: The intended selections input above are recorded, stored, and reported as input by the tester. The attempts to select more persons than the vote for and any question more than once are unsuccessful.</p>	

Test Case Identifier: 10 – 25 P.S. § 3031.7(10) Ballot Review and Change (Regular ADA)	
PA ST 25 P.S. § 3031.7 Requirements:	(10) If it is of a type that registers the vote electronically, the voting system shall permit each voter to change his vote for any candidate or upon any question appearing on the official ballot up to the time that he takes the final step to register his vote and to have his vote computed. If it is of a type that uses paper ballots or ballot cards to register the vote and automatic tabulating equipment to compute such votes, the system shall provide that a voter who spoils his ballot may obtain another ballot; any ballot thus returned shall be immediately cancelled and at the close of the polls shall be enclosed in an envelope marked "Spoiled" which shall be sealed and returned to the county board.
Test Objective: To determine if the voting device allows the voter to review the selections and change a vote selection before cast of the ballot.	Test Configuration: Precinct tabulation device configured as described for normal election day operation by Pennsylvania procedures and/or the device manufacturer.
Test Equipment:	None
Special Procedural Requirements:	None
Assumptions:	An election is loaded on the device and the polls are open, ready for voting.
Step	Description
1000	Activate a ballot for voting. <i>Expected:</i> The ballot is presented and vote selections can be input. <i>Actual:</i> The ballot was presented.
1010	Select the first candidate in the first all "1 of 1" contest excluding a straight party contest, the first "N" candidates in all "N of M" contests, and select the "Yes" option in all "Question" contests. <i>Expected:</i> The precinct tabulation device allow for the navigation and the voting inputs to be selected as described above. <i>Actual:</i> James Collins and Arthur Remus were selected for President of the United States. Mary L. Daniel and Jack "Duke" Brodsky were selected for Court of Common Pleas and "Yes" selected in all question contests.
1020	Use the designated method to advance the "Ballot Review". Observe the "Ballot Review" to see if the above selections are indicated. <i>Expected:</i> The precinct tabulation device advances to the "Ballot Review" screen. The vote selections can be verified. <i>Actual:</i> The ballot review screen displayed the selection correctly.
1030	Use the designated method to retract to the first partisan "1 of 1" contest excluding the straight party contest. <i>Expected:</i> The precinct tabulation device navigates to the first partisan "1 of 1" contest excluding the straight party contest. <i>Actual:</i> Navigated to President of the United States.

<p>1040</p>	<p>Deselect the first candidate selection and select the second candidate.</p> <p><i>Expected:</i> The precinct tabulation device indicates the de-selection of the first candidate and the select of the second candidate.</p> <p><i>Actual:</i> Calvin Marino and Keith Satterwhite were selected.</p>
<p>1050</p>	<p>Use the designated method to advance to the first “Question” contest. De-select the “Yes” option and select the “No” option.</p> <p><i>Expected:</i> The precinct tabulation device navigates to the first “Question” contest and provides an indication of the de-selection of the “Yes” option and a selection of the “No” option.</p> <p><i>Actual:</i> “ No” was selected in the Statewide Referendum contest.</p>
<p>1060</p>	<p>Use the designated method to advance the “Ballot Review”. Observe the “Ballot Review” to see if the above selections are indicated. Use the designated method to cast the voted selections.</p> <p><i>pected:</i> The precinct tabulation device advances to the “Ballot Review” screen. After review and ballot is cast successfully.</p> <p><i>Actual:</i> The selections were displayed correctly.</p>
<p>1070</p>	<p>Repeat steps 1000- 1060 from above using an ADA input device.</p> <p><i>Expected:</i> Repeat 1000 <input checked="" type="checkbox"/>____ Repeat 1010 <input checked="" type="checkbox"/>____ Repeat 1020 <input checked="" type="checkbox"/>____ Repeat 1030 <input checked="" type="checkbox"/>____ Repeat 1040 <input checked="" type="checkbox"/>____ Repeat 1050 <input checked="" type="checkbox"/>____ Repeat 1060 <input checked="" type="checkbox"/>____</p> <p><i>Actual:</i> All steps were repeated using an audio session.</p>
<p>1080</p>	<p>Close the polls and print the closed polls report tape.</p> <p><i>Expected:</i> The polls closed and a report is printed.</p> <p><i>Actual:</i> The polls were closed and the results report printed.</p>
<p>1090</p>	<p>Review the closed polls report to ensure all selections input above are recorded and reported correctly.</p> <p><i>Expected:</i> The closed polls report presents the accumulated totals for the selections input above.</p> <p><i>Actual:</i> All selections were accurately reported on the results report.</p>
<p>Criteria for Evaluation of the Test Results: The intended selections input above are recorded, stored,</p>	

and reported as input by the tester. The voter input can be changed by navigating through the ballot after a ballot has been reviewed.

Test Case Identifier: 16 – 25 P.S. § 3031.7(16) Public Counter, No Reopening of Polls, Media Security with Tamper Proof Locks and Zero Proof and Tally Reports.	
PA ST 25 P.S. § 3031.7 Requirements:	<p>(16) If the voting system is of a type which provides for the computation and tabulation of votes at the district level, the district component of the automatic tabulating equipment shall include the following mechanisms or capabilities:</p> <p>(i) A public counter, the register of which is visible from the outside of the automatic tabulating equipment component into which the ballots are entered, which shall show during any period of operation the total number of ballots entered for computation and tabulation.</p> <p>(ii) A lock, or locks, by the use of which all operation of the tabulation element of the automatic tabulating equipment is absolutely prevented immediately after the polls are closed or where the tabulation of votes is completed.</p> <p>(iii) It shall be so constructed and controlled that, during the progress of voting, it shall preclude every person from seeing or knowing the number of votes theretofore registered for any candidate or question; and it shall preclude every person from tampering with the tabulating element.</p> <p>(iv) If the number of choices recorded for any office or on any question exceeds the number for which the voter is entitled to vote, it shall reject all choices recorded on the ballot for that office or question, provided, that if used during the period of voting it may also have the capacity to indicate to a voter that he has improperly voted for more candidates for any office than he is entitled to vote for, and in such case it shall have the capacity to permit the voter to mark a new ballot or to forego his opportunity to make such correction.</p> <p>(v) It shall be equipped with an element which generates a printed record at the beginning of its operation which verifies that the tabulating elements for each candidate position and each question and the public counter are all set to zero and with an element which generates a printed record at the finish of its operation of the total number of voters whose ballots have been tabulated, the total number of votes cast for each candidate whose name appears on the ballot, and the total number of votes cast for, or against, any question appearing on the ballot.</p>
Test Objective: To determine if the voting device has a public counter, does not allow the reopening of the polls, and supplies a zero proof and tally report.	Test Configuration: Precinct tabulation device configured as described for normal election day operation by Pennsylvania procedures and/or the device manufacturer. This includes all security locks and seals.
Test Equipment:	None
Special Procedural Requirements:	None
Assumptions:	The election media is installed but the polls have not been opened.
Step	Description
1000	<p>Ensure media is loaded but the polls have not been opened. Use the designated method to open polls. If a response is needed to print “Zero Proof” report, select this option.</p> <p><i>Expected:</i> The precinct tabulation device opens the polls and prints a “Zero Proof” report.</p> <p><i>Actual:</i> Polls opened and zero proof report was printed.</p>
1010	<p>Activate a ballot for voting.</p> <p><i>Expected:</i> The ballot is presented and vote selections can be input.</p>

	<i>Actual:</i> The ballot was presented.
1020	<p>Use the designated method to navigate to the straight party contest. Select the first selection in the straight party contest.</p> <p><i>Expected:</i> The precinct tabulation device navigates to the first straight party contest, allows the input of the first selection, and indicates the first selection was input.</p> <p><i>Actual:</i> Republican was selected.</p>
1030	<p>Use the designated method to advance the “Ballot Review”. Observe all selections for the party associated with the selection for the first straight party selection are selected. Observe the public counter value being 0.</p> <p><i>Expected:</i> The precinct tabulation device navigates to the “Ballot Review” screen. The public counter is visible and the value is 0.</p> <p><i>Actual:</i> Selections for Republican candidates were displayed. The counters had to be observed before the ballot is presented.</p>
1040	<p>Use the designated method to cast the voted selections. Observe the acknowledgement of “successful” ballot cast if provided, and the public counter incrementing by one.</p> <p><i>Expected:</i> The precinct tabulation device successfully cast the ballot and the public counter is incremented. If the ballot was not cast successfully the test is halted.</p> <p><i>Actual:</i> The ballot was cast successfully. The incrementing of the counter had to be observed after the ballot was cast.</p>
1050	<p>Close the polls and print the closed polls report tape.</p> <p><i>Expected:</i> The polls closed and a report is printed.</p> <p><i>Actual:</i> The polls were closed and the results report printed.</p>
1060	<p>Use the designated method to attempt to reopen the polls.</p> <p><i>Expected:</i> The polls cannot be reopened.</p> <p><i>Actual:</i> The polls could not be reopened.</p>
1070	<p>Place lock on precinct tabulation device per Pennsylvania Procedures to ensure all operation of the tabulation element is prevented.</p> <p><i>Expected:</i> The precinct tabulation device can be secured so that all operation of the tabulation element is prevented.</p>

	<i>Actual:</i> The precinct tabulation device could be locked.
1070	<p>Review the closed polls report to ensure all selections input above are recorded and reported correctly.</p> <p><i>Expected:</i> The closed polls report presents the accumulated totals for the selections input above.</p> <p><i>Actual:</i> The polls were closed and the results report printed.</p>
<p>Criteria for Evaluation of the Test Results: The intended selections input above are recorded, stored, and reported as input by the tester. The voting device is able to produce a “Zero Proof” and “Tally Report”. The voting device has a visible public counter and the counter increments correctly.</p>	

Test Case Identifier: 04, 06, 08, 09, Permanent Physical Record, and Statistical Sample – 25 P.S. §§ 3031.7(4), (6), (8), (9); 3031.1; and 3031.17 System Integration

PA ST 25 P.S. § 3031.7 Requirements:

PA ST 25 P.S. § 3031.1 Requirements:

PA ST 25 P.S. § 3031.17 Requirements:

(4) Permits each voter, at other than primary elections, to vote a ticket selected from the nominees of any and all political parties, from the nominees of any and all political bodies, and from any persons whose names are not in nomination and do not appear upon the official ballot.

(6) Permits each voter to vote for as many persons for any office as he is entitled to vote for and to vote for or against any question upon which he is entitled to vote and precludes each voter from voting or from having his vote tabulated for any candidate, or upon any question, for whom or upon which he is not entitled to vote.

(8) Precludes each voter from voting or from having his vote tabulated more than once for any candidate for the same office or upon any question, except in districts and for offices where cumulative voting is authorized by law.

(9) Permits each voter at a primary election to vote only for the candidates seeking nomination by a political party in which such voter is registered and enrolled, and for any candidate for nonpartisan nomination, and for any question upon which he is entitled to vote.

"ELECTRONIC VOTING SYSTEM" means a system in which one or more voting devices are used to permit the registering or recording of votes and in which such votes are computed and tabulated by automatic tabulating equipment. The system shall provide for a permanent physical record of each vote cast.

The county board of elections, as part of the computation and canvass of returns, shall conduct a statistical recount of a random sample of ballots after each election using manual, mechanical or electronic devices of a type different than those used for the specific election. The sample shall include at least two (2) per centum of the votes cast or two thousand (2,000) votes whichever is the lesser.

Test Objective:
This area of testing will focus on the system being able to perform a general and a closed primary from ballot design to reporting of results.

Test Configuration:
The system integration testing will execute a general and a primary election from ballot design through vote accumulation, consolidation and reporting. The election definitions will include all supported voting variations, languages, multiple ballot styles, and ADA voting. Two election definitions will be defined and executed according to a predefined voting pattern. All requirements tested in the targeted functionality testing will be monitored including accuracy throughout system integration testing.

Test Method:
The method for testing these requirements is defined as follows:

Provide an election definition that contains multiple ballot styles based on geographical subdivision in both a general election and a closed primary and tests that each vote is counted only once.

Two elections will be utilized to perform System Integration Testing:

- PA Certification General Election
- PA Certification Closed Primary Election

This test will be performed by evaluating the system from the pre-voting state of loading the media and obtaining pre-voting reports through the post-voting state of accumulation of voted data and printing of post-election reports. All documented steps will be followed to perform this test.

- Election definition and ballot layout coded prior to test
- Print pre-election report for ballot layout, precinct summary, and election summary
- Load election media
- Install election onto the precinct tabulation device
- Open polls and print zero proof report
- Vote pre-defined voting pattern
- Closed polls and print results tapes
- Print audit logs
- Perform a 10% sample according to PA procedures
- Harvest permanent physical record example
- Load election results into EMS
- Print precinct summary and election summary reports
- Collect and analyze all data

Criteria for Evaluation of the Test Results:

All intended selection input by the tester are recorded, stored and reported accurately.

Test Case Identifier: 12 – 25 P.S. § 3031.7(12) Penetration Analysis	
PA ST 25 P.S. § 3031.7 Requirements:	<i>(12) Provides acceptable ballot security procedures and impoundment of ballots to prevent tampering with or substitution of any ballots or ballot cards.</i>
Test Objective: This area of testing will focus on the current documented procedures and configuration to ensure that the physical and access secure measures provide a determined level of security. <i>Depending on the scope of this project this may be performed by a third-party expert.</i>	
Test Configuration: The voting system will be configured as would be for a polling place with all security precautions in place.	
Test Method: The method for testing these requirements is defined as follows: Test steps will be followed to evaluate the physical and access controls and procedures in place for the storage of voted ballots. This test will be performed by evaluating the system to ensure that all access areas and seals and/or locks provide adequate security from external access. The tester will: <ul style="list-style-type: none"> • check all seal and/or locks and attempt to open the system • verify that the ballot storage device is secure by attempting to insert and retrieve ballots without removing any seals and/or locks • verify that any needed supplies can be accessed by the poll worker without allowing access to the ballots or internal components of the voting system • verify that the system counter cannot be reset by any unauthorized person at any unauthorized point • exercise verification of password security management 	
Criteria for Evaluation of the Test Results: All intended access controls are in place and are sufficient.

25 P.S. § 3031.5. Examination and approval of electronic voting systems by the Secretary of the Commonwealth

(a) Any person or corporation owning, manufacturing or selling, or being interested in the manufacture or sale of, any electronic voting system, may request the Secretary of the Commonwealth to examine such system if the voting system has been examined and approved by a federally recognized independent testing authority and if it meets any voting system performance and test standards established by the Federal Government. The costs of the examination shall be paid by the person requesting the examination in an amount set by the Secretary of the Commonwealth. Any ten or more persons, being qualified registered electors of this Commonwealth, may, at any time, request the Secretary of the Commonwealth to reexamine any electronic voting system theretofore examined and approved by him. Before any reexamination, the person, persons, or corporation, requesting such reexamination, shall pay to the Treasurer of the Commonwealth a reexamination fee of four hundred fifty dollars (\$450). The Secretary of the Commonwealth may, at any time, in his discretion, reexamine any such system therefore examined and approved by him. The Secretary of the Commonwealth may issue directives or instructions for implementation of electronic voting procedures and for the operation of electronic voting systems.
