1.0 INTRODUCTION

1.1 Scope

A re-examination of the Hart 6.2.1 Voting System was performed per the direction of the Secretary of the Commonwealth, acting through the Pennsylvania Department of State, Bureau of Commissions, Elections and Legislation. This Test Report documents the procedures followed, the results obtained, and the conclusions drawn from that re-examination.

1.2 Objective

The objective of the re-examination was to examine the Hart 6.2.1 Voting System, previously certified for use in the Commonwealth of Pennsylvania on April 6, 2007, to determine whether the system remains compliant with the requirements of Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 - 3031.22, and to document compliance through the execution of single thread test cases where applicable.

1.3 References

The documents listed below were utilized in the development of the Test Report:

- Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 3031.22
- Federal Election Commission 2002 Voting Systems Standards
- Help America Vote Act (HAVA) of 2002, Public Law 107-252, 42 U.S.C. § 15301 et seq.
- Pro V&V Test Protocol for Re-Examination of Hart 6.2.1 Voting System
- Hart Voting System Product Description 6000-060 Rev 62A

1.4 Terms and Abbreviations

Term Abbreviation		Definition		
Americans with Disabilities ADA		Americans with Disabilities Act of 1990 is a law enacted by the United States Congress to prohibit discrimination based on disability.		
Commercial Off-The-Shelf COTS		Commercial, readily available hardware or software.		
Direct Recording Electronic	DRE	An electronic voting system that utilizes electronic components for the functions of ballot presentation, vote capture, vote recording and tabulation which are logically and physically integrated into a single unit.		
Election Management System EMS		Set of processing functions and databases within a voting system that defines, develops and maintains election databases, performs election definitions, installs functions, formats ballots, tabulates votes, consolidates and reports results, and maintains audit trails.		

Term	Abbreviation	Definition		
Federal Election Commission	FEC	Commission created in 1975 to regulate the campaign finance legislation in the United States.		
Independent Testing Authority	ITA	Independent testing organizations accredited by the National Association of State Election Directors (NASED) to perform voting system qualification testing.		
Technical Data Package	TDP	Manufacturer's documentation related to the voting system required to be submitted with the system as a precondition for certification.		
Federal Election Commission 2002 Voting System Standards	VSS	Voluntary guidelines published by the FEC, the second iteration of national level voting system standards.		

2.0 SYSTEM OVERVIEW AND IDENTIFICATION

The Hart 6.2.1 Voting System is an electronically networked DRE voting system. The voting system examined was comprised of the following components:

- Ballot Origination Software System (BOSS)
- Mobile Ballot Boxes (MBBs)
- eSlate Cryptographic Modules (eCMs)
- eCM Manager
- eSlate
- eSlate Disabled Access Unit (DAU)
- Judge's Booth Controller (JBC)
- Tally
- SERVO

The BOSS component is used to generate the electronic ballot styles for the provided election definitions. The election data is then written to an MBB for transportation of the election data. The JBC is loaded at the polling place with the MBB and connected to the eSlate and eSlate DAU units. The eSlate and eSlate DAU units present the ballot and accepts the selections made by the voter. The selections made by the voter are captured by the eSlate and eSlate DAU units and transmitted to the JBC. The JBC records the selections as a Cast Vote Record (CVR) and writes the CVR to the MBB. The MBBs are returned to the central locations and processed. The Tally component is used to accumulate and report the voted data.

The eCM Manager component is used to program eCM's. The eCM's are USB devices used to access secure functions in BOSS, Tally and SERVO. The SERVO component is used to reset the eSlate, eSlate DAU's, and JBC prior to an election. SERVO can also be used to directly access the memory of eSlate, eSlate DAU and JBC units to retract voted data and audit records. The following diagram illustrates the Hart 6.2.1 Voting System architecture:

Figure 2.1 Hart 6.2.1 Voting System Architecture (This examination did not examine Ballot Now, VBO, or eScan units)

2.1 Software

The software listed in Table 2.1 was used during the examination of the Hart 6.2.1 Voting System. Table 2.1 provides the component name, software/firmware version and a SHA-1 Hash if calculated during the re-examination. The software/firmware for the eSlate, eSlate DAU, and the JBC was obtained from SLI Global Solutions, Inc. as the trusted source. The Examiner observed the loading of firmware for all eSlate, eSlate DAU and JBC units for this re-examination. The other applications were provided by the manufacturer.

Component Name	Version	Unique Identifier (digital signature or hash value)
Ballot Now	3.3.11	Not Calculated
BOSS	4.3.13	Not Calculated
eCM Manager	1.1.7	Not Calculated
eSlate/DAU	4.2.13	bfc7b39bdf72d8f9538b1e6e957afc8aa33de874(SHA-1)
JBC	4.3.1	988fb9a15dccc3977640503c85709970dd7edae8(SHA-1)
Rally	2.3.7	Not Calculated
SERVO	4.2.10	Not Calculated
Tally	4.3.10	Not Calculated
VBO	1.8.3	Not Calculated

Table 2.1 Software

2.2 Hardware

The hardware for this re-examination was configured into three subsystems. Each subsystem contained a JBC, an eSlate and an eSlate DAU. The two EMS components were loaded on individual workstations. Table 2.2 provides hardware component name, model number, and the serial number for the units that were examined.

Table 2.2 Hardware

Component Name	Model Number	Serial Number
		A0AF72
eSlate	3000	A0B58A
		A089DB
		A05B5F
DAU eSlate	5000	A07917
		A05EE8
		C010E3
JBC	1000	C041C2
		C0011B
BOSS Workstation	Dell Optiplex 740	1W5YCG1
Tally Workstation	Dell Optiplex 740	3M27KH1
Servo Server	Dell Latitude D530	DFNCBG1

2.3 Peripherals

Table 2.3 provides the peripheral components used during the re-examination.

Part Name	Model Number	Description		
Mobile Ballot Box	N/A	Various MBB to transport election information		
(MBB)		*		
Firmware Laptop	Dell Latitude D610	Service Tag F2VNZ81		
COTS Printer	N/A	EMS report printer		
Headphones	N/A	Headphone used for audio ballot presentation		

Table 2.3 Peripherals

2.4 Test Support Equipment/Materials

The test materials listed in Table 2.4 were used during the re-examination.

Table 2.4 Test Materials

Part Name	Quantity	Description
JBC paper rolls	Various	Paper rolls used by the JBC
8 ¹ / ₂ " x 11" paper Various		EMS report paper
USB Thumbdrive	1	Sandisk USB 2.0 Cruzer 8 GB

3.0 TEST PROCESS

3.1 Background

The Hart 6.2.1 Voting System was certified for use in the Commonwealth of Pennsylvania on April 6, 2007, after an examination was conducted pursuant to the Pennsylvania Election Code. The Hart 6.2.1 Voting System has been in use by Pennsylvania counties since its initial certification. Pursuant to section 1105-A of the Pennsylvania Election Code, 25 P.S. § 3031.5, a group of Pennsylvania voters formally requested that the Secretary conduct a re-examination of the Hart 6.2.1 Voting System. The Secretary granted the request. Pro V&V, Inc. was contracted to develop test protocols and conduct the re-examination testing to ascertain whether the certified electronic voting system complies with the requirements set forth in the Pennsylvania Election Code.

3.2 General Information

The re-examination of Hart 6.2.1 Voting System was performed by Jack Cobb of Pro V&V, Inc. (the "Examiner"), per the direction of the Secretary of the Commonwealth, acting through the Pennsylvania Department of State, Bureau of Commissions, Elections and Legislation. The re-examination commenced on February 27, 2012 at the Commonwealth Keystone Building, Hearing Room 1, 400 North Street, Harrisburg, Pennsylvania. The duration of the re-examination was approximately twelve hours.

3.3 Test Approach

To achieve the objective of this re-examination, the Examiner separated the requirements of Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 -3031.22, into four main areas of test execution: (1) Review; (2) Targeted Functionality; (3) System Integration; and (4) Penetration Analysis. The "Review" testing consisted of analyzing ITA and other third-party reports for specific tests that satisfied the requirements of the Pennsylvania Election Code and verifying that the Hart 6.2.1 Voting System met those requirements. The "Targeted Functionality" testing sought to ascertain whether the Hart 6.2.1 Voting System met all of the requirements of the Pennsylvania Election Code that could be met by execution of a single thread test case. The "System Integration" testing sought to ascertain whether the voting system met all of the requirements of the Pennsylvania Election Code that could be met by the execution of an entire election. General and closed-primary election definitions were devised and run for the pre-voting, voting, and post-voting functions of the voting system. The "Penetration Analysis" testing sought to ascertain whether the Hart 6.2.1 Voting System met all of the requirements of the Pennsylvania Election Code that could be met by analyzing security procedures and impoundment of ballots. Precinct tabulation devices were installed for delivery to the precinct, and analysis of the security procedures performed. Appendix A ("As Run Test Protocol") contains the details of the test protocol performed on the Hart 6.2.1 Voting System.

4.0 TEST FINDINGS AND RECOMMENDATIONS

The Hart 6.2.1 Voting System, listed in Section 2.0 of this report, was subjected to the tests summarized in the following paragraphs.

4.1 Review

A review of the ITA reports listed on page 91 of Appendix A was conducted to determine compliance with the following sections of the Pennsylvania Election Code:

- 25 P.S. § 3031.5(a), requiring that a DRE "ha[ve] been examined and approved by a federally recognized independent testing authority" and that it "meet any voting system performance and test standards established by the Federal Government;"
- 25 P.S. § 3031.7(11), requiring that a DRE be "suitably designed for the purpose used, ... constructed in a neat and workmanlike manner of durable material of good quality, ... safely and efficiently useable in the conduct of elections and, with respect to the counting of ballots cast at each district, ... suitably designed and equipped to be capable of absolute accuracy, which accuracy shall be demonstrated to the Secretary of the Commonwealth;"
- 25 P.S. § 3031.7(13), requiring that a DRE, "[w]hen properly operated, records correctly and computes and tabulates accurately every valid vote registered;"
- 25 P.S. § 3031.7(14), requiring that a DRE be "safely transportable;" and
- 25 P.S. § 3031.7(15), requiring that a DRE be "so constructed that a voter may readily learn the method of operating it."

Summary Finding: The test reports submitted by Hart satisfied the requirements set forth in 25 P.S. § 3031.5(a). The Hart 6.2.1 Voting System was examined and approved by an ITA as meeting the applicable performance and test standards. *See* Hart InterCivic Software qualification Test Report Rev 3 dated August 11, 2006.

The design requirements of Sections 3031.7(11) and (14) and the accuracy requirements of Sections 3031.7(11) and (13) of the Pennsylvania Election Code were met by a documented Product Safety Test and Accuracy Test. The specific transportation requirements of Section 3031.7(14) of the Election Code were met by the combination of documented Hardware Non-Operating Environmental Tests which included: bench handling, vibration, low temperature, high temperature, and humidity. Although the submitted reports did not contain specific data for an Accuracy Test to satisfy the accuracy requirement for Section 3031.7(11) and Section 3031.7(13), a test to meet the Accuracy Requirements of the FEC 2002 VSS must be performed to receive an NASED Certification.

The manufacturer provided a Usability Report to meet the requirements set forth in 25 P.S. § 3031.7(15). The Examiner also did not encounter any issues performing the method of operation for standard voting sessions or ADA voting sessions during execution of the re-examination. Additionally, Department of State staff members were used to input voting data for the system integration area of testing. No operational issues were reported.

The Examiner reviewed the submitted reports, researched the certification by NASED to the FEC 2002 VSS of the Hart 6.2.1 Voting System and conducted the re-examination, no issues, anomalies, or observations were noted during the execution of the re-examination related to hardware design, transportability, or accuracy, therefore I conclude the Hart 6.2.1 Voting System meets these requirements of the Pennsylvania Election Code.

4.2 Targeted Functionality

As set forth in the Test Protocols published before the re-examination, nine test cases were designed to determine compliance with the requirements of 25 P.S. § 3031.7(1), (2), (3), (4), (5), (7), (10) and (16). The Examiner conducted each of these tests, with necessary modifications as discussed below. The following is a list of the individual test cases and a summary of the results and observations for each test case.

Test Case Identifier: 01 – 1107-A(1), 25 P.S. § 3031.7(1) Voter Secrecy (Regular Voter):

This test case was designed to test for compliance with 25 P.S. § 3031.7(1), requiring that a DRE "provides for voting in absolute secrecy and prevents any person from seeing or knowing for whom any voter, except one who has received or is receiving assistance as prescribed by law, has voted or is voting." This test case required observation of voter input from a distance that is considered public space for a DRE in the standard voting position. Three different observation positions were used to observe what, if any, voter inputs could be seen.

Summary Finding: During the execution of this test case, the observer did not report being able to see any voter inputs. Although the observer did not report any observations, the Examiner was informed that the screen could be seen from other viewing angles. Any jurisdiction using the Hart 6.2.1 Voting System should follow Directive 4 of "Directive Concerning the Use, Implementation and Operation of Electronic Voting Systems by the County Board of Elections," dated April 28, 2009, and issued by the Secretary of the Commonwealth. In my opinion, the Hart

6.2.1 Voting System, if setup per Directive 4, can provide for secrecy so that no person can see whom any voter has voted for, thus meeting the requirement of the Pennsylvania Election Code.

<u>Test Case Identifier: 01 – 1107-A(1), 25 P.S. § 3031.7(1) Voter Secrecy (ADA Voter):</u>

This test case was designed to observe audible and visual voter input from a distance that is considered public space for a DRE in the ADA position. Before test execution, it was determined that the examination room's size and acoustics were invalid for the audio portion of the test (only visual observations were recorded).

Summary Finding: During the execution of this test case, the observer did not report being able to see any voter inputs. Although the observer did not report any observations, the Examiner was informed that the screen could be seen from other viewing angles. Any jurisdiction using the Hart 6.2.1 Voting System should follow Directive 4 of "Directive Concerning the Use, Implementation and Operation of Electronic Voting Systems by the County Board of Elections," dated April 28, 2009, and issued by the Secretary of the Commonwealth. In my opinion, the Hart 6.2.1 Voting System, if setup per Directive 4, can provide for secrecy so that no person can see for whom any ADA voter has voted, thus meeting the requirement of the Election Code.

<u>Test Case Identifier: 02 – 1107-A(2), 25 P.S. § 3031.7(2) Selection of Candidates and</u> <u>Questions by Voter (Regular/ADA):</u>

This test case was designed to test for compliance with 25 P.S. § 3031.7(2), requiring that a DRE "provides facilities for voting for such candidates as may be nominated and upon such questions as may be submitted." This test case ensures a vote for a candidate for "1 of 1," "N of M," and "Question" contests could be recorded and reported as input for a standard voting session and an ADA voting session.

Summary Finding: No issues or anomalies were noted during the execution of this test case. The Hart 6.2.1 Voting System successfully recorded and reported votes for "1 of 1," "N of M," and "Question" contests for both a standard voting session and an ADA voting session. The actual results obtained during execution met the expected results. *See* page 67 of Appendix A. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude that the Hart 6.2.1 Voting System meets the requirements of Section 3031.7(2) of the Pennsylvania Election Code.

<u>Test Case Identifier: 03 – 1107-A(3), 25 P.S. § 3031.7(3) Straight-Party and Pennsylvania</u> <u>Method:</u>

This test case was designed to test for compliance with 25 P.S. § 3031.7(3), which requires that a DRE allow a voter to perform straight-party voting according to the "Pennsylvania Method." This test case was designed to ensure that a straight-party selection and the Pennsylvania Method of straight-party voting could be recorded and reported as input for a standard voting session and an ADA voting session.

Summary Finding: No issues or anomalies were noted during the execution of this test case. During the execution of this test case, the Hart 6.2.1 Voting System successfully recorded and reported straight-party votes and demonstrated the Pennsylvania Method of straight-party voting for both a standard voting session and an ADA voting session. The actual results obtained during execution met the expected results. *See* page 69 of Appendix A. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude that the Hart 6.2.1 Voting System meets the requirements of Section 3031.7(3) of the Pennsylvania Election Code.

Test Case Identifier: 04 – 1107-A (4), 25 P.S. § 3031.7(4) Straight-Party and Write-In:

This test case was designed to test for compliance with 25 P.S. §3031.7(4), which requires that a DRE permit a voter to vote for a candidate of his or her choice through a straight-party or write-in voting. This test case ensures that both a straight-party and write-in selection could be recorded and reported as input for a standard voting session and an ADA voting session.

Summary Finding: No issues or anomalies were noted during the execution of this test case. During the execution of this test case, the Hart 6.2.1 Voting System successfully recorded and reported straight-party and write-in votes for both a standard voting session and an ADA voting session. The actual results obtained during execution met the expected results. *See* page 73 of Appendix A. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude the Hart 6.2.1 Voting System meets the requirements of Section 3031.7(4) of the Pennsylvania Election Code.

<u>Test Case Identifier: 05 – 1107-A (5), 25 P.S. § 3031.7(5) Selection of Candidate and Write-</u> <u>in:</u>

This test case was designed to test for compliance with 25 P.S. §3031.7(5), which requires that a DRE permit a voter to vote for any candidate or write-in a candidate. This test case ensures that a candidate and write-in selection could be recorded and reported as input for a standard voting session and an ADA voting session.

Summary Finding: During the execution of this test case, an observation was made at step 1070. Duplicate write-in names could be input into the DRE for an "N of M" contest. The test continued and an attempt to adjudicate the duplicate was made from the device results report. There was no indication provided on the results reports of the same name being input twice on the same ballot for the same contest. The MBB's were loaded into Tally and the first step in importing the results was to adjudicate all write-in candidates. This functionality allowed for the duplicate vote to be properly adjudicated. The actual results obtained during execution met the expected results. *See* page 76 of Appendix A. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude the Hart 6.2.1 Voting System meets the requirements of Section 3031.7(5) of the Pennsylvania Election Code.

<u>Test Case Identifier: 07 – 1107-A(7), 25 P.S. § 3031.7(7) Attempt to Over Vote Contests and</u> <u>Questions (Regular/ADA):</u>

This test case was designed to test for compliance with 25 P.S. § 3031.7(7), which requires that a DRE prevent a voter from over voting. This test case ensures that a voter could not over vote for a contest or question during a standard voting session and an ADA voting session.

Summary Finding: No issues or anomalies were noted during the execution of this test case. The Hart 6.2.1 Voting System successfully prohibited a voter from selecting more than the number of allowable selections, including write-in votes, for both a standard voting session and an ADA voting session. The actual results obtained during execution met the expected results. *See* page 79 of Appendix A. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude the Hart 6.2.1 Voting System meets the requirements of Section 3031.7(7) of the Pennsylvania Election Code.

<u>Test Case Identifier: 10 – 1107-A(10), 25 P.S. § 3031.7(10) Ballot Review and Change</u> (Regular/ADA):

This test case was designed to test for compliance with 25 P.S. § 3031.7(10), which requires that a DRE allow for ballot review and change before casting the ballot. This test case ensures that a voter can review a voted ballot and make changes before casting the ballot and have a cast ballot computed during a standard voting session and an ADA voting session.

Summary Finding: No issues or anomalies were noted during the execution of this test case. During the execution of this test case, the Hart 6.2.1 Voting System provided a voter with the ability to review and make changes to his or her selections before casting the vote for both a standard voting session and an ADA voting session. The actual results obtained during execution met the expected results. *See* page 82 of Appendix A. The objective criteria for evaluation were analyzed and the system met the criteria. Therefore, I conclude the Hart 6.2.1 Voting System meets the requirements of Section 3031.7(10) of the Pennsylvania Election Code.

<u>Test Case Identifier: 16 – 1107-A(16), 25 P.S. § 3031.7(16) Public Counter, No Re-opening of Polls, Media Security with Tamper Proof Locks and Zero Proof and Tally Reports:</u>

This test case was designed to test for compliance with 25 P.S. § 3031.7(16), which requires that a DRE have a public counter, have the ability to lock after the polls are closed, provide for voter secrecy, prohibit over votes, and print zero proof and results reports. This test case verifies the display of a public counter. It also ensures that the device provides (a) a lock to prevent tabulation after the polls are closed and to prevent re-opening of the polls, (b) tamper evident locks and seals, and (c) zero proof and results reports.

Summary Finding: No issues or anomalies were noted during the execution of this test case. During the execution of this test case, the Hart 6.2.1 Voting System provided a public counter that incremented with each cast vote; provided the ability to be locked after the polls were closed; precluded the re-opening of the polls after the polls were closed; provided design features that allow tamper evident locks and seals to be placed on the device (*see* photographs in Section 4.4); and provided zero proof and results reports. The actual results obtained during execution met the expected results. *See* page 85 of Appendix A. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude the Hart 6.2.1 Voting System meets the requirements of Section 3031.7(16) of the Pennsylvania Election Code.

4.3 System Integration Testing

System Integration Testing was performed to test proprietary hardware, software and peripherals, as well as COTS materials configured as a precinct count system. This test meets many of the requirements of the Pennsylvania Election Code that were previously verified in the Targeted Functionality area of testing, but was designed to specifically meet the following sections and requirements:

- 25 P.S. § 3031.1, defining "electronic voting system" to be a "system in which one or more voting devices are used to permit the registering or recording of votes and in which such votes are computed and tabulated by automatic tabulating equipment. The system shall provide for a permanent physical record of each vote cast;"
- 25 P.S. § 3031.7(4), requiring that a DRE "permits each voter, at other than primary elections, to vote a ticket selected from the nominees of any and all political parties, from

the nominees of any and all political bodies, and from any persons whose names are not in nomination and do not appear upon the official ballot;"

- 25 P.S. § 3031.7(6), requiring that a DRE "permits each voter to vote for as many persons for any office as he is entitled to vote for and to vote for or against any question upon which he is entitled to vote and precludes each voter from voting or from having his vote tabulated for any candidate, or upon any question, for whom or upon which he is not entitled to vote;"
- 25 P.S. § 3031.7(8), requiring that a DRE "precludes each voter from voting or from having his vote tabulated more than once for any candidate for the same office or upon any question, except in districts and for offices where cumulative voting is authorized by law;"
- 25 P.S. § 3031.7(9), requiring that a DRE "permits each voter at a primary election to vote only for the candidates seeking nomination by a political party in which such voter is registered and enrolled, and for any candidate for nonpartisan nomination, and for any question upon which he is entitled to vote;" and
- 25 P.S. § 3031.17, requiring that the "county board of elections, as part of the computation and canvass of returns, shall conduct a statistical recount of a random sample of ballots after each election using manual, mechanical or electronic devices of a type different than those used for the specific election. The sample shall include at least two (2) per centum of the votes cast or two thousand (2,000) votes whichever is the lesser."

Two election definitions, a general and closed primary election, were devised to test and measure specific input devices, voting patterns and results. Pre-voting reports were generated, consisting of a ballot proof report, precinct summary report, and election summary report. The polls were opened, and precinct tabulator zero proof reports were generated. The Examiner and Department of State staff members attempted to input a complex voting pattern consisting of distinct combinations of vote selection as documented in the Test Protocol (*See* Appendix A Election Definitions). The polls were closed, and results reports were generated including cast vote records and ballot images. The voted data was then transferred to the election management system (EMS), and election summary reports, precinct summary reports, and ballot images were printed. At the conclusion of the test, the Examiner conducted a statistical recount of at least 10% of the votes cast using the cast vote records and ballot images. The procedure identified each ballot by the distinct voting pattern that was input. The Examiner also generated a backup of the EMS database and retained a copy with the other test data.

Summary Finding: No issues or anomalies were noted during the execution of this test case. The Hart 6.2.1 Voting System successfully completed both the general and closed primary election. The actual results obtained during execution met the expected results. The objective criteria for evaluation were analyzed, and the system met the criteria. Therefore, I conclude the Hart 6.2.1 Voting System meets the requirements of Sections 3031.1 and 3031.17 of the Pennsylvania Election Code in that the system generated a permanent physical record in the format of the cast vote record and ballot images that were used to conduct a statistical recount. The Hart 6.2.1 Voting System also complies with Sections 3031.7(4) and (9) in that test voters in the primary election were only able to vote for their party and the system rejected attempts to vote for non-party candidates. The Hart 6.2.1 Voting System meets the requirements the requirements for Sections

3031.7(6) and (8) in that the test voters cast votes on different ballot styles for candidates and questions and the Hart 6.2.1 Voting System precluded test voters from over voting.

4.4 Penetration Analysis

A penetration analysis was performed to verify compliance with 25 P.S. § 3031.7(12), which requires that a DRE "provides acceptable ballot security procedures and impoundment of ballots to prevent tampering with or substitution of any ballots or ballot cards."

The precinct tabulation devices were configured for delivery to a polling place from a warehouse; this included all seals and locks recommended by the manufacturer. The Examiner inspected the device for the ability to tamper with the transportation case and the device inside the case. The inspection examined the ports, the outer case, and memory devices from the aspect of the device as delivered to the polling place and configured for voting. The Examiner also examined both the precinct device and the EMS for password management of administrative functions and ensured the system counter cannot be reset by unauthorized persons. The Examiner photographed the configuration and analyzed the configuration for possible vulnerabilities. Photographs 1.1 through 1.4 indicate locks and seals on the precinct tabulation devices.

Photograph 1.1 Lock on JBC's MBB Door

Photograph 1.2 Seals Over Ports and Chassis

Photograph 1.3 Lock for eSlate Transportation Case

Photograph 1.4 Lock for JBC Transportation Case

Summary Finding: No issues or anomalies were noted during the execution of this test case. During the conducting of this analysis, the Hart 6.2.1 Voting System provided acceptable ballot security procedures and impoundment of ballots to prevent tampering with or substitution of any ballots or ballot cards. It also provided acceptable password management and restriction of access to administrative functions. Therefore, I conclude the Hart 6.2.1 Voting System meets the requirements of Section 3031.7(12) of the Pennsylvania Election Code.

5.0 CERTIFICATION FOR USE

The Hart 6.2.1 Voting System, certified for use in the Commonwealth of Pennsylvania and presented for re-examination, meets the requirements of Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 - 3031.22. As the Examiner, I recommend the voting system documented in Section 2.0 of this report remain certified for use in the Commonwealth of Pennsylvania.

APPENDIX A	A ELECTION DEFINITIONS	10
APPENDIX B	B TEST CASES	62

1.0 INTRODUCTION

The primary purpose of the re-examination is to confirm that the Hart 6.2.1 Voting System meets the requirements of Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 - 3031.22. This re-examination is being performed per the direction of the Secretary of the Commonwealth, acting through the Pennsylvania Department of State, Bureau of Commissions, Elections and Legislation. This re-examination will commence on February 27, 2012 at the following location:

Commonwealth Keystone Building Hearing Room 1 400 North Street Harrisburg, Pennsylvania

The daily duration of this re-examination will be from 9:00 A.M. until 5:00 P.M. Eastern Standard Time unless a representative of the Secretary of the Commonwealth requests an extension, suspension, or a halt in testing.

1.0 References

The documents listed below were used in the development of the Test Protocol.

1.1 Terms and Abbreviation

This subsection lists terms and abbreviations relevant to this re-examination

"ADA" – Americans with Disabilities Act

"COTS" – Commercial Off-The-Shelf

"Department" – Pennsylvania Department of State

- "DRE" Direct Recording Electronic
- "EAC" Election Assistance Commission
- "EMS" Election Management System

"Examiner" – The Examiner appointed by the Secretary of the Commonwealth to conduct the reexamination

"FEC" – Federal Election Commission

"ITA" – Independent Testing Authority

"PA" - The Commonwealth of Pennsylvania

"Pennsylvania Election Code" - Article XI-A of the Pennsylvania Election Code, sections 1101-A to 1122-A, 25 P.S. §§ 3031.1 – 3031.22

"Secretary" – The Secretary of the Commonwealth

"TDP" – Technical Data Package

"VSS" - Federal Election Commission 2002 Voting System Standards

"VVSG" - Election Assistance Commission 2005 Voluntary Voting System Guidelines

1.2 Background

The Hart 6.2.1 Voting System was certified for use in the Commonwealth of Pennsylvania on April 6, 2007, after an examination conducted pursuant to the Pennsylvania Election Code. The Hart 6.2.1 Voting System has been in use by Pennsylvania counties since its initial certification. Pursuant to section 1105-A of the Pennsylvania Election Code, 25 P.S. § 3031.5, a group of Pennsylvania voters formally requested that the Secretary conduct a re-examination of the Hart 6.2.1 Voting System. The Secretary granted the request.

The Test Protocol was developed to ascertain whether the certified electronic voting system complies with the requirements set forth in the Pennsylvania Election Code.

2.0 TEST ITEMS

This section contains detailed descriptions of the items tested during the re-examination, including all software, hardware, and peripherals, both proprietary and COTS, and any test support equipment or materials necessary for test performance. The following diagram illustrates the Hart 6.2.1 Voting System architecture.

Figure 2.1 System Overview Diagram

2.1 Software

This subsection contains a listing of the software and firmware being evaluated.

Component Name	Version	Unique Identifier (digital signature or hash value)
BOSS	4.3.13	TBD
Ballot Now	3.3.11	TBD
SERVO	4.2.10	TBD
JBC	4.3.1	TBD
VBO	1.8.3	TBD
Tally	4.3.10	TBD
eCM Manager	1.1.7	TBD
Rally	2.3.7	TBD
eSlate/DAU	4.2.13	TBD

Table 2.1 Software

2.2 Hardware

This subsection contains a listing of the hardware being evaluated.

Table 2.2 Hardware

Component Name	Model Number	Revision Number	Description
eSlate	3000	N/A	DRE
DAU eSlate	5000	N/A	Disabled Access Unit DRE
JBC	1000	N/A	Controller device tethered to the eSlate

2.3 Peripherals

This subsection contains detailed descriptions of other equipment used by the system being evaluated.

Table 2.3 Peripherals

		Revision	Description
Name	Description	Number	
eCM	COTS Spyrus Rosetta USB	N/A	USB hardware security token
	token		
MBB	COTS 128 MB ATA	N/A	PC card memory device used for
	Read/Write PCMCIA card		storing and transporting election
			information, cast vote records, and
			audit data.
Desktop Printer	Various	N/A	COTS Printer to print EMS reports

2.4 Test Support Equipment/Materials

This subsection contains detailed descriptions of the test support equipment and materials needed to perform the required testing.

The Examiner will provide a tape measure (to be used in Test Case 1), Test Execution Logs, and a digital camera for test documentation. The re-examination will be video recorded by the Department.

The voting system manufacturer must provide an EMS system currently certified for use in Pennsylvania loaded with the closed primary and general-election definitions (Appendix A). These election definitions are the ballot configurations that will be used throughout the re-examination. The manufacturer is responsible for providing the Department and the Examiner with technical staff to support the re-examination. The manufacturer must provide three precinct-tabulation devices for each voting system being examined. The manufacturer must be prepared to load the firmware for each precinct tabulation devices as they would be in the precinct on Election Day, including seals and locks. The manufacturer must be prepared to print pre-election reports.

3.0 TEST MATERIALS

This section contains a detailed description of all materials made available to Examiner for the reexamination.

3.1 Technical Data Package

This subsection lists all manufacturer provided documentation that is relevant to the system being tested.

Table 3.3 Previous Test Results

4.0 TEST SPECIFICATIONS

This section contains a detailed description of the procedures to be followed during test setup and preparation.

The re-examination of the voting system will occur in an environmentally controlled room. The room will be configured such that the Department, the Examiner, and the voting system manufacturer have their own independent work areas. The public will be allowed to observe the examination, but may not comment or interact with either the employees of the Department, the Examiner, or the voting system manufacturer, at any time. The manufacturer will be allotted time and space to stage the voting system prior to the re-examination. This time and space will be determined between the Department and the manufacturer in advance of the examination date. Once the manufacturer informs the Department that the voting system is properly set up, the Examiner will provide the manufacturer with the firmware/software for the precinct tabulation device, submitted to the Department from the trusted source. The manufacturer will load the firmware/software on to the required media for installation onto the precinct tabulation device and install the firmware/software onto the precinct tabulation device before commencement of the Once each precinct tabulation device is loaded with the firmware/software, the re-examination. manufacturer will not be allowed access to the internal components of the devices without the consent of the Department or the Examiner. If the re-examination is suspended, the precinct tabulation devices will be secured in a manner to ensure control of the test environment. If, at any point, the Department or the Examiner determines that the control of the test environment has been compromised, all firmware/software will be reloaded on the precinct tabulation devices.

The voting system manufacturer shall set up the precinct tabulation devices as they would be in the precinct on Election Day, minus the locks and seals. The locks and seals will be installed and evaluated at a later time in the re-examination.

The Examiner will maintain photographic and written documentation of the re-examination. This will include, but is not limited to, photographs of the firmware/software installation, test execution notes and observations, photographs of the test setup, and collection of test data. The Department will video record the re-examination.

5.0 TEST PROCEDURES

This section contains a detailed description of the test sequence, test procedures and expected results.

The test cases for this re-examination are contained in Appendix B of this Test Protocol. All steps of the tests cases contain an expected result to provide objective pass/fail criteria. There are no dependencies for execution of the test cases. The test cases have been divided into four main areas for execution: (1)

Review; (2) Targeted Functionality; (3) System Integration; and (4) Penetration Analysis. The Review area of this re-examination will not be performed on-site during the set dates of the re-examination. The Review area of testing includes documentation review of third-party reports and review of the manufacturer's TDP. All other areas of testing will be performed on-site during the re-examination. The test sequence for this re-examination will be as follows:

Review:

- 1107-A(11), 25 P.S. § 3031.7(11) Suitably Designed, Constructed in Workmanlike Manner of Durable Material, Safely and Efficiently Useable, Capable of Absolute Accuracy
- 1107-A(13), 25 P.S. § 3031.7(13) Record Correctly, Computes and Tabulates Accurately
- 1107-A(14), 25 P.S. § 3031.7(14) Safely Transportable
- 1107-A(15), 25 P.S. § 3031.7(15) Voter May Readily Learn to Operate

Targeted Functionality Test Cases:

- Test Case Identifier: 01 1107-A(1), 25 P.S. § 3031.7(1) Voter Secrecy (Regular Voter)
- Test Case Identifier: 01 1107-A(1), 25 P.S. § 3031.7(1) Voter Secrecy (ADA Voter)
- Test Case Identifier: 02 1107-A(2), 25 P.S. § 3031.7(2) Selection of Candidates and Questions by Voter (Regular/ADA)
- Test Case Identifier: 03 1107-A(3), 25 P.S. § 3031.7(3) Straight Party and Pennsylvania Method
- Test Case Identifier: 04 1107-A(4), 25 P.S. § 3031.7(4) Straight Party and Write-In
- Test Case Identifier: 05 1107-A(5), 25 P.S. § 3031.7(5) Selection of Candidate and Write-in
- Test Case Identifier: 07 1107-A(7), 25 P.S. § 3031.7(7) Attempt to Over Vote Contests and Questions (Regular/ADA)
- Test Case Identifier: 10 1107-A(10), 25 P.S. § 3031.7(10) Ballot Review and Change (Regular/ADA)
- Test Case Identifier: 16 1107-A(16), 25 P.S. § 3031.7(16) Public Counter, No Reopening of Polls, Media Security with Tamper Proof Locks and Zero Proof and Tally Reports

System Integration Test Case:

Test Case Identifier: 04, 06, 08, 09, Permanent Physical Record, and Statistical Sample – 1107-A(4), 25 P.S. § 3031.7(4) Enables Voting for Legal Combinations; 1107-A(6), 25 P.S. § 3031.7(6) Permits Voting for as Many Candidates as Entitled, Permits Voting For or Against Questions, Precludes Voting for Unauthorized Candidates or Questions; 1107-A(8), 25 P.S. § 3031.7(8) Precludes Multiple Voting and Tabulating Multiple Votes; 1107-A(9), 25 P.S. § 3031.7(9) Permits Voter at Primary to Vote Only for Candidates in Party of Registration, Any Candidate for Nonpartisan Nomination, and For Any Entitled Question; 1101-A, 25 P.S. § 3031.1 Provides for Permanent Physical Record of Each Vote Cast; and 1117-A, 25 P.S. § 3031.17 Statistical Sample

Penetration Analysis Test Case:

• Test Case Identifier: 12 – 1107-A(12), 25 P.S. § 3031.7(12) Acceptable Ballot Security Procedures and Impoundment of Ballots

6.0 TEST DATA

This section contains a detailed description of the test election definitions and ballot logic being exercised.

The election definitions being used for this re-examination are provided in Appendix A of this Test Protocol. A predefined set of election parameters are included in the election definitions. Both the general election and the closed primary election definitions provide the voting variations, geographic subdivisions, parties, supported languages and test voting pattern with results being tested. The only languages required for this re-examination are English and Spanish. The Department provided the Spanish translation. Each test voting pattern provides the input method and device. For all Write-In selections, the name will be input as "John Doe." For multiple Write-In selections, the name will be appended with the character "I" for the number of Write-In selections (*i.e.*, "John Doe I," "John Doe II," "John Doe III," and "John Doe IIII" in a "Vote for Four" contest with four write-ins).

6.1 Data Recording

This subsection contains a detailed description of the procedures to be followed during test execution and data collection.

All test data produced during this re-examination is the property of the Department. The output test data will be collected and stored in an appropriate manner as to allow for data analysis. Actual results from executed tests will be recorded in real-time in Test Execution Logs.

6.2 Data Evaluation

The Examiner will evaluate all test results against the expected results set forth in the test cases provided in Appendix B. The acceptable range for system performance and the expected results is derived from the test designers experience and expertise. If an expected result is not achieved, an evaluation will be performed as to "why" the test or test step did not produce the expected results. This evaluation will consider test error, invalid expectations, and system performance. Failure to achieve the expected results does not constitute a test failure. A test failure only occurs when the "Criteria for Evaluation of Test Results," as set forth in the test cases, are not achieved for a specific test.

APPENDIX A

ELECTION DEFINITIONS

Election Definition: Pennsylvania Certification Closed Primary Election

Primary Election Description:

A closed primary election for 2 parties in 3 precincts. This election contains 35 contests compiled into 6 ballot styles. Each ballot style contains 15 contests. The voting variations supported in a primary election by the Commonwealth of Pennsylvania are defined in this election. The voting variations are as follows:

- Partisan contest
- Non-Partisan
- Primary Presidential delegation nominations
- Write-In voting
- N of M Contest
- Cross-Party Filed Candidates

This closed primary election was designed to functionally test the handling of multiple ballot styles across geographical subdivisions, support for two languages, and support for common primary specific voting variations.

Configuration:

EMS computer loaded with software certified for use in Pennsylvania to create the following configuration:

Name: Pennsylvania Certification Closed Primary Election Voting Devices: 1 machine for each precinct Precincts: Precinct 1, Precinct 2, Precinct 3 Parties: Republican, Democrat Languages: English, Spanish Totals Contests: 35 Contests as follows:

		Asunto	o del bono		

Para promover y asegurar la preservación y mejoramiento del pasajero férreo esencial y servicios de carga para los habitantes del estado, ¿se debe aprobar la sección dos del capítulo ciento dieciocho de las leyes de mil novecientos sesenticuatro, autorizando la creación de una deuda estatal en la cantidad de doscientos cincuenta millones de dólares para instalaciones de capital?

Sí

No

Election Definition: Pennsylvania Certification General Election

General Election Description:

A general election combining presidential year contests, non-presidential year contests, and municipal contests into a single election held in 3 precincts one of which is a split precinct on the "Representative in the General Assembly" contests. This election contains 21 contests compiled into 4 ballot styles (excluding language styles). 15 of the contests are in all ballot styles. The other 6 are split between at least 2 of the precincts with a maximum of 21 different contests spread across the 3 precincts. All voting variations supported by the Commonwealth of Pennsylvania are defined in this election. The voting variations are as follows:

- Partisan contest
- Non-Partisan contest
- N of M contest
- Referendum contest
- Retention Contest
- Straight Party voting
- Write-In voting
- Split Precinct
- Cross-Party Nominated

This general election was designed to functionally test the handling of multiple ballot styles across geographical subdivisions, support for English and Spanish languages, support for all Pennsylvania voting variations, and audio support for English and Spanish.

Configuration:

EMS computer loaded with software certified for use in Pennsylvania to create the following configuration:

Name: Pennsylvania Certification General Election Voting Devices: 1 machine for each precinct Precincts: Precinct 1, Precinct 2 split into 2a and 2b, Precinct 3 Parties: Republican, Democratic, Green, Libertarian Languages: English, Spanish Totals Contests: 21 Contests as follows:

APPENDIX B - TEST CASES

Test Case Id	entifier: 01 – 25 P.S. § 303	31.7(1) Voter Secrecy (ADA Voter)
PA ST 25 P Requiremen	P.S. § 3031.7 t:	(1) Provides for voting in absolute secrecy and prevents any person from seeing or knowing for whom any voter, except one who has received or is receiving assistance as prescribed by law, has voted or is voting.
selections inp observed dur vote has been		 can be described for normal election day operation by Pennsylvania procedures and or the device manufacturer for an ADA voter. A marker is placed 12 feet (measured from the lowest point of the devices voting surface to the floor) directly behind the center of the voting device. From that marker, another marker is placed 12 feet to the right side and the left side. The side distance observation points should be approximately 17 feet. See Step 1000 for a layout diagram. The ADA voter will be positioned in the center of the tabulation device with a site line of 4 feet. See Step 1001.
Test Equipn		Standard 15+ foot tape measure
-	edural Requirements:	Two roles are required for this test case. An ADA Voter role and an observer role. The ADA voter will be positioned with a line of site at 48 inches. The observation must be made by an individual between the heights 68 inches and 71 inches.
Assumptions	5:	An election is loaded on the device and the polls are open, ready for voting.
Step		Description
1000	Layout Diagram: Verify all measurements. <i>Expected:</i> Center measurement <i>Actual:</i> Measured 12 feet.	Top View DRE 12' 12' 12' 12' 12' 12' 12' 12'
1001	ADA Voter Position:	Side View Voter line of sight

Verify all measurements.
<i>Expected:</i> Center measurement is 12 feet and the side distance observation points are approximately 17 feet with a voter line of sight at 48 inches.
Actual: Measured line of site at 48 inches.
Observer Role - Activate a ballot for ADA voting.
Expected: Ballot is presented and vote selections can be input.
Actual: Ballot is presented and vote selections can be input.
ADA Voter Role - Select the candidate corresponding to the upper most left hand position of the ballot presentation.
Observer Role - Attempt to ascertain visually, the voters input from the right most position, the center position, and the left most position
ADA Voters Role - Use the supplied method to advance the ballot to a cast vote state. The only selection should be the upper most left hand position. All other selections are to be under voted.
<i>Expected:</i> The Observer cannot determine the Voter's input selections. <i>Actual:</i> Observer reported no observations.
ADA Voter Role - Select the candidate corresponding to the upper most right hand position of the ballot presentation.
Observer Role - Attempt to ascertain, both audibly and visually, the voters input from the right most position, the center position, and the left most position
ADA Voters Role - Use the supplied method to advance the ballot to a cast vote state. The only selection should be the upper most right hand position. All other selections are to be under voted.
<i>Expected:</i> The Observer cannot determine the Voter's input selections.
Actual: Observer reported no observations.
ADA Voter Role - Select the candidate corresponding to the lower most left hand position of the ballot presentation.
Observer Role - Attempt to ascertain, both audibly and visually, the voters input from the right most position, the center position, and the left most position

	ADA Voters Role - Use the supplied method to advance the ballot to a cast vote state. The only selection should be the lower most left hand position. All other selections are to be under voted.
	Expected: The Observer cannot determine the Voter's input selections.
	Actual: Observer reported no observations.
1050	ADA Voter Role - Select the candidate corresponding to the lower most right hand position of the ballot
	presentation. Observer Role Attempt to ascertain, both audibly and visually, the voters input from the right most position, the center position, and the left most position
	ADA Voters Role - Use the supplied method to advance the ballot to a cast vote state. The only selection should be the lower most right hand position. All other selections are to be under voted.
	<i>Expected:</i> The Observer cannot determine the Voter's input selections.
	Actual: Observer reported no observations.
	r Evaluation of the Test Results: The observer must not be able to determine the voter's om any observation position or any voter selection surface position.

Test Case Ide	entifier: 01 – 25 P.S. § 303	1.7(1) Voter Secrecy (Regular Voter)	
PA ST 25 P.		(1) Provides for voting in absolute secrecy and prevents any person from	
Requirement	-	seeing or knowing for whom any voter, except one who has received or is	
•	receiving assistance as prescribed by law, has voted or is voting.		
Test Objecti	ve: To determine if a v	voters Test Configuration: Precinct tabulation device configured as	
	be observed during the a		
	e a vote has been cast.	procedures and or the device manufacturer. A marker is placed 12	
0,		feet (measured from the lowest point of the devices voting surface	
		to the floor) directly behind the center of the voting device. From	
		that marker, another marker is placed 12 feet to the right side and	
		the left side. The side distance observation points should be	
		approximately 17 feet. See step 1000 for a layout diagram.	
Test Equipm		Standard 15+ foot tape measure	
Special Proce	edural Requirements:	Two roles are required for this test case. A Voter role and an observer	
		role. The observation must be made by an individual between the heights	
A		of 5 feet 8 inches and 5 feet 11 inches.

	Actual: All selections were accurately reported on the results report.
and reported	r Evaluation of the Test Results: The intended selections input above are recorded, stored, d as input by the tester. The attempts to select more persons than the vote for and any question nce are unsuccessful.

Test Case Id	entifier: 10 – 25 P.S. § 303	1.7(10) Ballot Review and Change (Regular ADA)		
PA ST 25 P.S. § 3031.7		(10) If it is of a type that registers the vote electronically, the voting		
Requiremen	-	system shall permit each voter to change his vote for any candidate or		
_		upon any question appearing on the official ballot up to the time that he		
		takes the final step to register his vote and to have his vote computed.		
		If it is of a type that uses paper ballots or ballot cards to register the vote		
		and automatic tabulating equipment to compute such votes, the system		
		shall provide that a voter who spoils his ballot may obtain another ballot; any ballot thus returned shall be immediately cancelled and at the close		
		of the polls shall be enclosed in an envelope marked "Spoiled" which		
		shall be sealed and returned to the county board.		
	ive: To determine if the v			
	ws the voter to review			
	d change a vote selection b	perfore procedures and/or the device manufacturer.		
cast of the ba		None		
	edural Requirements:	None		
Assumptions	· · · · · · · · · · · · · · · · · · ·	An election is loaded on the device and the polls are open, ready for		
		voting.		
Step		Description		
1000				
	Activate a ballot for voting.			
	Expected: The ballot is present	nted and vote selections can be input.		
	Actual: The ballot was presented.			
1010				
1010	Select the first candidate in the first all "1 of 1" contest excluding a straight party contest, the first "N" candidates in all "N of M" contests, and select the "Yes" option in all "Question" contests.			
	<i>Expected:</i> The precinct tabulation device allow for the navigation and the voting inputs to be selected as described above.			
	<i>Actual:</i> James Collins and Arthur Remus were selected for President of the United States. Mary L. Daniel and Jack "Duke' Brodisky were selected for Court of Common Pleas and "Yes" selected in all question contests.			
1020	Use the designated method to advance the "Ballot Review". Observe the "Ballot Review" to see if the above			
	selections are indicated.			
	<i>Expected:</i> The precinct tabulation device advances to the "Ballot Review" screen. The vote selections can be verified.			
	Actual: The ballot review screen displayed the selection correctly.			
1030	Use the designated method to retract to the first partisan "1 of 1" contest excluding the straight party contest.			
	<i>Expected:</i> The precinct tabulation device navigates to the first partisan "1 of 1" contest excluding the straight party contest.			
	Actual: Navigated to President of the United States.			

1040	
1010	Deselect the first candidate selection and select the second candidate.
	<i>Expected:</i> The precinct tabulation device indicates the de-selection of the first candidate and the select of the second candidate.
	Actual: Calvin Marino and Keith Satterwhite were selected.
1050	Use the designated method to advance to the first "Question" contest. De-select the "Yes" option and select the "No" option.
	<i>Expected:</i> The precinct tabulation device navigates to the first "Question" contest and provides an indication of the de-selection of the "Yes" option and a selection of the "No" option.
	Actual: "No" was selected in the Statewide Referendum contest.
1060	Use the designated method to advance the "Ballot Review". Observe the "Ballot Review" to see if the above selections are indicated. Use the designated method to cast the voted selections.
	<i>pected:</i> The precinct tabulation device advances to the "Ballot Review" screen. After review and ballot is cast successfully.
	Actual: The selections were displayed correctly.
1070	Repeat steps 1000- 1060 from above using an ADA input device.
	Expected: Repeat 1000X Repeat 1010X Repeat 1020X Repeat 1030X Repeat 1040X Repeat 1050X Repeat 1060X
	Actual: All steps were repeated using an audio session.
1080	Close the polls and print the closed polls report tape.
	<i>Expected:</i> The polls closed and a report is printed.
	Actual: The polls were closed and the results report printed.
1090	Review the closed polls report to ensure all selections input above are recorded and reported correctly.
	Expected: The closed polls report presents the accumulated totals for the selections input above.
	Actual: All selections were accurately reported on the results report.
Criteria for	Evaluation of the Test Results: The intended selections input above are recorded, stored,

and reported as input by the tester. The voter input can be changed by navigating through the ballot after a ballot has been reviewed.

			(16) Public Counter, No Reopening of Polls, Media Security with		
	Tamper Proof Locks and Zero Proof and Tally Reports.				
PA ST 25 P	-) If the voting system is of a type which provides for the computation		
Requirements: and t autor or ca (i) A autor autor enter numb (ii) A (ii) A elema imme comp		autor or ca (i) A autor enter numb (ii) A elema imme comp (iii) I	tabulation of votes at the district level, the district component of the matic tabulating equipment shall include the following mechanisms upabilities: public counter, the register of which is visible from the outside of the matic tabulating equipment component into which the ballots are red, which shall show during any period of operation the total ber of ballots entered for computation and tabulation. A lock, or locks, by the use of which all operation of the tabulation ent of the automatic tabulating equipment is absolutely prevented ediately after the polls are closed or where the tabulation of votes is obleted. It shall be so constructed and controlled that, during the progress of		
votin of vo prect (iv)If exced all c that indic any o capa oppo (v) It at th elem coun reco ballo cand			g, it shall preclude every person from seeing or knowing the number tes theretofore registered for any candidate or question; and it shall have every person from tampering with the tabulating element. The number of choices recorded for any office or on any question eds the number for which the voter is entitled to vote, it shall reject hoices recorded on the ballot for that office or question, provided, if used during the period of voting it may also have the capacity to tate to a voter that he has improperly voted for more candidates for office than he is entitled to vote for, and in such case it shall have the city to permit the voter to mark a new ballot or to forego his rtunity to make such correction. The shall be equipped with an element which generates a printed record the beginning of its operation which verifies that the tabulating ents for each candidate position and each question and the public ter are all set to zero and with an element which generates a printed red at the finish of its operation of the total number of voters whose the been tabulated, the total number of votes cast for each idate whose name appears on the ballot, and the total number of the cast for, or against, any question appearing on the ballot.		
Test Objecti	ve: To determine if the voti		Test Configuration: Precinct tabulation device configured as		
•			described for normal election day operation by Pennsylvania		
the reopening of the polls, and supplies a zero		zero	procedures and/or the device manufacturer. This includes all		
proof and tall			security locks and seals.		
Test Equipm		None			
-	edural Requirements:	None			
Assumptions	3:	The e	election media is installed but the polls have not been opened.		
Step			Description		
1000	Ensure media is loaded but the polls have not been opened. Use the designated method to open polls. If a response is needed to print "Zero Proof" report, select this option.				
	<i>Expected:</i> The precinct tabulation device opens the polls and prints a "Zero Proof" report. <i>Actual:</i> Polls opened and zero proof report was printed.				
1010	Activate a ballot for voting.				
	<i>Expected:</i> The ballot is presented and vote selections can be input.				

	Actual: The ballot was presented.
1000	
1020	Use the designated method to navigate to the straight party contest. Select the first selection in the straight party contest.
	<i>Expected:</i> The precinct tabulation device navigates to the first straight party contest, allows the input of the first selection, and indicts the first selections was input.
	Actual: Republican was selected.
1030	
1000	Use the designated method to advance the "Ballot Review". Observe all selections for the party associated with the selection for the first straight party selection are selected. Observe the public counter value being 0.
	<i>Expected:</i> The precinct tabulation device navigates to the "Ballot Review" screen. The public counter is visible and the value is 0.
	<i>Actual:</i> Selections for Republican candidates were displayed. The counters had to be observed before the ballot is presented.
1040	Use the designated method to cast the voted selections. Observe the acknowledgement of "successful" ballot cast if provided, and the public counter incrementing by one.
	<i>Expected:</i> The precinct tabulation device successfully cast the ballot and the public counter is incremented. If the ballot was not cast successfully the test is halted.
	Actual: The ballot was cast successfully. The incrementing of the counter had to be observed after the ballot was cast.
1050	Close the polls and print the closed polls report tape.
	Expected: The polls closed and a report is printed.
	Actual: The polls were closed and the results report printed.
1060	Use the designated method to attempt to reopen the polls.
	<i>Expected:</i> The polls cannot be reopened.
	Actual: The polls could not be reopened.
1070	
	Place lock on precinct tabulation device per Pennsylvania Procedures to ensure all operation of the tabulation element is prevented.
	<i>Expected:</i> The precinct tabulation device can by secured so that all operation of the tabulation element is prevented.

	Actual: The precinct tabulation device could be locked.
1070	Review the closed polls report to ensure all selections input above are recorded and reported correctly. <i>Expected:</i> The closed polls report presents the accumulated totals for the selections input above. <i>Actual:</i> The polls were closed and the results report printed.
and reported	Evaluation of the Test Results: The intended selections input above are recorded, stored, d as input by the tester. The voting device is able to produce a "Zero Proof" and "Tally ne voting device has a visible public counter and the counter increments correctly.

Test Case Identifier: 04, 06, 08	8, 09, Permanent Physical Record, and Statistical Sample – 25 P.S. §§ 3031.7(4), (6),			
(8), (9); 3031.1; and 3031.17 System Integration				
PA ST 25 P.S. § 3031.7 Requirements:	 (4) Permits each voter, at other than primary elections, to vote a ticket selected from the nominees of any and all political parties, from the nominees of any and all political bodies, and from any persons whose names are not in nomination and do not appear upon the official ballot. (6) Permits each voter to vote for as many persons for any office as he is entitled to vote for and to vote for or against any question upon which he is entitled to vote and precludes each voter from voting or from having his vote tabulated for any candidate, or upon any question, for whom or upon which he is not entitled to vote. (8) Precludes each voter from voting or from having his vote tabulated more than once for any candidate for the same office or upon any question, except in districts and for offices where cumulative voting is authorized by law. (9) Permits each voter at a primary election to vote only for the candidates seeking nomination by a political party in which such voter is registered and enrolled, and for any candidate for nonpartisan nomination, and for any 			
PA ST 25 P.S. § 3031.1 Requirements:	question upon which he is entitled to vote. "ELECTRONIC VOTING SYSTEM" means a system in which one or more voting devices are used to permit the registering or recording of votes and in which such votes are computed and tabulated by automatic tabulating equipment. The system shall provide for a permanent physical record of each vote cast.			
PA ST 25 P.S. § 3031.17 Requirements:	The county board of elections, as part of the computation and canvass of returns, shall conduct a statistical recount of a random sample of ballots after each election using manual, mechanical or electronic devices of a type different than those used for the specific election. The sample shall include at least two (2) per centum of the votes cast or two thousand (2,000) votes whichever is the lesser.			

Test Objective:

This area of testing will focus on the system being able to perform a general and a closed primary from ballot design to reporting of results.

Test Configuration:

The system integration testing will execute a general and a primary election from ballot design through vote accumulation, consolidation and reporting. The election definitions will include all supported voting variations, languages, multiple ballot styles, and ADA voting. Two election definitions will be defined and executed according to a predefined voting pattern. All requirements tested in the targeted functionality testing will be monitored including accuracy throughout system integration testing.

Test Method:

The method for testing these requirements is defined as follows:

Provide an election definition that contains multiple ballot styles based on geographical subdivision in both a general election and a closed primary and tests that each vote is counted only once.

Two elections will be utilized to perform System Integration Testing:

- PA Certification General Election
- PA Certification Closed Primary Election

This test will be performed by evaluating the system from the pre-voting state of loading the media and obtaining pre-voting reports through the post-voting state of accumulation of voted data and printing of post-election reports. All documented steps will be followed to perform this test.

- Election definition and ballot layout coded prior to test
- Print pre-election report for ballot layout, precinct summary, and election summary
- Load election media
- Install election onto the precinct tabulation device
- Open polls and print zero proof report
- Vote pre-defined voting pattern
- Closed polls and print results tapes
- Print audit logs
- Perform a 10% sample according to PA procedures
- Harvest permanent physical record example
- Load election results into EMS
- Print precinct summary and election summary reports
- Collect and analyze all data

Criteria for Evaluation of the Test Results: All intended selection input by the tester are recorded, stored and reported accurately.

Test Case Identifier: 12 – 25 P.S. § 3	3031.7(12) Penetration Analysis
--	---------------------------------

PA ST 25 P.S. § 3031.7	(12) Provides acceptable ballot security pro	cedures and
Requirements:	impoundment of ballots to prevent tampering with a	or substitution
	of any ballots or ballot cards.	

Test Objective:

This area of testing will focus on the current documented procedures and configuration to ensure that the physical and access secure measures provide a determined level of security. *Depending on the scope of this project this may be performed by a third-party expert.*

Test Configuration:

The voting system will be configured as would be for a polling place with all security precautions in place.

Test Method:

The method for testing these requirements is defined as follows:

Test steps will be followed to evaluate the physical and access controls and procedures in place for the storage of voted ballots. This test will be performed by evaluating the system to ensure that all access areas and seals and/or locks provide adequate security from external access. The tester will:

- check all seal and/or locks and attempt to open the system
- verify that the ballot storage device is secure by attempting to insert and retrieve ballots without removing any seals and/or locks
- verify that any needed supplies can be accessed by the poll worker without allowing access to the ballots or internal components of the voting system
- verify that the system counter cannot be reset by any unauthorized person at any unauthorized point
- exercise verification of password security management

Criteria for Evaluation of the Test Results: All intended access controls are in place and are sufficient.

25 P.S. § 3031.5. Examination and approval of electronic voting systems by the Secretary of the Commonwealth

(a) Any person or corporation owning, manufacturing or selling, or being interested in the manufacture or sale of, any electronic voting system, may request the Secretary of the Commonwealth to examine such system if the voting system has been examined and approved by a federally recognized independent testing authority and if it meets any voting system performance and test standards established by the Federal Government. The costs of the examination shall be paid by the person requesting the examination in an amount set by the Secretary of the Commonwealth. Any ten or more persons, being qualified registered electors of this Commonwealth, may, at any time, request the Secretary of the Commonwealth to reexamine any electronic voting system theretofore examined and approved by him. Before any reexamination, the person, persons, or corporation, requesting such reexamination, shall pay to the Treasurer of the Commonwealth a reexamination fee of four hundred fifty dollars (\$450). The Secretary of the Commonwealth may, at any time, in his discretion, reexamine any such system therefore examined and approved by him. The Secretary of the Commonwealth may issue directives or instructions for implementation of electronic voting procedures and for the operation of electronic voting systems.
